A faster phone on a 4G network

The fastest, state-of-the-art networks are 4G, so naturally, the Galaxy S II is designed for speed. With 4G, every download, upload, app, game, connection and feature runs almost as fast as you can push the button.

A faster phone with a 1.2 GHz dual core processor

We've virtually eliminated waiting and disruptions by installing a 1.2 GHz dual core processor. And with the 4G network, movies don't stall, websites don't drag and time never stands still.

"The Epic 4G Touch brings another top-notch Android device to Sprint's portfolio, with its fast

The brightest, most colorful screen

The Galaxy S II has a spacious 4.52" Super AMOLED™ Plus Screen that's preferred 2 to 1 in side by side tests with the current leading smartphone*. Notice we said "current," because when you see the deeper, richer color with unmatched detail and contrast, you're going to want your very own Galaxy S II. The secret is that the Super AMOLED™ Plus has the ability to deliver brilliant colors with the most contrast, providing a vivid and crisp viewing experience. It's a visual treat you won't get from other screens. You don't even have to be directly in front of it to see a perfect image, thanks to its superior viewing angle. It's the best. That's right. We said it. It's the best.
