NOTE FROM THE DIRECTOR OF LEGISLATIVE OPERATIONS

This committee print consists of the enrolled text and explanatory material for the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (H.R. 6523; Public Law 111–383).

This Act and the material found in this committee print are the product of an agreement between the Chairman of the House Committee on Armed Services and the Chairman and Ranking Member of the Senate Committee on Armed Services on the reconciliation of H.R. 5136, as passed by the House of Representatives on May 28, 2010, and S. 3454, as reported out of committee on June 4, 2010. The Ranking Minority Member of the House Committee on Armed Services did not fully participate in the agreement. The negotiated agreement was introduced as an original bill by Chairman Ike Skelton on December 15, 2010, and was considered and passed, as amended, under suspension of the Rules of the House of Representatives on December 17, 2010, by a vote of 341–48. The Senate passed the bill with an amendment offered by Chairman Carl Levin and Ranking Member John McCain by unanimous consent on December 22, 2010. The House concurred in the Senate amendment and passed H.R. 6523 the same day, December 22, 2010. The President signed the legislation on January 7, 2011, and it became Public Law 111–383.

Because the text of H.R. 6523 was negotiated prior to introduction and the agreed-upon language was introduced as an original bill, there is no conference report and no formal “joint explanatory statement of the managers” for H.R. 6523. Instead, the following committee print is intended to show congressional intent and maintain legislative history.

In this committee print, the provisions of H.R. 5136, the House-passed version of the National Defense Authorization Act for Fiscal Year 2011, are generally referred to as “the House bill.” The provisions of S. 3454, the Senate Committee on Armed Services committee-reported version of the National Defense Authorization Act for Fiscal Year 2011, are generally referred to as “the Senate committee-reported bill.” The final form of the agreements reached during negotiations between the House and the Senate are referred to as “the agreement.” Unless required as a part of the agreement reached during negotiations between the House and the Senate, this committee print does not include explanatory sections for provisions in H.R. 5136 or S. 3454 that were not adopted as the final agreement.

The following pages are organized in the manner of a traditional conference report.

SEC. 112. REQUIREMENT TO MAINTAIN NAVY AIRBORNE SIGNALS INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE CAPABILITIES.

(a) FINDINGS.—Congress finds the following:

(1) The Navy terminated the EP-X program to acquire a new land-based airborne signals intelligence capability because of escalating costs and funds budgeted for the program were reallocated to other priorities.

(2) The Navy took this action without planning and budgeting for alternative means to meet operational requirements for tactical-level and theater-level signals intelligence capabilities to support the combatant commands and national intelligence consumers.

(3) The principal Navy airborne signals intelligence capability today is the EP-3E Airborne Reconnaissance Integrated

Electronic System II (ARIES II)—the aircraft and associated electronic equipment of this system are aging and will require replacement or substantial ongoing upgrades to continue to meet requirements.

(4) The Special Projects Aircraft (SPA) platform of the Navy is the second critical element in the airborne signals intelligence capability of the Navy and provides the Navy its most advanced, comprehensive multi-intelligence and quick-reaction capability available.

(b) REQUIREMENT TO MAINTAIN CAPABILITIES.—

(1) PROHIBITION ON RETIREMENT OF PLATFORMS.—The Secretary of the Navy may not retire (or to prepare to retire) the EP-3E Airborne Reconnaissance Integrated Electronic System II or Special Projects Aircraft platform.

(2) MAINTENANCE OF PLATFORMS.—The Secretary of the Navy shall continue to maintain, sustain, and upgrade the EP-3E Airborne Reconnaissance Integrated Electronic System II and Special Projects Aircraft platforms in order to provide capabilities necessary to operate effectively against rapidly evolving threats and to meet combatant commander operational intelligence, surveillance, and reconnaissance requirements.

(3) CERTIFICATION.—Not later than February 1, 2011, and annually thereafter, the Under Secretary of Defense for Intelligence and the Vice Chairman of the Joint Chiefs of Staff shall jointly certify to Congress the following:

(A) The Secretary of the Navy is maintaining and sustaining the EP-3E Airborne Reconnaissance Integrated Electronic System II and Special Projects Aircraft platform in a manner that meets the intelligence, surveillance, and reconnaissance requirements of the commanders of the combatant commands.

(B) Any plan for the retirement or replacement of the EP-3E Airborne Reconnaissance Integrated Electronic System II or Special Projects Aircraft platform will provide, in the aggregate, an equivalent or superior capability and capacity to the platform concerned.

(4) TERMINATION.—The requirements of this subsection with respect to the EP-3E Airborne Reconnaissance Integrated Electronic System II or the Special Projects Aircraft platform shall expire on the commencement of the fielding by the Navy of a platform or mix of platforms and sensors that are, in the aggregate, equivalent or superior to the EP-3E Airborne Reconnaissance Integrated Electronic System II (spiral 3) or the Special Projects Aircraft (P909) platform.

(c) RESTRICTION ON TRANSFER OF SABER FOCUS PROGRAM ISR CAPABILITIES.—

(1) RESTRICTION.—The Secretary of the Navy may not transfer the Saber Focus unmanned aerial system, associated equipment, or processing, exploitation, and dissemination capabilities of the Saber Focus program to the Secretary of the Air Force until 30 days after the Secretary of the Air Force certifies to the congressional defense committees that after such a transfer, the Secretary of the Air Force will provide intelligence, surveillance, and reconnaissance (hereinafter in this

section referred to as “ISR”) capabilities at the same or greater capability and capacity level as the capability or capacity level at which the Saber Focus program provides such capabilities to the area of operations concerned as of the date of the enactment of this Act.

(2) CONTINUED NAVY PROVISION OF CAPABILITIES.—The Secretary of the Navy shall continue to provide Saber Focus ISR program capabilities at the same or greater capability and capacity level as the capability or capacity level at which the Saber Focus program provides such capabilities as of the date of the enactment of this Act to the area of operations concerned until—

(A) the certification referred to in paragraph (1) is provided to the congressional defense committees; or

(B) 30 days after the Secretary of Defense certifies to the congressional defense committees that the ISR capabilities of the Saber Focus program are no longer required to mitigate the ISR requirements of the combatant commander in the area of operations concerned.

SEC. 113. REPORT ON NAVAL FORCE STRUCTURE AND MISSILE DEFENSE.

(a) REPORT.—Not later than March 31, 2011, the Secretary of Defense, in coordination with the Secretary of the Navy and the Chief of Naval Operations, shall submit to the congressional defense committees a report on the force structure requirements of the major combatant surface vessels with respect to ballistic missile defense.

(b) MATTERS INCLUDED.—The report shall include the following:

(1) An analysis of whether the requirement for sea-based missile defense can be accommodated by upgrading Aegis ships that exist as of the date of the report or by procuring additional combatant surface vessels.

(2) A discussion of whether such sea-based missile defense will require increasing the overall number of combatant surface vessels beyond the requirement of 88 cruisers and destroyers in the 313-ship fleet plan of the Navy.

(3) A discussion of the process for determining the number of Aegis ships needed by each commander of the combatant commands to fulfill ballistic missile defense requirements, including (in consultation with the Chairman of the Joints Chiefs of Staff) the number of such ships needed to support the phased, adaptive approach to ballistic missile defense in Europe.

(4) A discussion of the impact of Aegis Ashore missile defense deployments, as well as deployment of other elements of the ballistic missile defense system, on Aegis ballistic missile defense ship force structure requirements.

(5) A discussion of the potential effect of ballistic missile defense operations on the ability of the Navy to meet surface fleet demands in each geographic area and for each mission set.

(6) An evaluation of how the Aegis ballistic missile defense program can succeed as part of a balanced fleet of adequate size and strength to meet the security needs of the United States.

(7) A description of both the shortfalls and the benefits of expected technological advancements in the sea-based missile defense program.

(8) A description of the anticipated plan for deployment of Aegis ballistic missile defense ships within the context of the fleet response plan.

SEC. 114. REPORTS ON SERVICE-LIFE EXTENSION OF F/A-18 AIRCRAFT BY THE DEPARTMENT OF THE NAVY.

(a) **COST-BENEFIT ANALYSIS OF SERVICE LIFE EXTENSION OF F/A-18 AIRCRAFT.**—Before the Secretary of the Navy may enter into a program to extend the service life of F/A-18 aircraft beyond 8,600 hours, the Secretary shall—

(1) conduct a cost-benefit analysis, in accordance with Office of Management and Budget Circular A-94, comparing extending the service life of existing F/A-18 aircraft with procuring additional F/A-18E or F/A-18F aircraft as a means of managing the shortfall of the Department of the Navy in strike fighter aircraft; and

(2) submit to the congressional defense committees a report on such cost-benefit analysis.

(b) **ELEMENTS OF COST-BENEFIT ANALYSIS.**—The cost-benefit analysis required by subsection (a)(1) shall include the following:

(1) An estimate of the full costs, over the period covered by the future-years defense program submitted to Congress under section 221 of title 10, United States Code, with the budget of the President, of extending legacy F/A-18 aircraft beyond 8,600 hours, including—

(A) any increases in operation and maintenance costs associated with operating such aircraft beyond a service life of 8,600 hours; and

(B) the costs with respect to the airframe, avionics, software, and aircraft subsystems and components required to remain relevant in countering future threats and meeting the warfighting requirements of the commanders of the combatant commands.

(2) An estimate of the full costs, over the period covered by such future-years defense program, of procuring such additional F/A-18E or F/A-18F aircraft as would be required to meet the strike fighter requirements of the Department of the Navy in the event the service life of legacy F/A-18 aircraft is not extended beyond 8,600 hours.

(3) An assessment of risks associated with extending the service life of legacy F/A-18 aircraft beyond 8,600 hours, including the level of certainty that the Secretary will be able to achieve such an extension.

(4) An estimate of the cost-per-flight hour incurred in operating legacy F/A-18 aircraft with a service life extended beyond 8,600 hours.

(5) An estimate of the cost-per-flight hour incurred for operating new F/A-18E or F/A-18F aircraft.

(6) An assessment of any alternatives to extending the service life of legacy F/A-18 aircraft beyond 8,600 hours or buying additional F/A-18E or F/A-18F aircraft that may be available

to the Secretary to manage the shortfall of the Department of the Navy in strike fighter aircraft.

(c) **ADDITIONAL ELEMENTS OF REPORT.**—In addition to the information required in the cost-benefit analysis under subsection (b), the report under subsection (a)(2) shall include an assessment of the following:

(1) Differences in capabilities of—

(A) legacy F/A–18 aircraft that have undergone service-life extension;

(B) F/A–18E or F/A–18F aircraft; and

(C) F–35C aircraft.

(2) Differences in capabilities that would result under the legacy F/A–18 aircraft service-life extension program if such program would—

(A) provide only airframe-life extensions to the legacy F/A–18 aircraft fleet; and

(B) provide for airframe-life extensions and capability upgrades to the legacy F/A–18 aircraft fleet.

(3) Any disruption that procuring additional F/A–18E or F/A–18F aircraft, rather than extending the service life of legacy F/A–18 aircraft beyond 8,600 hours, would have on the plan of the Navy to procure operational carrier-variant Joint Strike Fighter aircraft.

(4) Any changes that procuring additional F/A–18E or F/A–18F aircraft, rather than extending the service life of legacy F/A–18 aircraft beyond 8600 hours, would have on the force structure or force mix intended by the Navy for its carrier air wings.

(5) Any other operational implication of extending (or not extending) the service life of legacy F/A–18 aircraft that the Secretary considers appropriate.

(d) **REPORT ON OPERATIONAL F/A–18 AIRCRAFT SQUADRONS.**—Before reducing the number of F/A–18 aircraft in an operational squadron of the Navy or Marine Corps, the Secretary shall submit to the congressional defense committees a report that discusses the operational risks and impacts of reducing the squadron size. The report shall include an assessment of the following:

(1) The effect of the reduction on the operational capability and readiness of the Navy and the Marine Corps to conduct overseas contingency operations.

(2) The effect of the reduction on the capability of the Navy and the Marine Corps to meet ongoing operational demands.

(3) Any mechanisms the Secretary intends to use to mitigate any risks associated with the squadron size reduction.

(4) The effect of the reduction on pilots and ground support crews of F/A–18 aircraft, in terms of training, readiness, and war fighting capabilities.

(e) **REPORT ON F/A–18 AIRCRAFT TRAINING SQUADRONS.**—Before reducing the size of an F/A–18 aircraft training squadron, or transferring an F/A–18 training aircraft for operational needs, the Secretary shall submit to the congressional defense committees a report that describes—

(1) any risks to sustaining required training of F/A–18 aircraft pilots with a reduced training aircraft base; and

(2) any actions the Navy is taking to mitigate the risks described under paragraph (1).

Subtitle C—Missile Defense Programs

SEC. 221. SENSE OF CONGRESS ON BALLISTIC MISSILE DEFENSE.

