■ Lacks Fun, Wow Effect

Content	P5
<p>Moving Browser Window</p> <p>Page section and Header's menu section do not get separated and only basic scrolling function is provided.</p>	 <p>Top-most/Bottom-most and diagonal movements lack bounce effect</p>
<p>Delete Memo/Gallery</p> <p>When deleting memo, there is no effect other than Pop-up notice informing that memo has been deleted.</p>	 <p>In the case of Gallery, a black screen appears without any effect then is deleted.</p>

[GA lab Evaluation Content]

- No GUI guide, HoneyComb basic effects are applied.
- HoneyComb 90 degrees transition effect will be referenced and a 180 degree transition effect will be roughly made and applied. (~4/22)
- **UX request detail: Please send a GUI Guide and video on P5 180 degrees transition effect.**

Browser – Bounce effect is scheduled to be reviewed.

Only, the effect of having the page and header separated was reflected up to GB, but Verification and Domestic Version, etc. recognized this as a problem and made a request that there be no separation.

Therefore, need to decide whether the applicable effect will continue to be applied to HC.

Issue 51 _ Browser

- During topmost/bottom-most, diagonal movements there is no springing Bounce effect

[GA Lab Review Content]
Bounce Effect scheduled for review.

P5 iPad2/ Proposed Improvement

During the topmost/bottom-most, diagonal movements, there is no Bounce effect in the header's menu section

In the case of iPad2, there is a fun element from a natural Bounce effect that follows hand gestures
