HTC  
Surround

**Feature** Phone slides partially to reveal speaker grill

**Engadget** "We don't think any amount of audio postprocessing can make tiny phone speakers sound good... On a more positive note, the speakers do get nicely **loud without distortion**"

**cnet** "...the only thing its built-in speakers really add to the phone is weight."

**Slashgear** "It's certainly loud, but it lacks clarity and sharpness; the surround sound mode, meanwhile, is audibly different from the default setting, but we wouldn't say it was theater-like either."

# Defy

## Feature

Water-resistant and dustproof

## Engadget

"Physically, the Defy is unusual in that it looks so... well, usual. Typically, ruggedized phones are overbuilt, over-engineered behemoths that are obviously designed to look tough, and that's just not the case with this one."

## cnet

"The Motorola Defy is tough enough to withstand everyday hazards with its tough Gorilla glass and rugged exterior... its rough-and-tumble aesthetic isn't for everyone."

## PC Magazine

"I dunked the Defy in a foot of water with the MP3 player going, and it continued playing without a problem. I couldn't stop the playback though, because capacitive touch screens don't work when they're wet."