(a) SENSE OF CONGRESS.—It is the sense of Congress—

(1) that the phased, adaptive approach to missile defense in Europe is an appropriate response to the existing ballistic missile threat from Iran to the European territory of North Atlantic Treaty Organization countries, and to potential future ballistic missile capabilities of Iran;

(2) that the phased, adaptive approach to missile defense in Europe is not intended to, and will not, provide a missile defense capability relative to the ballistic missile deterrent forces of the Russian Federation, or diminish strategic stability with the Russian Federation;

(3) to support the efforts of the United States Government and the North Atlantic Treaty Organization to pursue cooperation with the Russian Federation on ballistic missile defense relative to Iranian missile threats;

(4) that the ground-based midcourse defense system deployed in Alaska and California currently provides adequate defensive capability for the United States against currently anticipated future long-range ballistic missile threats from Iran, and this capability will be enhanced as the system is improved, including by the planned deployment of an AN/TPY-2 radar in southern Europe in 2011;

(5) that the ground-based midcourse defense system should be maintained, enhanced, and adequately tested to ensure its operational capability through its service life;

(6) that the United States should, as stated in its unilateral statement accompanying the New START Treaty, “continue improving and deploying its missile defense systems in order to defend itself against limited attack and as part of our collaborative approach to strengthening stability in key regions”;

(7) that, as part of this effort, the Department of Defense should pursue the development, testing, and deployment of operationally effective versions of all variants of the standard missile-3 for all four phases of the phased, adaptive approach to missile defense in Europe;

(8) that the standard missile-3 block IIB interceptor missile planned for deployment in phase 4 of the phased, adaptive approach should be capable of addressing the potential future threat of intermediate-range and long-range ballistic missiles from Iran, including intercontinental ballistic missiles that could be capable of reaching the United States;

(9) that there are no constraints contained in the New START Treaty on the development or deployment by the United States of effective missile defenses, including all phases of the phased, adaptive approach to missile defense in Europe and further enhancements to the ground-based midcourse defense system, as well as future missile defenses; and

(10) that the Department of Defense should continue the development, testing, and assessment of the two-stage ground-based interceptor in such a manner as to provide a hedge against potential technical challenges with the development of the standard missile-3 block IIB interceptor missile as a means of augmenting the defense of Europe and of the homeland against a limited ballistic missile attack from nations such as North Korea or Iran.

(a) **FINDINGS.**—Congress makes the following findings:

(1) There have been various reports of the exposure of current and former members of the Armed Forces, their dependents, and civilian employees to environmental hazards while living and working on military installations.

(2) There is the need to better understand existing Department of Defense policies and procedures for addressing possible environmental exposures at military installations, determining any correlation between such an exposure and a subsequent health condition, and handling claims and potential compensation.

(3) While many of these possible exposures have been studied and evaluated, the extent to which those exposures caused or contributed to the short- and long-term health conditions of current and former members of the Armed Forces, their dependents, and civilian employees remains largely unknown.

(4) As for these possible exposures and the link between the exposure and subsequent health conditions, there may be better ways for the Federal Government to evaluate, address and, as warranted, provide health benefits or possible compensation as a remedy to these potential exposures.

(b) **COMPTROLLER GENERAL ASSESSMENT REQUIRED.**—The Comptroller General of the United States shall carry out an assessment of possible exposures to environmental hazards on military installations that includes the following:

(1) An identification of the policies and processes by which the Department of Defense and the military departments re-

spond to environmental hazards on military installations and possible exposures and determine if there is a standard framework.

(2) An identification of the existing processes available to current and former members of the Armed Forces, their dependents, and civilian employees to seek compensation and health benefits for exposures to environmental hazards on military installations.

(3) A comparison of the processes identified under paragraph (2) with other potential options or methods for providing health benefits or compensation to individuals for injuries that may have resulted from environmental hazards on military installations.

(4) An examination of what is known about the advantages and disadvantages of other potential options or methods as well as any shortfalls in the current processes.

(5) Recommendations for any administrative or legislative action that the Comptroller General deems appropriate in the context of the assessment.

(c) REPORT.—Not later than January 1, 2012, the Comptroller General shall submit to the Chairmen and Ranking Members of the Committees on Armed Services of the Senate and the House of Representatives a report on the findings and recommendations, as appropriate, of the Comptroller General with respect to the assessment conducted under subsection (b).

(e) CONSTRUCTION.—Nothing in this section shall be interpreted to impede, encroach, or delay—

(1) any studies, reviews, or assessments of any actual or potential environmental exposures at any military installation, including the studies included in the Agency for Toxic Substances and Disease Registry’s Annual Plan of Work regarding the water contamination at Camp Lejeune, North Carolina;

(2) the Agency for Toxic Substances and Disease Registry’s statutory obligations, including its obligations under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.) regarding Superfund sites; or

(3) the remediation of any environmental contamination or hazard at any military installation.

SEC. 2855. SENSE OF CONGRESS ON PROPOSED EXTENSION OF THE ALASKA RAILROAD CORRIDOR ACROSS FEDERAL LAND IN ALASKA.

(a) **FINDING.**—Congress finds that the Alaska Railroad proposes the extension of its railroad corridor over approximately 950 acres of land located south and east of North Pole, Alaska, including lands located near or adjacent to the Chena River spillway, Eielson Air Force Base, Tanana Flats Training Area (Fort Wainwright), Donnelly Training Area (Fort Wainwright), and Fort Greely.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that the Department of the Army and the Department of the Air Force should explore means of accommodating the railroad corridor expansion referred to in subsection (a) using existing authorities that will not adversely impact military missions, operations, and training.

SEC. 2856. SENSE OF CONGRESS ON IMPROVING MILITARY HOUSING FOR MEMBERS OF THE AIR FORCE.

(a) **FINDING.**—Congress makes the following findings:

(1) In the mid-1990s, the Department of Defense became concerned that inadequate and poor quality housing for members of the Armed Forces was adversely affecting the quality of life for members and their families and adversely affecting military readiness by contributing to decisions by members to leave the Armed Forces.

(2) At that time, the Department of Defense designated about 180,000 houses, or nearly two-thirds of its domestic family housing inventory, as inadequate and needing repair or complete replacement.

(3) The Department of Defense believed that it would need about \$20,000,000,000 in appropriated funds and would take up to 40 years to eliminate poor quality military housing through new construction or renovation using its traditional military construction approach.

(4) In 1996, Congress enacted the Military Housing Privatization Initiative to provide the Department of Defense with a variety of authorities to obtain private sector financing and management for the repair, renovation, construction, and management of military family housing.

(5) The Air Force has used the Military Housing Privatization Initiative to award 27 projects at 44 military bases to improve over 37,000 homes.

(6) The Air Force has received \$7,100,000,000 in total development investment from the private sector for new housing

with a taxpayer contribution of approximately \$425,000,000, representing a 15 to 1 leveraging of taxpayer dollars.

(7) The Air Force, like the other military services, has been able to leverage varying conditions of housing at military bases into fiscally viable projects by packaging housing inventories at multiple bases into a single transaction.

(8) Congress has approved transactions involving the packaging of multiple bases as a critical tool to maximize the efficient use of taxpayer funds.

(9) Congress supports the goal of the Air Force to complete transactions for the repair, renovation, construction, and management of 100 percent of their military family housing inventory in the United States by December 31, 2012.

(10) The Air Force currently has 6 project solicitations prepared for open competition at 22 Air Force installations to improve over 15,000 homes.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Secretary of the Air Force should use existing authority to carry out solicitations for the 6 military housing projects involving the packaging of 22 bases consistent with the goal of improving 15,000 homes for Air Force personnel and their families by December 31, 2012.

SEC. 2857. SENSE OF CONGRESS REGARDING RECREATIONAL HUNTING AND FISHING ON MILITARY INSTALLATIONS.

It is the sense of the Congress that—

(1) military installations that permit public access for recreational hunting and fishing should continue to permit such hunting and fishing where appropriate;

(2) permitting the public to access military installations for recreational hunting and fishing benefits local communities by conserving and promoting the outdoors and establishing positive relations between the civilian and defense sectors;

(3) any military installations that make recreational hunting and fishing permits available for purchase should provide a discounted rate for active and retired members of the Armed Forces and veterans with disabilities; and

(4) the Department of Defense, all of the service branches, and military installations that permit public access for recreational hunting and fishing should promote access to such installations by making the appropriate accommodations for members of the Armed Forces and veterans with disabilities.

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

TITLE I—PROCUREMENT

Subtitle A—Authorization of Appropriations

Authorization of appropriations (secs. 101–104)

The House bill contained provisions (secs. 101–104) that would authorize appropriations for procurement for the Army, the Navy and the Marine Corps, the Air Force, and for defense-wide activities.

The Senate committee-reported bill authorized appropriations for these activities in one provision (sec. 101).

The agreement includes the House provisions with amendments to reflect the agreed authorization levels.

Subtitle B—Navy Programs

Multiyear funding for detail design and construction of LHA Replacement ship designated LHA–7 (sec. 111)

The Senate committee-reported bill contained a provision (sec. 121) that would authorize the Navy to execute the contract for LHA–7 over fiscal years 2011 and 2012, subject to the availability of appropriations for that purpose in budgets after 2011.

The House bill contained a provision (sec. 121) that would provide more general authority for the Navy to incrementally fund large naval vessels.

The agreement includes the Senate committee-reported provision.

Requirement to maintain Navy airborne signals intelligence, surveillance, and reconnaissance capabilities (sec. 112)

The Senate committee-reported bill contained a provision (sec. 122) that would prohibit the retirement of the EP–3E Airborne Reconnaissance Integrated Electronic System (ARIES)II fleet or the Special Projects Aircraft (SPA) until the Navy has readied replacements that are equivalent or better in terms of meeting the requirements of the combatant commanders. The provision also would require that the Navy upgrade both aircraft systems as necessary to meet combatant command requirements.

The report accompanying the Senate committee-reported bill (S. Rept. 111–201) also expressed concern about the Navy's plan to cease operations of its Reaper unmanned aerial systems (UAS), developed under the Saber Focus program, and to transfer the aircraft to the Air Force early in calendar year 2011. These concerns have been amplified by continuing shortages of persistent intelligence, surveillance, and reconnaissance assets, especially in critical regions such as the Horn of Africa.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would prohibit the retirement of the EP–3E and SPA fleets until the commencement of the fielding of a platform or mix of platforms and sensors that are, in the aggregate, equivalent or superior to the EP–3 ARIES II (Spiral 3) or the SPA (P909) platform. The amendment also would prohibit the Secretary of the

Navy from halting the operations of the Saber Focus UAS and associated ground-based capabilities and transferring the assets to the Air Force until 30 days after the Secretary of the Air Force certifies to the congressional defense committees that the Air Force is providing an equal or superior capability and capacity to the same area of operations.

Report on naval force structure and missile defense (sec. 113)

The House bill contained a provision (sec. 123) that would require the Secretary of the Navy to submit a report on naval force structure requirements related to ballistic missile defense.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Reports on service-life extension of F/A-18 aircraft by the Department of the Navy (sec. 114)

The Senate committee-reported bill contained a provision (sec. 123) that would require the Secretary of the Navy to conduct a business case analysis of two options: (1) conducting a service-life extension program (SLEP) for legacy F/A-18 aircraft beyond 8,600 hours; and (2) buying new F/A-18E/F aircraft. The provision also would specify the elements of that analysis. The Secretary would be required to complete that analysis and submit it to the congressional defense committees before he could begin such a SLEP effort.

The House bill contained no similar provision.

The agreement includes the Senate committee-reported provision with an amendment that would require that the Secretary conduct a cost-benefit analysis of the two options.

Subtitle C—Joint and Multiservice Matters

Limitations on biometric systems funds (sec. 121)

The House bill contained a provision (sec. 142) that would limit the amount of funds obligated or expended for biometrics programs and operations subject to the submission of a report. In addition, there was a specific limitation on obligations or expenditures of funds unless such obligations or expenditures were approved in writing by the Under Secretary of Defense for Acquisition, Technology, and Logistics (or designee).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would eliminate the specific limitation clause.

System management plan and matrix for the F-35 Joint Strike Fighter aircraft program (sec. 122)

The Senate committee-reported bill contained a provision (sec. 141) that would require that the Secretary of Defense establish a system management plan and matrix for the F-35 Joint Strike Fighter program that would be used to measure progress in gain-

ing maturity for the system during the remainder of the system development and demonstration (SDD) program.

The provision would look prospectively to measure progress during the remainder of the SDD program and should provide criteria and conditions for comparing documented results to expected progressive levels of demonstrated weapon system maturity in relationship to planned increases in future procurement quantities.

The House bill contained no similar provision.

The agreement includes the Senate committee-reported provision.

Quarterly reports on use of Combat Mission Requirements funds (sec. 123)

The Senate committee-reported bill contained a provision (sec. 143) that would require the Commander of the U.S. Special Operations Command (USSOCOM) to report to the congressional defense committees quarterly on the use of Combat Mission Requirements funding. The quarterly reports would address: (1) the balance of the Combat Mission Requirements account at the beginning of the quarter; (2) the balance of the Combat Mission Requirements account at the end of the quarter; (3) any transfer of funding into or out of the Combat Mission Requirements account during the quarter (including the source of any transfer into the fund, and the objective of any transfer out of the fund); (4) a description of any Combat Mission Requirements approved for procurement and/or procured during the quarter; and (5) the amount of funds committed to each requirement.

The House bill contained no similar provision.

The agreement includes the Senate provision with a technical amendment.

Counter-improvised explosive device initiatives database (sec. 124)

The House bill contained a provision (sec. 143) that would direct the Secretary of Defense to direct the military services and the Director of the Joint Improvised Explosive Device Defeat Organization (JIEDDO) to create a comprehensive improvised explosive device defeat initiative database and work with JIEDDO to develop a Department of Defense-wide database for all counter-improvised explosive device initiatives.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that strikes subsection (c) of the House provision.

In creating this database, the JIEDDO Director shall determine whether a classified or unclassified database is more appropriate.

Study on lightweight body armor solutions (sec. 125)

The House bill contained a provision (sec. 144) that would direct a study to identify and examine the requirements for lighter weight body armor systems.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Integration of solid state laser systems into certain aircraft (sec. 126)

The Senate committee-reported bill contained a provision (sec. 144) that would require the Department of Defense to conduct an analysis of the feasibility of integrating solid state laser systems into certain aircraft platforms.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Contracts for commercial imaging satellite capacities (sec. 127)

The Senate committee-reported bill contained a provision (sec. 142) that would require the Department of Defense (DOD) to procure or acquire the capacity of imaging satellites with 1.5 meter telescopes after December 31, 2010, if DOD seeks to sustain an augmentation of national overhead imagery capabilities with commercial-class electro-optical capability.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would provide the Secretary of Defense with the authority to waive the requirements of the provision if the Secretary determines that it is not in the national security interest to acquire or procure this capability.

Commercial imagery satellites are becoming a key part of the overhead imagery architecture.

LEGISLATIVE PROVISIONS NOT ADOPTED

Report on Army battlefield network plans and programs

The House bill contained a provision (sec. 112) that would require a report and limit the obligation of procurement funds for the Army's future tactical network technology and the acquisition programs to achieve this network.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

The committees on Armed Services of the Senate and the House of Representatives recognize the Army's recent efforts to adjust its tactical network plans through capability portfolio reviews, and is encouraged by the move toward a more flexible approach to communications equipment that can keep pace with private sector innovation. However, the committees remain concerned that the Army plans to continue to invest in the Network Integration Kit (NIK) for vehicles that originated in the Future Combat Systems (FCS) program. These concerns stem from the apparent contradiction between the Army's new focus on affordable and flexible network equipment and the high cost, poor reliability, and poor performance of NIK systems to date.

Specifically, the committees note that the NIK has yet to demonstrate desired performance levels in testing, has very large power, space, and cooling requirements, and is projected to cost \$450,000 each. When combined with the cost of the required Joint Tactical Radio System Ground Mobile Radio the per-vehicle cost of the NIK increases to \$970,000—a level that may be unaffordable to procure and deploy on the scale desired. In addition, the commit-

tees note that this particular combination of computer hardware and software has never been integrated successfully into an Abrams tank or Bradley Fighting Vehicle, significantly limiting the NIK's potential utility in Heavy Brigade Combat Teams. Further, the committees are concerned that the NIK is dependent upon continued development of the System of Systems Common Operating Environment (SOSCOE) and associated applications. The committees note that, despite seven years of development and billions of dollars invested by the Army through the FCS and Early Infantry Brigade Combat Team programs, that the Army has yet to deploy a single element of SOSCOE-based software for combat operations.

The committees urge the Army to continue its communications and network capability portfolio review and reevaluate its requirements for vehicle-based network equipment. For example, the committees note that the Army has already procured and fielded more than 88,000 Force XXI Battle Command Brigade and Below vehicle network systems, and could pursue upgrades to those systems as a lower-cost alternative to continued investment in the NIK. The Army should also conduct a comprehensive market survey to identify technologically mature and affordable alternatives to continued NIK and SOSCOE development, and compare these alternatives to moving forward with NIK and SOSCOE. Should any identified alternatives show the potential to provide a lower-cost, lower-risk path to achieving the desired capability, the Army should then conduct an open competition for a new or upgraded system for pushing network capability down to lower tactical level platforms.

Limitation on the use of funds for line-haul tractors

The House bill contained a provision (sec. 113) that would modify the Army's current acquisition and investment strategy for the M915 line-haul tractor trailer program. The provision would prohibit the Army from obligating funds for the continued procurement of M915 line-haul tractor trailers unless the source selection is based on a new, full and open competition.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

The conferees are aware the Secretary of the Army opposes this provision and that the Army is nearing completion of its acquisition objective required for the M915 line haul tractor trailer program. The conferees would encourage the Secretary of the Army, should the M915 requirement increase, to consider a full and open competition for any new, future procurement. The conferees understand the Army Reserve have significant unfunded requirements for their M915 truck fleet and the conferees would encourage the Secretary of the Army to develop courses of action that could help to accelerate meeting those requirements in a timely manner.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Subtitle A—Authorization of Appropriations

Authorization of appropriations (sec. 201)

The House bill contained a provision (sec. 201) that would authorize appropriations for fiscal year 2011 for the use of the Department of Defense for research, development, test, and evaluation.

The Senate committee-reported bill contained a similar provision (sec. 201).

The agreement includes the House provision with an amendment to reflect the agreed authorization level.

Subtitle B—Program Requirements, Restrictions, and Limitations

Enhancement of Department of Defense support of science, mathematics, and engineering education (sec. 211)

The Senate committee-reported bill contained a provision (sec. 213) that would provide the secretaries of the military departments and directors of defense laboratories certain authorities pertaining to educational activities in science, mathematics, and engineering.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Limitation on use of funds by Defense Advanced Research Projects Agency for operation of National Cyber Range (sec. 212)

The Senate committee-reported bill contained a provision (sec. 212) that would prohibit the use of funds for the National Cyber Range pending a report, as well as place certain limitations on the use of funds after the submission of this report.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

Separate program elements required for research and development of Joint Light Tactical Vehicle (sec. 213)

The House bill contained a provision (sec. 214) that would require separate program elements in the Army and Navy research, development, test, and evaluation accounts for the Joint Light Tactical Vehicle program.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Program for research, development, and deployment of advanced ground vehicles, ground vehicle systems, and components (sec. 214)

The Senate committee-reported bill contained a provision (sec. 214) that would permit the Department of Defense to carry out a program for research and development on, and deployment of, advanced technology ground vehicles, ground vehicle systems, and components.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that removed explicit reference to the Defense Production Act (Public Law 81–774).

Demonstration and pilot projects on cybersecurity (sec. 215)

The Senate committee-reported bill contained a provision (sec. 215) that would require the Secretary of Defense to conduct demonstration and pilot projects on cybersecurity. The purpose of these projects would be to evaluate commercial solutions, business processes, and policy options to enhance cybersecurity within the Department of Defense (DOD), the defense industrial base, the government as a whole, and the Nation’s critical infrastructure.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would provide more latitude to DOD in choosing what projects to pursue and how to implement them, including by encouraging the Department to pursue pilots on supply chain security and cloud computing security, and to involve the military services in the program.

SUBTITLE C—MISSILE DEFENSE PROGRAMS

Sense of Congress on ballistic missile defense (sec. 221)

The Senate committee-reported bill contained a provision (sec. 231) that would express the sense of Congress on ballistic missile defense issues, particularly related to the Phased Adaptive Approach to missile defense in Europe.

The House bill contained a related provision (sec. 1236).

The agreement includes the Senate provision with a clarifying amendment.

Repeal of prohibition of certain contracts by Missile Defense Agency with foreign entities (sec. 222)

The House bill contained a provision (sec. 222) that would repeal section 222 of the National Defense Authorization Act for Fiscal Years 1988 and 1989 (Public Law 100–180).

The Senate committee-reported bill included an identical provision.

The agreement includes the provision.

Limitation on availability of funds for missile defense interceptors in Europe (sec. 223)

The House bill contained a provision (sec. 221) that would limit the availability of funds for construction and deployment of a missile defense system in Europe until any host nation approves the required basing and deployment agreements, and 45 days have elapsed after Congress receives an independent assessment required by section 235(c)(2) of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84). The provision would also limit the availability of funds for the procurement or deployment of operational missile defense interceptors on land in Europe until the Secretary of Defense certifies that such interceptor has demonstrated a high probability of working in an operationally effective manner.

The Senate committee-reported bill contained no similar provision.

The agreement contains the House provision, with an amendment that would clarify that the provision applies to land-based interceptors as part of the Phased Adaptive Approach to missile defense in Europe. It would also provide the Secretary of Defense with a national security waiver authority of the limitations. Finally, the provision would clarify a number of activities permitted under the provision in relation to the planned deployment of land-based interceptors in Europe as part of the Phased Adaptive Approach to missile defense in Europe.

The provision is not intended to impede or delay the successful implementation of the Phased Adaptive Approach to missile defense in Europe, which is important for protection against existing and potential future Iranian missile threats. Nor is it intended to limit the production of missile defense interceptors for ground- and flight-testing, or production process validation.

Medium Extended Air Defense System (sec. 224)

The Senate committee-reported bill contained a provision (sec. 233) that would limit the availability of any fiscal year 2011 funds for the Medium Extended Air Defense System (MEADS) until certain conditions had been met, including a decision by the Secretary of Defense on whether to proceed with MEADS, and a report to the congressional defense committees concerning MEADS.

The House bill contained no similar provision.

The agreement includes a provision that would limit the availability of more than 25 percent of fiscal year 2011 funds for the MEADS program until the Secretary informs the congressional defense committees of a decision to proceed with the MEADS program. The provision would also limit more than 50 percent of fiscal year 2011 funds for the MEADS program until 30 days after the Secretary submits a report on MEADS to the congressional defense committees.

Given the significant cost increases and schedule delays in the MEADS development program, there is considerable uncertainty in the future of the program. It would not be prudent to spend fiscal year 2011 funds on the program unless the Department of Defense decides to proceed with the program in a fiscally sound manner in agreement with our allies. The provision is included without prejudice to the MEADS program.

Acquisition accountability reports on the ballistic missile defense system (sec. 225)

The Senate committee-reported bill contained a provision (sec. 234) that would require the Missile Defense Agency to establish, maintain, and report on acquisition baselines for each program element of the ballistic missile defense system.

The House bill contained no similar provision.

The agreement contains the Senate provision.

Authority to support ballistic missile shared early warning with the Czech Republic (sec. 226)

In May of 2010, after the President had submitted the budget request for fiscal year 2011, the Department of Defense requested the authority to carry out a shared ballistic missile early warning program with the Czech Republic.

Since the request came to Congress late, neither the House bill nor the Senate committee-reported bill contained a provision authorizing such a program.

The agreement includes a provision authorizing such a shared early warning program with the Czech Republic.

Report on Phased, Adaptive Approach to missile defense in Europe (sec. 227)

The House bill contained a provision (sec. 223) that would require a report on the Phased Adaptive Approach to Missile Defense in Europe.

The Senate committee-reported bill contained no similar provision.

The agreement contains the House provision with a clarifying amendment.

Independent review and assessment of the Ground-based Midcourse Defense system (sec. 228)

The House bill contained a provision (sec. 225) that would require an independent assessment of the plans of the Department of Defense for defending the United States homeland against ballistic missiles, and a report on the results of that assessment.

The Senate committee-reported bill contained a similar provision (sec. 235).

The agreement contains the Senate provision with a clarifying amendment.

Iron Dome short-range rocket defense system (sec. 229)

The House bill contained a provision (sec. 1507) that would authorize the Secretary of Defense to provide \$205.0 million from the Overseas Contingency Operations procurement account to the Government of Israel for the Iron Dome short-range rocket defense system.

The Senate committee-reported bill authorized the same amount of funding for Iron Dome in its research, development, test and evaluation (RDT&E) funding tables.

The agreement includes a provision that would authorize \$205.0 million of Defense-wide RDT&E funds for Iron Dome.

Subtitle D—Reports

Report on analysis of alternatives and program requirements for the Ground Combat Vehicle program (sec. 231)

The House bill contained a provision (sec. 231) that would limit the obligation of research and development funding for the Army Ground Combat Vehicle program until certain program documentation is provided to the congressional defense committees.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Cost benefit analysis of future tank-fired munitions (sec. 232)

The House bill contained a provision (sec. 232) that would require a cost benefit analysis of future options for developing tank-fired munitions.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a technical amendment.

Annual Comptroller General report on the VH-(XX) presidential helicopter acquisition program (sec. 233)

The House bill contained a provision (sec. 233) that would require the Comptroller General to produce an annual report on the VH-(XX) presidential helicopter acquisition program during the time that the Department expects to continue development, ending with a report in 2018.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision, amended to have the reporting requirement expire after the fiscal year 2013 report.

Subtitle E—Other Matters

Sense of Congress affirming the importance of Department of Defense participation in development of next generation semiconductor technologies (sec. 241)

The House bill contained a sense of Congress (sec. 245) that the Department of Defense (DOD) should establish research and development facilities and a public-private partnership focused on extreme ultraviolet lithography technologies for the next-generation of semiconductors.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that removes references to facilities and any specific public-private partnerships and generalizes the focus of semiconductor manufacturing technology development beyond extreme ultraviolet lithography technologies. This agreement recognizes the importance of pursuing a range of techniques to develop next-generation advanced semiconductors, without prematurely narrowing down on any specific technological approaches before they are sufficiently proven to meet DOD mission needs.

Pilot program on collaborative energy security (sec. 242)

The House bill contained a provision (sec. 243) that would establish a pilot program on collaborative energy security between the Departments of Energy and Defense.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Pilot program to include technology protection features during research and development of defense systems (sec. 243)

The House bill contained a provision (sec. 242) that would direct the Secretary of Defense to develop and incorporate technology protection features in designated systems during the research and development phase of such systems.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

LEGISLATIVE PROVISION NOT ADOPTED

Joint assessment of the joint effects targeting system

The House bill contained a provision (sec. 234) that would require an assessment and report on the joint effects targeting system.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

The committees remain concerned about the future of the joint effects targeting system, and direct the Secretary of the Army to provide a briefing to the Committees on Armed Services of the Senate and the House of Representatives on the current status and future plans for the joint effects targeting system not later than March 15, 2011. The briefing shall include detailed information on funding and schedule for the joint effects targeting system.

TITLE III—OPERATION AND MAINTENANCE

Subtitle A—Authorization of Appropriations

Authorization of appropriations (sec. 301)

The House bill contained a provision (sec. 301) that would authorize appropriations for fiscal year 2011 for the use of the Department of Defense for operation and maintenance.

The Senate committee-reported bill contained a similar provision (sec. 301).

The agreement includes the House provision with an amendment to reflect the agreed authorization level.

Subtitle B—Energy and Environmental Provisions

Reimbursement of Environmental Protection Agency for certain costs in connection with the Twin Cities Army Ammunition Plant, Minnesota (sec. 311)

The Senate committee-reported bill contained a provision (sec. 311) that would authorize the Secretary of Defense to transfer not more than \$5,620,000 to the Environmental Protection Agency (EPA) to reimburse EPA for costs incurred relating to response actions performed at the Twin Cities Army Ammunition Plant, Minnesota.

The House bill contained a similar provision (sec. 311).

The agreement includes the Senate committee-reported provision with a clarifying amendment that reflects the amount as \$5,611,671.

Payment to Environmental Protection Agency of stipulated penalties in connection with Naval Air Station, Brunswick, Maine (sec. 312)

The House bill contained a provision (sec. 312) that would authorize the Secretary of Defense to transfer to the Environmental Protection Agency not more than \$153,000 to satisfy a stipulated penalty assessed by EPA against Naval Air Station, Brunswick.

The Senate committee-reported bill contained a similar provision (sec. 312).

The agreement includes the House provision.

Requirements related to the investigation of exposure to drinking water contamination at Camp Lejeune, North Carolina (sec. 313)

The House bill contained a provision (sec. 316) that would require the Secretary of Defense to provide information and expertise to the Agency for Toxic Substances and Disease Registry (ATSDR) relating to contaminated drinking water at Camp Lejeune in North Carolina.

The Senate committee-reported bill contained a similar provision (sec. 313) that would also limit the use of certain funds and provide for the resolution of certain disputes.

The agreement includes the House provision with several clarifying amendments and a provision limiting the use of certain funds subject to notification.

The Department of the Navy and ATSDR have been working on the issue of water contamination at Camp Lejeune for many years and various studies are still to be completed. The recently established Camp Lejeune Data Mining Technical Working Group is a positive development in the collaboration between the two agencies. Nonetheless, the cooperation has not always been as productive as it should have been. Service members and civilians who lived at Camp Lejeune and may have been exposed to contaminated water deserve to have the Navy and ATSDR work together cooperatively and collaboratively to ensure that the remaining studies and analyses are completed as comprehensively and expeditiously as possible.

The committees note that a number of relevant studies of Camp Lejeune water contamination and the possible health effects are still underway and could bear on the outcome of the claims filed with the Department of the Navy. It is the intention of the committees that no claims associated with water contamination at Camp Lejeune be fully and finally adjudicated until after these studies are fully completed. Nonetheless, the committees recognize that the Department of the Navy may need to take certain ministerial actions associated with administration of the claims, which would be necessary to properly manage the claims and to support the eventual final action, before these studies are complete. Therefore, this provision would allow the Navy to take certain administrative and non-dispositive actions on the claims but only after the Committees

on Armed Services for the Senate and the House of Representatives are notified.

Comptroller General assessment on military environmental exposures (sec. 314)

The Senate committee-reported bill contained a provision (sec. 314) that would establish a commission on military environmental exposures that would, among other things, make recommendations for how the Federal Government should respond to the issue of exposures of current and former members of the armed forces and their dependents to environmental hazards on military installations.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would drop the requirement for a commission and, instead, require the Comptroller General to assess various issues associated with environmental exposures on military installations, including impacts to current and former members of the armed forces, their dependents, and civilian employees, and to submit a report to the Committees on Armed Services of the Senate and the House of Representatives.

Subtitle C—Workplace and Depot Issues

Technical amendments to requirement for service contract inventory (sec. 321)

The House bill contained a provision (sec. 321) that would amend section 2330a of title 10, United States Code, to make technical changes to the requirement for a service contract inventory.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment clarifying that responsibility for the development of the guidance on certain types of information to be included in the inventory would reside with the Under Secretary of Defense (Personnel and Readiness), since the inventory is intended in part to facilitate the human capital planning efforts of the Department of Defense. The Under Secretary of Defense (Acquisition, Technology, and Logistics) would retain responsibility for developing guidance on other data elements and implementing procedures.

The amendment would further require that information on the number of contractor employees be collected using direct labor hours and associated cost data collected from contractors to the maximum extent practicable. Only where such direct data is not available and cannot reasonably be made available in a timely manner would the use of estimates based on contract expenditures be authorized.

Repeal of conditions on expansion of functions performed under prime vendor contracts for depot-level maintenance and repair (sec. 322)

The House bill contained a provision (sec. 322) that would repeal an obsolete provision requiring the Secretary of Defense to report to Congress before entering into a prime vendor contract for depot-

level maintenance and repair of a weapon system or other significant military equipment.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Prohibition on establishing goals or quotas for conversion of functions to performance by Department of Defense civilian employees (sec. 323)

The House bill contained a provision (sec. 325) that would prohibit the Secretary of Defense from establishing goals or quotas for the in-sourcing of functions currently performed in the private sector, unless such goals or quotas are based on considered research and analysis.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

We are aware of instances in which budget-driven quotas appear to have led to decisions that were not in the best interest of the Department of Defense and risk jeopardizing the workforce, potentially displacing highly-qualified and long-serving personnel.

We believe that the Department's hiring efforts should focus on the acquisition workforce and other critical capabilities needed by the Department. At a time when the Department desperately needs to rebuild its in-house capabilities in critical mission areas, the effort and expense required to hire new civilian employees to replace contractor employees should not be wasted on the conversion of routine commercial functions that can readily be performed by contractors.

Subtitle D—Reports

Additional reporting requirements relating to corrosion prevention projects and activities (sec. 331)

The House bill contained a provision (sec. 332) that would add corrosion reporting requirements and increase oversight with respect to the efforts of corrosion control and prevention within the services.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Modification and repeal of certain reporting requirements (sec. 332)

The House bill contained a provision (sec. 333) that would modify or repeal certain reporting requirements in sections 323 and 349 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364) and section 355 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181).

The Senate committee-reported bill contained two similar provisions (sec. 346 and sec. 347) that would amend section 323 and repeal section 349 respectively of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364).

The agreement includes a provision that would combine language from the House and the Senate provisions.

Report on Air Sovereignty Alert mission (sec. 333)

The House bill contained a provision (sec. 334) that would require the Commander of the United States Northern Command and the North American Aerospace Defense Command to submit a report on the Air Sovereignty Alert mission. The provision would also provide the opportunity for the Director of the National Guard Bureau to review and provide independent analysis and comments on this report.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision similar to the House provision, but the agreement would require the Director of the National Guard Bureau to review and provide independent analysis and comments on this report, rather than leaving that to the discretion of the Director of the National Guard Bureau.

Report on the SEAD/DEAD mission requirement for the Air Force (sec. 334)

The agreement includes the House provision, amended to incorporate a requirement that the secretary of a military department determine whether the government has received consideration for landing fees in a lease, license, or other real estate agreement. The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Requirements for transferring aircraft within the Air Force inventory (sec. 345)

The House bill contained a provision (sec. 346) that would have prevented the Secretary of the Air Force from retiring any C-130 aircraft until 30 days after the Secretary submitted a report on the

specific terms and conditions and personnel effects of any aircraft transfers between the active Air Force and the Air National Guard.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision similar to the House provision, but that provision would require prospectively such a report from the Secretary before taking action on future proposed transfers of aircraft between the active Air Force and the reserve components.

Out of the revenue generated through the program, installation commanders were authorized to transfer up to 50 percent to the Morale, Welfare, and Recreation (MWR) fund for the benefit of soldiers and their families. Recognizing that removing the brass cartridges from the program may have an unintended consequence on the MWR program, we direct the Secretary of Defense to determine the impact on the MWR program and to take into account such impact when issuing guidance to implement this provision.

The Senate committee-reported bill contained a provision (sec. 321) that would direct the Defense Logistics Agency to report to Congress on the status of Reset and Retrograde for the equipment from Iraq and Afghanistan.

The House bill contained no similar provision.

The Senate agreement does not include this provision.

Not later than 90 days after the date of the enactment of this Act, the Director of the Defense Logistics Agency shall brief the Committees on Armed Services of the Senate and the House of Representatives to include: an estimate of the current and projected scope of work to repair and resupply materiel to the military services, including projected costs and lists of major end items needed to meet Department of Defense readiness requirements; the current and projected timeline for the completion of reset of Operations Iraqi Freedom and New Dawn equipment up to and beyond December 31, 2011; the percentage and level of expected reset to take place in the United States and the percentage and level of expected reset overseas; a comprehensive assessment of parts management including backlogs and plans to reduce and minimize backlogs in parts availability; and a description of Department-wide efforts to find and implement more efficient parts supply, repair, and manufacturing solutions that will provide capacity and flexibility.

Pilot program on best value for contracts for private security functions

The House bill contained a provision (sec. 323) that would require the Secretary of Defense to establish a pilot program for the use of a “best value” approach in the award of contracts for private security functions in the Republic of Iraq and the Islamic Republic of Afghanistan.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

Part 15 of the Federal Acquisition Regulation already authorizes the use of “best value” contracting in the acquisition of products and services, including private security functions. We expect the Department of Defense to exercise this authority in the acquisition of private security functions in Iraq and Afghanistan, in a manner that is consistent with the requirements of conditions on the ground in theaters of military operations. As the Commission on Wartime Contracting stated in an October 2009 report, “a best value evaluation in a contingency environment, such as Iraq and Afghanistan, would give due weight to the needs of operational commanders.”

The results of the comprehensive depot study due to the Committees on Armed Services of the Senate and House of Representatives in December 2010 is expected to suggest many recommendations and potential legislative solutions to the full spectrum of policy issues related to Department of Defense manufacturing and maintenance operations. As such, the Committees on Armed Services of the Senate and House of Representatives defer action until fiscal year 2011.

Report on use of domestically-produced alternative fuels or technologies by vehicles of the Department of Defense

The House bill contained no similar provision.

The agreement does not include this provision.

The Committees on Armed Services of the Senate and House of Representatives note that while the Department of Defense is making advances in alternative fuels for vehicles and hybrid electric technologies, concerns remain that a strategic-level plan and coordinated approach are lacking and proliferation of technology is not as robust across the fleet as it could be. Not later than 45 days after the date of the enactment of this Act, the Under Secretary of Defense for Acquisition, Technology, and Logistics jointly with the Director of the Defense Logistics Agency, shall brief the Committees on Armed Services of the Senate and House of Representatives regarding the status of: use and potential use of domestically-produced alternative fuels including but not limited to, natural gas-based fuels and biodiesel, in DOD vehicles; current and projected actions by the DOD to increase the use of alternative fuels in vehicles; a description and assessment of current and anticipated commercial availability and demand for alternative fuels including cost; a description of the infrastructure and associated costs required to store and distribute alternative fuels on military installations in the United States that could be adapted for use by alternative fuels; a list and status of the current tactical, non-tactical, and combat vehicle programs that are pursuing either hybrid or electric technologies, or advances to accept alternative fuels; a list of research and development programs and funding investments for operational energy; and any recommendations for legislative or administrative action to ensure that the DOD meets goals for the use of alternative fuels and vehicles.

The Senate committee-reported bill contained a similar provision (sec. 503) that did not authorize administrative removal from a promotion list of an officer found to have been erroneously included in a zone of consideration. We believe that higher authority outside the service concerned must give careful scrutiny to the circumstances surrounding erroneous inclusion of an officer's name on a list of officers recommended for promotion by a selection board and determine that removal from the promotion list is justified.

The agreement does not include this provision.

The Department of Defense's current policy is to pay hostile fire and imminent danger pay at the maximum statutory rate to all service members in a specified area. The Department determines in regulation which areas qualify. We are sensitive to the fact that some service members serve under much more difficult and dangerous circumstances than others, and that not all areas which qualify for hostile fire or imminent danger pay are equal. Service in certain areas of Iraq or Afghanistan, for instance, is qualitatively different from service in Qatar or Saudi Arabia.

Under its current implementation timeline, the Department is scheduled to implement section 351 of title 37, United States Code, in 2013. Section 351, enacted in 2008 as part of the consolidation of special and incentive pay authorities, authorizes hostile fire pay at the increased maximum rate of \$450 per month. We urge the Department to accelerate implementation of sections 351(b) (1) and (3) to 2011, and to consider implementing them in a tiered manner that recognizes the increased daily stress and exposure to danger experienced by those service members most engaged in the fight.

The House bill contained a provision (sec. 838) that would require entities with facility clearances that are not subject to foreign ownership control or influence (FOCI) mitigation to establish government security committees to ensure compliance with the requirements of the national industrial security program.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment requiring the Secretary of Defense to develop a plan to ensure compliance with the national industrial security program by entities with facility clearances that are not subject to FOCI mitigation. In developing the plan, the Secretary would be required to consider whether or not such entities, or any category of such entities, should be required to establish government security committees.

Procurement of photovoltaic devices (sec. 846)

The House bill contained a provision (sec. 846) that would require each Department of Defense contract for the procurement of photovoltaic devices—including energy savings performance contracts, utility service contracts, land leases, and private housing contracts—to include a provision requiring compliance with the Buy American Act (41 U.S.C. 10a et seq.).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the inclusion of the clause in contracts only if those contracts will result in the ownership of photovoltaic devices by the Department of Defense. The provision would also clarify that exceptions applicable to Buy American requirements would apply to such contracts.

Non-availability exception from Buy American requirements for procurement of hand or measuring tools (sec. 847)

The Senate committee-reported bill contained a provision (sec. 852) that would amend section 2533a of title 10, United States Code (known as the "Berry amendment"), to clarify that the non-availability exception in that section applies to hand and measuring tools.

The House bill contained no similar provision.

The agreement includes the provision.

Contractor logistics support of contingency operations (sec. 848)

The Senate committee-reported bill contained a provision (sec. 857) that would require the Defense Science Board (DSB) to conduct a comprehensive review of issues arising in contractor logistics support of contingency operations. The provision would also require that the Quadrennial Defense Review (QDR) and other military planning documents address the expected roles and responsibilities of contractors in military operations.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment requiring the DSB to conduct a comprehensive review of the full range of issues arising in contractor logistics support of contingency operations, including the extent to which the QDR and other military planning documents should address the roles and responsibilities of contractors.

Subtitle F—Improve Acquisition Act

Short title (sec. 860)

The House bill contained a provision (sec. 100A of division D) that would provide the short title for the acquisition improvement bill incorporated into the House bill.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

PART I—DEFENSE ACQUISITION SYSTEM

Improvements to the management of the defense acquisition system (sec. 861)

The House bill contained a provision (sec. 101 of division D) that would: (1) codify certain requirements for the defense acquisition system; (2) require periodic performance assessments for elements of the defense acquisition system; and (3) codify the acquisition-related functions of the chiefs of staff of the armed forces.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would: (1) codify a definition of the defense acquisition system and the responsibility of the Under Secretary of Defense for Acquisition, Technology, and Logistics and the service acquisition executives for the management of the defense acquisition system; (2) codify the acquisition-related functions of the chiefs of staff of the armed forces; and (3) require periodic performance assessments for elements of the defense acquisition system.

Comptroller General report on Joint Capabilities Integration and Development System (sec. 862)

The House bill contained three provisions addressing requirements for major defense acquisition programs: a provision (sec. 825) that would require two reports on the Joint Capabilities Integration and Development System (JCIDS) of the Department of Defense; a provision (sec. 103 of division D) that would require certain

changes to JCIDS; and a provision (sec. 105 of division D) that would require the establishment of a joint evaluation task force for each joint military requirement involving a materiel solution.

The Senate committee-reported bill contained no similar provision.

The agreement includes a single provision that would require a report by the Government Accountability Office addressing the issues raised by section 825. The report would also address the feasibility and advisability of the changes to JCIDS as contemplated by section 103 and the establishment of joint evaluation task forces as contemplated by section 105.

Requirements for the acquisition of services (sec. 863)

The House bill contained a provision (sec. 104 of division D) that would require the Secretary of Defense to ensure that each military department establishes a process for establishing requirements for the acquisition of contract services.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision, with an amendment to distinguish between the processes applicable to contract services in support of combatant commands and military operations, and other categories of contract services.

Review of defense acquisition guidance (sec. 864)

The House bill contained a provision (sec. 106 of division D) that would require the Secretary of Defense to review the acquisition guidance of the Department of Defense.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a technical amendment.

Requirement to review references to services acquisition throughout the Federal Acquisition Regulation and the Defense Federal Acquisition Regulation Supplement (sec. 865)

The House bill contained a provision (sec. 107 of Division D) that would require that the Federal Acquisition Regulation (FAR) be revised to incorporate appropriate references to services acquisition.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision, with an amendment that would require the Secretary of Defense, in coordination with the Administrator for Federal Procurement Policy and other appropriate agency heads, to review the FAR and the Defense Supplement to the FAR and make recommendations as to any changes that may be needed to ensure appropriate guidance for and references to services acquisition.

As highlighted in the report of the Committee on Armed Services of the House of Representatives' Panel on Defense Acquisition Reform, "services acquisitions require at least the same level of discipline as weapon systems acquisition. Such discipline is critical for planning, requirements definition, market research, price reasonableness determinations, and project management and oversight."

While the FAR now includes references to the term “services,” a review focused on services acquisition throughout the FAR would enhance and support the procurement and project management community in all aspects of the acquisition planning process.

Pilot program on acquisition of military purpose nondevelopmental items (sec. 866)

The House bill contained a provision (sec. 108 of division D) that would establish procedures for the procurement of military purpose nondevelopmental items.

The Senate committee-reported bill contained a provision (sec. 851) that would extend the demonstration project to 2017.

The agreement includes the House provision with a clarifying amendment.

Career development for civilian and military personnel in the acquisition workforce (sec. 873)

The House bill contained a provision (sec. 204 of division D) that would require the Secretary of Defense to ensure the development of career paths for military and civilian personnel in the acquisition workforce.

The Senate committee-reported bill contained no similar provision.

The agreement includes the provision with an amendment to streamline certain reporting requirements.

Recertification and training requirements (sec. 874)

The House bill contained a provision (sec. 205 of division D) that would require the Secretary of Defense to establish recertification and training requirements for the acquisition workforce.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision, with an amendment deleting the reference to training provided by private sector contractors.

In general, the Defense Acquisition University (DAU) is responsible for providing and monitoring training for the Department's acquisition workforce. DAU approves additional training providers based on review by the American Council on Education to ensure that the provider is capable of meeting DAU standards. We expect DAU to continue to use public and private resources to train the acquisition workforce, as appropriate.

Information technology acquisition workforce (sec. 875)

The House bill contained a provision (sec. 206 of division D) that would require the Secretary of Defense to develop and carry out a plan to strengthen the part of the acquisition workforce that specializes in information technology.

The Senate committee-reported bill contained no similar provision.

The agreement includes the provision.

PART III—FINANCIAL MANAGEMENT

Audit readiness of financial statements of the Department of Defense (sec. 881)

The House bill contained two provisions (sec. 301 and 302 of division D) that are designed to ensure that the Department of Defense achieves the objective of having financial statements that are validated as ready for audit by September 30, 2017, as required by section 1003 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84).

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would require the Under Secretary of Defense (Comptroller) to: (1) establish interim milestones for achieving audit readiness; and (2) review and report to Congress on options for providing incentives to the military departments, defense agencies, and defense field activities to achieve financial statements validated as ready for audit by September 30, 2017.

The Chief Financial Officers Act of 1990 (Public Law 101–576) required all federal agencies to achieve auditable financial statements. Twenty years later, the Department of Defense (DOD) remains one of the few federal agencies that has not yet achieved this objective. Indeed, not one of the major DOD components has yet achieved an auditable financial statement. Moreover, the DOD approach to business transformation, DOD business systems modernization, and DOD financial management all remain on the “high risk” list of at-risk programs compiled by the Government Accountability Office.

For these reasons, we conclude that the Department of Defense must give a higher priority to its business transformation and financial management objectives, and that concrete milestones are required to ensure that senior DOD officials can be held accountable for their efforts to reach these objectives.

Review of obligation and expenditure thresholds (sec. 882)

The House bill contained a provision (sec. 303 of division D) that would require two reviews of obligation and expenditure benchmarks used by the Department of Defense (DOD).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment requiring only one review and report.

We believe that DOD program managers should be encouraged to place a higher priority on seeking the best value for the Department and the taxpayer than on meeting arbitrary benchmarks for spending. The review and report required by this section is intended to ensure that obligation and expenditure benchmarks do not inadvertently prevent the Department from achieving the best value possible in the obligation and expenditure of funds.

Disclosure and traceability of the cost of Department of Defense health care contracts (sec. 883)

The House bill contained a provision (sec. 304 of division D) that would require each offeror on a Department of Defense health care contract to submit with its bid or proposal a disclosure of the additional cost contained in the bid or proposal as a result of health care reform legislation.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment to require a one-time study and report on added costs.

Expansion of the industrial base (sec. 891)

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment clarifying the requirement for price trend analysis and expanding the requirement to the full range of supplies and equipment purchased by the Department of Defense.

Contractor business systems (sec. 893)

The House bill contained a provision (sec. 404 of division D) that would address contract audits and business system reviews conducted by the Department of Defense. The House provision would also establish an independent Office of General Counsel within the Defense Contract Audit Agency (DCAA).

The Senate committee-reported bill contained a provision (sec. 841) that would require the Secretary of Defense to develop a program for the improvement of contractor business systems.

The agreement includes the Senate provision, with an amendment requiring the Secretary of Defense to ensure that appropriate legal resources are provided to DCAA in a manner that is consistent with DCAA's need to maintain audit independence. When DCAA faces a critical legal issue relating to the independence of its audit function, we believe it would be appropriate for DCAA to seek advice from the General Counsel to the Inspector General of the Department of Defense (DOD IG), and for the General Counsel to the DOD IG to provide such advice.

The Government Accountability Office recommended that DCAA take a risk-based approach to contract audits and reform its processes to focus on performing quality audits that meet generally accepted government accounting standards. We concur with these recommendations, note that the Department also concurred, and expect that the Department will continue with its implementation of these reforms.

Review and recommendations on eliminating barriers to contracting with the Department of Defense (sec. 894)

The House bill contained a provision (sec. 405 of division D) that would require the Secretary of Defense to establish a blue ribbon panel of business owners who are not traditional Department of Defense (DOD) contractors to make recommendations for eliminating barriers to contracting with the Department.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would require the DOD Director of Small Business Programs, after reaching out to a wide range of non-traditional contractors, to review and report on steps that could be taken to address such barriers.

Inclusion of providers of services and information technology in the national technology and industrial base (sec. 895)

The House bill contained a provision (sec. 406 of division D) that would amend section 2500 of title 10, United States Code, to include the providers of contract services and information technology in the definition of the national technology and industrial base.

The Senate committee-reported bill contained no similar provision.

The agreement includes the provision with a technical amendment.

Deputy Assistant Secretary of Defense for Manufacturing and Industrial Base Policy; Industrial Base Fund (sec. 896)

The House bill contained a provision (sec. 410 of division D) that would establish an Industrial Base Council and an Industrial Base Fund in the Department of Defense.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would establish statutory authorities for the Deputy Assistant Secretary of Defense for Manufacturing and Industrial Base Policy and provide for an Industrial Base Fund.

LEGISLATIVE PROVISIONS NOT ADOPTED

Clothing allowance requirement

The House bill contained a provision (sec. 501 of division D) that would require a review and evaluation of whether items purchased under section 418 of title 37, United States Code, should be considered subject to section 2533a of title 10, United States Code (popularly known as the "Berry Amendment").

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We understand that the Department of Defense changed its policy with regard to the purchase of footwear in recent years, to provide members of the armed forces with an increased clothing allowance, rather than purchasing footwear on their behalf. The Department is directed to report to the Committees on Armed Services of

the Senate and the House of Representatives by March 31, 2011 on the rationale for this change in policy.

Cost estimating internship and scholarship programs

The House bill contained a provision (sec. 209 of division D) that would require the Secretary of Defense to develop internship and scholarship programs in cost estimating.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

The Defense Acquisition Workforce Improvement Act (chapter 87, title 10, United States Code) already provides the Department of Defense with the authority to establish internship and scholarship programs for highly qualified individuals to prepare them for entry into the acquisition workforce. We urge the Department of Defense to take advantage of this authority to assist in the recruitment and training of the highly-qualified cost estimators that the Department needs. According to testimony provided to the House of Representatives Panel on Defense Acquisition Reform, sound cost estimating is essential to the acquisition process and should be considered a core acquisition function. The use of internship and scholarship programs in this area would benefit the acquisition process.

Debarment of BP and its subsidiaries

The House bill contained a provision (sec. 849) that would require the Secretary of Defense to determine whether BP or its subsidiaries should be debarred from contracting with the Department of Defense.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

Several reviews are currently under way to determine what went wrong and who was responsible for the catastrophic oil spill in the Gulf of Mexico earlier this year. It appears that actions and inactions by a number of entities may have contributed to the failures that led to the spill. To the extent that gross negligence or misconduct by any Department of Defense contractor is found to have played a significant role in the disaster, we expect the Department of Defense to review the matter and determine whether suspension, debarment, or any other contract action is required to protect the interests of the Department and the taxpayer.

Incentive programs for civilian and military personnel in the acquisition workforce

The House bill contained a provision (sec. 203 of division D) that would require the Secretary of Defense to develop an enhanced system of incentives to promote excellence in the acquisition workforce.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

Section 9902(a) of title 5, United States Code, as added by section 1113(d) of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84), created a Department of Defense

Civilian Workforce Incentive Fund and directed the Secretary of Defense to develop a new system of performance management and workforce incentives to connect pay, promotions, and awards to performance for the civilian workforce of the Department of Defense. We expect the Department of Defense to fully utilize this authority, and to give special consideration to high performing individuals within the acquisition workforce.

Penalties for not providing information to contractor databases on Iraq and Afghanistan

The House bill contained a provision (sec. 852) that would require the establishment of penalties for contractors who fail to comply with the requirement to provide information for databases on contractor personnel in Iraq and Afghanistan.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We recognize that the information in the contractor personnel database required by section 861 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) remains far from complete. We expect the Department of Defense to develop a plan of action, including appropriate penalties and incentives, to ensure contractor compliance with applicable data requirements.

Prohibition on contracts with entities engaging in commercial activity in the energy sector of Iran

The House bill contained a provision (sec. 805) that would prohibit the Secretary of Defense from entering into any contract with an entity that engages in commercial activity in the energy sector of the Islamic Republic of Iran.

The Senate committee-reported bill contained a similar provision (sec. 818) that would prohibit the Department of Defense from entering into any contract unless the person or entity certifies to the Secretary of Defense that the person or entity is not in violation of any sanctions laws related to the Islamic Republic of Iran.

Subsequent to the actions of the Committees on Armed Services of the Senate and the House of Representatives the Comprehensive Iran Sanctions and Divestment Act (CISADA, Public Law 111–195) was enacted. This law is a more comprehensive approach to the problems addressed in either the House or Senate-committee provisions. As a result, the goals of these two provisions have been achieved with the passage of the CISADA.

Sense of Congress regarding cost savings through reductions in waste, fraud, and abuse

The House bill contained a provision (sec. 841) that would express the sense of Congress that: (1) the Department of Defense could achieve significant cost savings through reductions in waste, fraud, and abuse, particularly with regard to contracting processes; and (2) the Department should establish a high priority for the implementation of open recommendations of Government Accountability Office (GAO) reports.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We agree that the Department of Defense could achieve significant cost savings through improved management of its acquisition and contracting processes, better decisions on what to buy and how to buy it, and the elimination of waste, fraud, and abuse. Many GAO reports include constructive recommendations on steps that the Department could take to address these problems. We urge the Department to implement such recommendations.

costs until there is an agreement that any termination costs will be equally divided between the Department of Defense and the Department of Commerce.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Limitation on use of funds for purchasing Global Positioning System user equipment (sec. 913)

The Senate committee-reported bill contained a provision (sec. 912) that would prohibit funds available to the Department of Defense (DOD) from being used to purchase Global Positioning System (GPS) user equipment unless such equipment is capable of receiving the military code or “M” code, in which the DOD has made significant investments by deploying GPS satellites with M code capability to allow improved accessibility to GPS satellites and increase anti-jam and anti-spoof capabilities. The Senate committee-reported bill contained a provision (sec. 914) that would set forth a series of findings dealing with the fragility of the solid rocket motor industrial base and the importance of coordination amongst federal agencies, particularly the National Aeronautics and Space Administration (NASA) and the Department of Defense (DOD) to ensure the viability of that base. The provision would direct the Secretary of Defense, in consultation with the Administrator of NASA, to report on the impact of the cancellation of the NASA Constellation program on DOD mission requirements. The report would be due to the Committees on Armed Services of the Senate and the House of Representatives,

the Senate Committees on Commerce, Science, and Transportation, and Appropriations, and the House of Representatives Committees on Energy and Commerce, and Appropriations, 180 days after the date of the enactment of this Act.

The provision also provides the Secretary with the authority to waive this requirement if it is in the vital national security interests of the United States. The House provision would require that the long-range plan include three distinct sections, each spanning a period of 10 years. The first section would be a detailed construction plan for the first 10 years, the second a probable construction plan for the second 10

years, and the third a notional construction plan for the last 10 years.

The provision would prevent the Secretary from modifying future shipbuilding budget requests during the intervening years between submissions of the QDR, unless the change were to be an increase in the shipbuilding plan or the change were accompanied by an addendum to the QDR which explained and justified the decrease with respect to the national security of the United States.

The provision would also require that the plan fully comply with section 5062(b) of title 10, United States Code, to maintain a minimum of 11 operational aircraft carriers and to phase in the construction of such carriers so as to minimize the total cost of procurement.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision, modified to require that the Secretary report on the basis for making any reductions in the planned shipbuilding levels in years when DOD is not producing a new QDR and to delete the requirement relating to aircraft carriers.

The committees expect that, following the submission of the President's budget materials for a fiscal year, the Secretary of the Navy, at the written request of one of the congressional defense committees, will promptly deliver the Navy's long-term shipbuilding plan used to develop the President's budget request for that fiscal year, as well as a certification from the Secretary of the Navy that both the President's budget request for that fiscal year and the budget for the future-years defense program is sufficient to fund the construction schedule provided in that plan. The committees expect that such a plan would include the quantity of each class of ship to be constructed in that fiscal year and the nine following fiscal years.

The provision would also prohibit the use of Department of Defense funds to transfer any such detainee to the custody or effective control of a foreign country or entity if there is a confirmed case of an individual transferred from United States Naval Station, Guantanamo Bay, Cuba, to that country or entity who has subsequently engaged in terrorist activity. The Secretary of Defense would be authorized to waive this prohibition on transfers to countries or foreign entities with a history of recidivism if the Secretary certifies that such a transfer would be in the national interest of the United States.

The provision is also amended to exempt from the prohibitions under the section actions taken by the Secretary of Defense to transfer any individual detained at Guantanamo to effectuate an order affecting the disposition of the individual that is issued by a court or competent tribunal of the United States having lawful jurisdiction. In the event such an order is issued, the Secretary of Defense is required to notify Congress promptly of the order's issuance.

The House bill contained a provision (sec. 1054) that would establish a Rapid Innovation Program to accelerate the fielding of innovative technologies.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would stress the importance of a competitive, merit-based program to directly support primarily major defense acquisition programs, but also other defense acquisition programs that meet critical national security needs (such as those articulated through, for example, a Joint Urgent Operational Needs Statement). Under this program, projects should be selected, among other things, on the basis of their responsiveness to identified needs, as articulated in the acquisition plan of those programs they intend to support (or a validated requirements document). In executing this program, the committees expect the Secretary of Defense, working through the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD AT&L) and in coordination with the service secretaries to:

- (1) Develop and implement a competitive, merit-based program designed to stimulate innovative technologies; reduce acquisition or life cycle costs; address technical risks; improve the timeliness and thoroughness of test and evaluation outcomes; and rapidly insert such products into military systems that meet critical national security needs;

(2) Develop and implement clear goals and metrics for the program that would enhance the insertion of those technologies (including dual use technologies) identified in paragraph (1); and

(3) Ensure that projects described below are given full consideration in accordance with competitive and merit-based procedures:

(a) Phase II Small Business Innovation Research (SBIR) or other projects, as determined by the Program Executive Officers or Program Managers, which are most likely to be fielded within 3 years;

(b) Responses to an annual broad agency announcement or other competitive or merit-based processes;

(c) Projects executed by the defense laboratories and the test and evaluation community; and,

(d) Projects cost-shared with state, local, or other government funds.

The committees further note that (sec. 1073) would not require or enable any official of the Department of Defense to provide funding to any earmark as defined pursuant to House Rule XXI, clause nine or any congressionally directed spending item as defined pursuant to Senate Rule XLIV, paragraph 5.

Pursuant to similar ongoing studies, the committees encourage the Secretary of Defense to request the National Academies to evaluate the program after the first year of execution.

The committees believe that the Department of the Navy's experience with a similar initiative suggests the broader utility of this program within the Department of Defense. During fiscal years 2008 through 2010, the Navy Program Executive Office Submarine successfully capitalized on the successes of SBIR Phase I and II innovations. Funding for those innovations was provided to small business projects identified in program acquisition plans for developing certain components for insertion in the procurement process.

Finally the provision would prevent any further reductions in nuclear forces until the Secretary of Defense submitted a report setting for the reasons and rationale for additional reductions and made a series of certifications. Additional

reductions could not be implemented until 180 days after the Secretary had submitted the report and made the required certifications.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would set forth a sense of Congress that any future reductions in strategic nuclear systems below the levels outlined in the New START Treaty, should not be implemented until the President submits a report to the congressional defense committees on the rationale for the reductions. This report would include a justification for such reductions and an assessment of the strategic environment, threat and policy, and the technical and operational implications of such reductions. In addition the report would include a series of certifications with respect to the strategic environment, modernization efforts, the capability of the remaining nuclear forces, and the entire strategic picture including how such reductions are compensated by other measures including conventional forces and missile defense.

LEGISLATIVE PROVISIONS NOT ADOPTED

Repeal of requirement for annual joint report from Office of Management and Budget and Congressional Budget Office on scoring of outlays in defense budget function

The Senate committee-reported bill contained a provision (sec. 1002) to repeal the requirement for an annual joint report from the Office of Management and Budget and the Congressional Budget Office on scoring of outlays in the defense budget function.

The House bill contained no similar provision.

The agreement does not include this provision.

The Committees on Armed Services of the Senate and the House of Representatives would have preferred inclusion of this provision requested by the Administration and supported by the Congressional Budget Office. However, inclusion of the provision would have subjected the agreement to a point of order in the Senate.

Department of Defense aerospace-related mishap safety investigation reports

The House bill contained a provision (sec. 1041) that would require the secretary of a military department to provide, upon written request by the chairman and ranking member of any of the congressional defense committees, a briefing on the privileged findings, causal factors and recommendations contained in a Department of Defense aerospace-related mishap safety investigation report.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

We understand that there is a 1989 agreement between the Secretary of the Air Force and the Committee on Armed Services of the House of Representatives to provide a briefing to the Chairman and Ranking Minority Member of the Committee in response to a personal request of the Chairman and the Ranking Minority Mem-

ber. We encourage the Secretary of the Air Force to modernize this agreement in a manner that would provide technical subject matter expertise during briefings to the Chairman and Ranking Minority Member of the committee concerned.

Report on use of domestically-produced alternative fuels or technologies by vehicles of the Department of Defense

The Senate committee-reported bill contained a provision (sec. 1062) that would require a comprehensive report regarding the current and projected use of domestically-produced alternative fuels or technologies by vehicles of the Department of Defense (DOD).

The House bill contained no similar provision.

The agreement does not include this provision.

The Committees on Armed Services of the Senate and House of Representatives note that while the Department of Defense is making advances in alternative fuels for vehicles and hybrid electric technologies, concerns remain that a strategic-level plan and coordinated approach are lacking and proliferation of technology is not as robust across the fleet as it could be. Not later than 45 days after the date of the enactment of this Act, the Under Secretary of Defense for Acquisition, Technology, and Logistics jointly with the Director of the Defense Logistics Agency, shall brief the Committees on Armed Services of the Senate and House of Representatives regarding the status of: use and potential use of domestically-produced alternative fuels including but not limited to, natural gas-based fuels and biodiesel, in DOD vehicles; current and projected actions by the DOD to increase the use of alternative fuels in vehicles; a description and assessment of current and anticipated commercial availability and demand for alternative fuels including cost; a description of the infrastructure and associated costs required to store and distribute alternative fuels on military installations in the United States that could be adapted for use by alternative fuels; a list and status of the current tactical, non-tactical, and combat vehicle programs that are pursuing either hybrid or electric technologies, or advances to accept alternative fuels; a list of research and development programs and funding investments for operational energy; and any recommendations for legislative or administrative action to ensure that the DOD meets goals for the use of alternative fuels and vehicles.

Coordination of Federal Information Policy

The House bill contained provisions (sec. 1701–1704) that would amend Chapter 35 of title 44, United States Code, to update the coordination process for information security for the Federal Government. Such updates would include the establishing a National Office for Cybersecurity in the Executive Office of the President, clarifying agency responsibilities, requiring annual independent audits, and establishing a federal information security incident center.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note with concern the proliferation of recent events that underscore critical vulnerabilities to the information infrastructure of

the United States. Despite a number of efforts by both the Obama and Bush administrations to deal with these growing threats, U.S. policies are still woefully outdated. We reiterate the need for additional focus on cybersecurity issues across the Federal Government in the near-term, and urge the Obama administration and the next Congress to form a strong, collaborative effort that engages the public to develop the necessary comprehensive, bipartisan cybersecurity legislation.

TITLE XI—CIVILIAN PERSONNEL MATTERS

Clarification of authorities at personnel demonstration laboratories (sec. 1101)

The House bill contained a provision (sec. 1102) that would clarify authorities relating to personnel demonstration laboratories and increase the number of positions for which such direct hiring authority may be used.

The Senate committee-reported bill contained a similar provision (sec. 1101).

The agreement includes a provision that would combine the House and Senate provisions.

Requirements for Department of Defense senior mentors (sec. 1102)

The House bill contained a provision (sec. 210 of division D) that would prohibit the use of personal services contracts to hire senior mentors.

The Senate committee-reported bill contained a provision (sec. 1102) that would require that senior mentors be hired as highly qualified experts and comply with all applicable federal laws and regulations on personnel and ethics matters.

The agreement includes the Senate provision.

One-year extension of authority to waive annual limitation on premium pay and aggregate limitation on pay for federal civilian employees working overseas (sec. 1103)

The House bill contained a provision (sec. 1104) that would authorize for 2 additional years the head of an executive agency to waive the limitations on the aggregate of basic and premium pay payable to an employee who performs work in an overseas location that is in the area of responsibility of the Commander, United States Central Command, or an overseas location that was formerly in the area of responsibility of the Commander, United States Central Command but has been moved to the area of responsibility of the Commander, United States Africa Command in support of a contingency operation or an operation in response to a declared emergency.

The Senate committee-reported bill contained a provision (sec. 1103) that would authorize the same waiver authority, but for only 1 additional year.

The agreement includes the Senate provision.

Extension and modification of enhanced Department of Defense appointment and compensation authority for personnel and care and treatment of wounded and injured members of the armed forces (sec. 1104)

The Senate committee-reported bill contained a provision (sec. 1104) that would authorize the Secretary of Defense to designate any category of health care occupation within the Department of Defense (DOD) as a shortage category occupation or critical need occupation, and would authorize the Secretary to recruit and appoint qualified individuals directly to those positions. The provision would also extend hiring authorities under this section from September 30, 2012, until December 31, 2015.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would authorize the Secretary of Defense to designate any category of medical or health professional positions within DOD as a shortage category occupation or critical need occupation and to recruit and appoint qualified individuals to those positions directly until December 31, 2015.

Rate of overtime pay for Department of the Navy employees performing work aboard or dockside in support of the nuclear aircraft carrier forward deployed in Japan (sec. 1105)

The House bill contained a provision (sec. 1103) that would allow certain executive branch employees working aboard or in support of the forward-deployed carrier USS *George Washington* (CVN 73) to earn overtime pay while the carrier is forward deployed in Japan.

The Senate committee-reported bill contained a provision (sec. 1107) that would authorize until September 30, 2014, a civilian employee of the Department of the Navy who is assigned to temporary duty to perform work aboard, or dockside in direct support of, the nuclear aircraft carrier that is forward deployed in Japan to receive overtime pay.

The agreement includes the Senate provision with a technical amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

Designation of Space and Missile Defense Technical Center of the U.S. Army Space and Missile Defense Command/Army Forces Strategic Command as a Department of Defense Science and Technology Reinvention Laboratory

The Senate committee-reported bill contained a provision (sec. 1105) that would designate the Space and Missile Defense Technical Center as a science and technology reinvention laboratory.

The House bill contained no similar provision.

The agreement does not include the provision.

The Department of Defense Science and Technology Reinvention Laboratories (STRL) program was established by Congress to enable the Department to attract and retain the best and brightest scientists and engineers in an increasingly competitive market for skilled technical expertise. The committees note that the current STRL list may not encompass the full range of laboratories that

may meet the Department's criteria for eligibility as a STRL. Therefore, the committees direct the Secretary of Defense to undertake, in coordination with the military services, a thorough review of the organizations that also may meet such criteria and to submit to the Committees on Armed Services of the Senate and House of Representatives by October 1, 2011, a list of any additional organizations that should be considered for designation as a STRL pursuant to section 1105 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84).

Waiver of certain pay limitations

The House bill contained a provision (sec. 1105) that would clarify that highly qualified experts hired pursuant to section 9903 of title 5, United States Code, should receive benefits and compensation similar to those that other federal civilian employees serving in those areas currently receive. This includes premium pay or danger pay allowances, compensatory time off, and other appropriate compensation or allowances authorized under chapter 59 of title 5, United States Code.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We note that currently, highly qualified experts serving in areas of contingency operations have been denied any type of hazardous duty compensation because the Department of Defense and the Office of Personnel Management have interpreted such compensation as an incentive, which is explicitly prohibited under section 9903. We do not agree with the interpretation that hazardous duty compensation is an incentive and expect the Department to remedy the compensation inequities experienced by the highly qualified experts currently working in the Republic of Iraq and the Islamic Republic of Afghanistan.

Services of post-combat case coordinators

The House bill contained a provision (sec. 1106) that would require each federal agency that sends civilian employees on hazardous duty assignments in support of U.S. military operations in a contingency operation to assign post-combat case coordinators to employees who sustain a traumatic injury, or experience a serious disease or illness during performance of their duty in the contingency operation.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We note that federal civilian employees increasingly are providing support in contingency operations and some are experiencing serious medical problems upon return to their regular assignment. The Department of Defense (DOD) already assigns case workers to its civilian expeditionary workforce. The responsibility of these case workers is to guide and direct all deployed DOD civilians to available resources, provide intervention in problem claims, and work with the service component's Injury Compensation Program Administrators to help injured employees navigate the Office of Worker's Compensation Program claims process. We encourage

other federal agencies to provide similar support for their deployed employees who need assistance coordinating benefits between the Federal Employees Health Benefits Program and Federal Employees Compensation Act.

Authority to waive maximum age limit for certain appointments

The House bill contained a provision (sec. 1107) that would allow the Department of Defense (DOD) to waive the hiring and retirement age limits for federal law enforcement and firefighter positions in certain circumstances.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We note that in 2009 the Secretary of Defense announced plans to scale back significantly the use of contractors in support services. While consistent with current law (section 2463 of title 10, United States Code), this decision may have resulted in unintended consequences when converting law enforcement and firefighting functions to Federal Government positions since many contractor employees currently performing those functions may not be able to compete for the position as a federal employee because of statutory age limits. We are aware that the underlying statute (section 3307 of title 5, United States Code) and DOD instruction (DODI 1440–25, volume 336) allow for exceptions to the age limits set for DOD firefighters and law enforcement officers. We expect the Secretary of Defense to take advantage of these flexibilities in order to retain a highly skilled and ready workforce.

Sense of Congress for waiver of recovery of certain payments previously made under civilian employees voluntary separation incentive program

The House bill contained a provision (sec. 1108) that would express the Sense of Congress that the Secretary of Defense should waive repayment of the voluntary separation incentive pay (VSIP) for employees who accepted a reassignment with the Department of Defense during the period of April 1, 2004, to May 1, 2008, and had received written assurance that repayment would not be required or would be waived.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We note that approximately 40 individuals hired during the period of April 1, 2004, to May 1, 2008, were assured that they would not be required to repay their separation pay based on an Office of Personnel Management (OPM) national emergency guidance issued following September 11, 2001. However, we understand that it was subsequently determined that the guidance did not apply to employees covered under section 9902 of title 5, United States Code, which effectively superseded the OPM guidance. While the Department no longer waives VSIP repayment for individuals who have been rehired since May 1, 2008, we believe those individuals who returned to the Department immediately following the declaration of a national emergency, and who received written assurances that repayment would not be required, should retain, or be

repaid, their voluntary separation incentive pay. We note that paragraphs (f)(6)(A) and (f)(6)(B) of section 9902 of title 5, United States Code, already authorize a waiver of VSIP repayment and urge the Secretary to utilize this authority for the affected individuals.

Suspension of DCIPS pay authority extended for a year

The House bill contained a provision (sec. 1109) that would extend for 1 year the prohibition in section 1114(a) of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84) against adjusting pay rates under the Defense Civilian Intelligence Personnel System (DCIPS).

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

On August 4, 2010, the Secretary of Defense announced that the Department of Defense (DOD) would not implement the DCIPS policies that would link employee base pay increases to individual performance and that all DOD intelligence employees, other than those at the National Geo-Spatial Intelligence Agency, would be returned to a General Schedule-like pay system. For this reason, the prohibition in section 1114(a) is no longer needed.

TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

Subtitle A—Assistance and Training

Expansion of authority for support of special operations to combat terrorism (sec. 1201)

The House bill contained a provision (sec. 1201) that would increase the amount of funds available to the Secretary of Defense to provide assistance to foreign forces, irregular forces, groups, or individuals supporting or facilitating military operations by U.S. special operations forces to combat terrorism from \$40.0 million to \$50.0 million.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment increasing the amount of funds available to the Secretary of Defense for these purposes from \$40.0 million to \$45.0 million.

The Committees on Armed Services of the Senate and the House of Representatives applaud the Department for taking action to ensure funded activities meet the original intent of this authority, including closing out operations which have achieved their intended result or which no longer fit within the scope of the authority. However, we remain concerned about the Department's compliance with reporting requirements under this authority, specifically in the annual report, and the lack of operational details included in the annual report and notifications. Therefore, we direct the Assistant Secretary of Defense for Special Operations/Low Intensity Conflict and Interdependent Capabilities and U.S. Special Operations Command to provide the Committees on Armed Services of the Senate and the House of Representatives detailed briefings within 30 days of delivering the required annual report and 6 months

thereafter. Such briefings should include, but not be limited to, operational details regarding each funded activity, funding execution levels, an assessment of progress toward meeting the intent of authorized funding, and anticipated funding requirements through future fiscal years.

Addition of allied government agencies to enhanced logistics interoperability authority (sec. 1202)

The House bill contained a provision (sec. 1202) that would amend section 127d of title 10, United States Code, to authorize the Secretary of Defense to provide logistic support, supplies and services to nonmilitary logistics, security, or similar agencies of allied governments if it would be beneficial to the United States Armed Forces.

The Senate committee-reported bill contained a similar provision (sec. 1201).

The agreement includes the House provision.

Expansion of temporary authority to use acquisition and cross-servicing agreements to lend certain military equipment to certain foreign forces for personnel protection and survivability (sec. 1203)

The Senate committee-reported bill contained a provision (sec. 1202) that would amend section 1202 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364; 120 Stat. 2412), as amended, to allow certain personnel protection equipment to be loaned to partner military forces prior to deployment in connection with the training of forces participating in combined operations.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Authority to pay personnel expenses in connection with African cooperation (sec. 1204)

The Senate committee-reported bill contained a provision (sec. 1204) that would permit the secretary of a military department to pay the travel, subsistence, and special compensation of officers and students and other expenses that such secretary considers necessary for African cooperation.

The House bill contained no similar provision.

The agreement includes the Senate provision with a technical amendment.

Authority to build the capacity of Yemeni Ministry of Interior Counter Terrorism Forces (sec. 1205)

The House bill contained a provision (sec. 1203(c)) that would require that the Secretary of Defense transfer to the Secretary of State \$75.0 million for the purpose of providing assistance to build the capacity of the Yemeni Ministry of Interior (MOI), provided that, not later than July 31, 2011, the Secretary of State certifies that the Department of State is able to provide that assistance. If the Secretary of State is unable to issue such a certification, then the Secretary of Defense may, with the concurrence of the Secretary of State and subject to the standard procedures of train and

equip' authority of section 1206 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163), as amended, use that \$75.0 million only for the purposes of training and equipping those Yemeni MOI forces.

The Senate committee-reported bill contained a similar provision (sec. 1203). The Senate provision would authorize the Secretary of Defense, with the concurrence of the Secretary of State, to use up to \$75.0 million of funds available for operation and maintenance during fiscal year 2011 to build the capacity of the Yemen MOI counterterrorism forces to conduct counterterrorism operations against al Qaeda in the Arabian Peninsula and its affiliates.

The agreement includes the Senate provision.

Air Force scholarships for Partnership for Peace nations to participate in the Euro-NATO Joint Jet Pilot Training Program (sec. 1206)

The House bill contained a provision (sec. 1204) that would require the Secretary of the Air Force to establish and maintain a demonstration scholarship program to allow personnel of countries participating in the North Atlantic Treaty Organization (NATO) Partnership for Peace (PfP) program to receive undergraduate pilot training through the Euro-NATO Joint Jet Pilot Training (ENJJPT) program. The demonstration program would be authorized through the end of fiscal year 2015.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would give the Secretary of the Air Force the authority to establish and maintain a program to allow PfP nations' personnel to receive pilot training through the ENJJPT program. This authority would expire at the end of fiscal year 2012.

Modification and extension of authorities relating to program to build the capacity of foreign military forces (sec. 1207)

The House bill contained a provision (sec. 1203) that would increase the amount authorized for the "global train and equip" program under section 1206 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163), as amended, to \$500.0 million. The provision would also raise to \$100.0 million the temporary limitation on the amount of section 1206 funds available for building the capacity of foreign military forces to participate in or support stabilization operations in which the United States Armed Forces are a participant. In addition, the provision in the House bill would require the Secretary of Defense to transfer \$75.0 million of section 1206 funds to the Secretary of State for a program to build the capacity of the counterterrorism forces of the Yemeni Ministry of the Interior (MOI), or, if the Secretary of State fails to certify by July 31, 2011, that the Department of State is able to carry out such a program effectively, the Secretary of Defense is authorized to conduct or support such a program. The provision would also extend for 1 year the authority for the section 1206 program through the end of fiscal year 2012.

The Senate committee-reported bill contained a provision (sec. 1212) that would increase the temporary limitation on the amount

available to build the capacity of foreign military forces to participate in or support military or stability operations in which the United States Armed Forces are a participant to \$100.0 million.

The agreement includes the House provision with an amendment that would eliminate the increase in funding for the section 1206 program for fiscal year 2011. The amendment would also remove the authority to use section 1206 funding to build the capacity of the counterterrorism forces of the Yemeni MOI. Assistance to build the capacity of the Yemeni MOI is authorized in another section of this title.

Subtitle B—Matters Relating to Iraq, Afghanistan, and Pakistan

Limitation on availability of funds for certain purposes relating to Iraq (sec. 1211)

The House bill contained a provision (sec. 1211) that would prohibit the use of funds authorized by this Act to establish permanent United States military installations or bases in the Republic of Iraq or to exercise United States control of the oil resources of Iraq.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

One-year extension and modification of Commanders' Emergency Response Program (sec. 1212)

The House bill contained a provision (sec. 1212) that would authorize funding for the Commanders' Emergency Response Program (CERP) during fiscal year 2011 at no more than \$100.0 million for CERP in Iraq and no more than \$800.0 million for CERP in Afghanistan. The provision would also require the Secretary of Defense to report to the congressional defense committees on a quarterly basis on CERP.

The Senate committee-reported bill contained a provision (sec. 1211) that would extend for 1 year the authority for CERP under section 1202 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163; 119 Stat. 3455), as most recently amended by section 1222 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84; 123 Stat. 2518). The provision would authorize up to \$900.0 million in CERP funding in fiscal year 2011. The provision also included a 1-year extension of the authority in section 1222(e) of Public Law 111-84 to use up to \$100.0 million in CERP funds to support activities to reintegrate former insurgents into Afghanistan society.

The agreement includes the Senate provision with an amendment that would authorize funding during fiscal year 2011 of \$100.0 million for CERP in Iraq and \$400.0 million for CERP in Afghanistan. Funding for CERP in Afghanistan would be reduced at the request of the Department of Defense to make funds available for the Afghanistan Infrastructure Fund authorized in a separate section of this title. The provision would also prohibit using CERP funds in excess of \$20.0 million to fund any project, including any ancillary or related elements of the project. In addition, the provision would require the Secretary of Defense to provide a de-

tailed notification to the congressional defense committees 15 days prior to the use of CERP funds for any project anticipated to cost \$5.0 million or more.

We remain concerned by the Department's continuing practice of using CERP to fund large-scale projects, particularly in Afghanistan, which is inconsistent with CERP's purpose of enabling commanders to carry out small-scale projects designed to meet urgent humanitarian relief and reconstruction requirements that directly benefit the local people. The Afghanistan Infrastructure Fund is authorized in a separate section of this title with the expectation that this fund, rather than CERP, will be the primary source for Department of Defense funding for large-scale development and reconstruction projects in Afghanistan.

Extension of authority for reimbursement of certain coalition nations for support provided to United States military operations (sec. 1213)

The House bill contained a provision (sec. 1213) that would modify section 1233 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181; 122 Stat. 393), as amended by 1223 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84; 123 Stat. 2521), to authorize the Secretary of Defense to provide reimbursement to any key cooperating nation (Coalition Support Fund reimbursement) for: (a) logistical, military, and other support provided by that nation to or in connection with U.S. military operations in Operation Iraqi Freedom (OIF) or Operation Enduring Freedom (OEF); or (b) logistical and military support provided by that nation to confront the threat posed by al'Qaida, the Taliban, and other militant extremists in Pakistan. The aggregate amount of reimbursements made under this authority would not exceed \$1.6 billion during fiscal year 2011. The congressional notice and reporting requirements under section 1233 of Public Law 110-181, as amended by section 1232 of Public Law 111-84, would apply to Coalition Support Fund reimbursements authorized by this section.

The Senate committee-reported bill contained a provision (sec. 1213) that would extend for fiscal year 2011 the authority of the Secretary of Defense under section 1233 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181; 122 Stat. 393), as amended by section 1223 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84), to reimburse key cooperating nations for logistical, military and other support provided to or in connection with OIF or OEF. The provision would also require submission to Congress of the Department's guidance for the Coalition Readiness Support Program (CRSP), under the authority of section 1233, as amended, to provide specialized training and supplies and loan specialized equipment to key cooperating nations, and to provide any modifications to that guidance. The provision would also allow the Department to provide reimbursements for access based on an international agreement without a 15-day pre-notification. In addition, the provision would extend through September 30, 2012, the notification requirements relating to Pakistan of section 1232 of the National Defense Au-

thorization Act for Fiscal Year 2008 (Public Law 110–181; 122 Stat. 393).

The agreement includes the Senate provision with an amendment that would eliminate the requirement to provide the guidance for CRSP. We note that the Department has provided the CRSP guidance to the Committees on Armed Services of the Senate and the House of Representatives and urge the Department to keep the committees informed of any modification to that guidance in the future.

Extension of authority to transfer defense articles and provide defense services to the military and security forces of Iraq and Afghanistan (sec. 1214)

The Senate committee-reported bill contained a provision (sec. 1215) that would extend through December 31, 2011, the authority under section 1234 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–81; 123 Stat. 2533) for the Secretary of Defense, with the concurrence of the Secretary of State, to transfer defense articles, and provide defense services in connection with such transfers, to the Iraq security forces or the Afghanistan security forces to support their efforts to restore and maintain peace and security internally.

The House bill contained no similar provision.

The agreement includes the Senate provision.

No permanent military bases in Afghanistan (sec. 1215)

The House bill contained a provision (sec. 1216) that would prohibit the use of funds authorized by this Act to establish permanent United States military installations in the Islamic Republic of Afghanistan.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Authority to use funds for reintegration activities in Afghanistan (sec. 1216)

The House bill contained a provision (sec. 1217) that would authorize the Secretary of Defense to use up to \$50.0 million to support the reintegration of former low-level insurgent fighters into Afghan society. The provision would also require a certification by the Secretary of State before the Secretary of Defense could carry out a reintegration program under this section. In addition, the provision would require the Secretary of Defense to submit to Congress the guidance for implementing the program and quarterly reports on the activities carried out under this section.

The Senate committee-reported bill contained a provision (sec. 1211) that would extend and modify the authority for the Commanders' Emergency Response Program (CERP), which would include a 1-year extension of the authority in section 1222 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84; 123 Stat. 2518) for the Secretary of Defense to use CERP funds to support a program to reintegrate former low-level insurgent fighters into Afghan society.

The agreement includes the House provision with an amendment that would eliminate the requirement for a certification by the Secretary of State before the Secretary of Defense could carry out a reintegration program under this section. The provision is also amended to require reporting on the activities carried out under this section on a semi-annual basis.

We encourage the Department of Defense and the Department of State to provide a briefing within 60 days of enactment of this Act to the Committees on Armed Services, Appropriations, and Foreign Relations of the Senate and the Committees on Armed Services, Appropriations, and Foreign Affairs of the House of Representatives on the plan for the use of funds authorized under this section to support a program of reintegration in Afghanistan.

Authority to establish a program to develop and carry out infrastructure projects in Afghanistan (sec. 1217)

The agreement includes a provision that would authorize the Secretary of Defense and the Secretary of State to establish a program to undertake high-priority, large-scale infrastructure projects in support of the civil-military campaign in Afghanistan. The program would be funded through the establishment of the Afghanistan Infrastructure Fund (AIF). Infrastructure projects authorized under this program would be jointly developed by the Secretary of Defense and the Secretary of State and would be implemented by the Secretary of State, in coordination with the Secretary of Defense, unless they agree that the project should be implemented by the Secretary of Defense.

Infrastructure projects authorized under this program would include water, power, transportation and other projects in support of the counterinsurgency strategy. AIF funds could also be used for certain maintenance and sustainment costs, such as the costs of fuel for generators under a program to provide electrical power to Kandahar. The provision would authorize the use of up to \$400.0 million in Department of Defense operation and maintenance funds in fiscal year 2011 for the AIF. The provision would also require the Secretary of Defense to notify Congress no less than 30 days prior to the obligation or expenditure of AIF funds or the transfer of such funds to the Department of State to implement a project under this program. The provision would also include a requirement to report to Congress on the implementation of the Afghanistan infrastructure program.

The Afghanistan infrastructure program is intended to be a whole-of-government approach in support of the counterinsurgency plan, with both the Department of Defense and the Department of State bringing resources to the effort. We note that the Department of Defense has requested, and this Act would provide, that \$400.0 million be made available for the AIF through a reduction in the request for the Commanders' Emergency Response Program. We also note that the Department of State has said it plans to reprogram existing foreign assistance resources to support large-scale infrastructure projects deemed critical to the civil-military campaign in Afghanistan.

The Afghanistan infrastructure program is authorized with the expectation that these funds will be used for critical large-scale in-

infrastructure projects, and costs directly related to the sustainment and maintenance of those projects, that are critical to counterinsurgency objectives. We expect the Secretary of Defense to closely monitor the development and implementation of projects under the Afghanistan infrastructure program to ensure that the program is carried out consistent with congressional intent.

Extension of logistical support for coalition forces supporting operations in Iraq and Afghanistan (sec. 1218)

The House bill contained a provision (sec. 1219) that would authorize the Department of Defense to provide from funds made available for operations and maintenance up to \$400.0 million in supplies, services, transportation (including airlift and sealift), and other logistical support for coalition forces supporting operations in the Republic of Iraq and the Islamic Republic of Afghanistan.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would replace the House provision with a provision that extends for fiscal year 2011 the authority provided in section 1234 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181; 122 Stat. 394) to provide logistical support for coalition forces supporting operations in the Republic of Iraq and the Islamic Republic of Afghanistan.

Recommendations on oversight of contractors engaged in activities relating to Afghanistan (sec. 1219)

The House bill contained a provision (sec. 1222) that would require the Special Inspector General for Afghanistan Reconstruction, in consultation with other Inspectors General, to issue recommendations on measures to improve oversight of contractors in Afghanistan.

This provision would also require the Secretary of Defense to implement a Sexual Assault Response Coordinator-led process by which a member or dependent who is the victim of a sexual assault may decline to participate in the investigation of the sexual assault, and authorize a member of the Armed Forces who is a victim of a sexual assault to confidentially disclose the details of the assault to specified individuals and receive medical treatment, legal assistance, or counseling without triggering an official investigation.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the Secretary of Defense to clarify the limitations on the ability of a member of the Armed Forces to make a restricted report regarding the occurrence of a sexual assault and the circumstances under which information contained in a restricted report may no longer be confidential.

Subtitle B—Improved and Expanded Availability of Services

Improved protocols for providing medical care for victims of sexual assault (sec. 1621)

The House bill contained a provision (sec. 1646) that would require the Secretary of Defense to establish protocols for providing medical care to a member of the armed forces who is a victim of a sexual assault.

The House bill contained a provision (sec. 1643) that would entitle a member of the Armed Forces or a dependent of a member of the Armed Forces who is the victim of a sexual assault to legal assistance and assistance provided by a qualified Sexual Assault Victim Advocate. This provision would also require the Secretary of Defense to implement a Sexual Assault Response Coordinator-led process by which a member or dependent who is the victim of a sexual assault may decline to participate in the investigation of the sexual assault, and authorize a member of the Armed Forces who is a victim of a sexual assault to confidentially disclose the details of the assault to specified individuals and receive medical treatment, legal assistance, or counseling without triggering an official investigation.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision that would entitle the member or dependent to assistance of a qualified Sexual Assault Victim Advocate with a clarifying amendment.

Subtitle C—Reporting Requirements

The House bill contained a provision (sec. 1632) that would require the secretaries of the military departments, by January 15 of each year, to submit to the Secretary of Defense a report on the sexual assaults involving members of the Armed Forces under the jurisdiction of that secretary during the preceding year, and the Secretary of Defense to submit these reports, with comments, to the Committees on Armed Services of the Senate and the House of

Representatives no later than March 15 of the year following the year covered by the report.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the service secretaries to submit reports on sexual assault to the Secretary of Defense not later than March 1 of each year, and the Secretary of Defense to forward the reports, including an assessment of the reports, to the Committees on Armed Services of the Senate and the House of Representatives not later than April 30 of each year. The provision would also require the Secretary of Defense to establish a consistent definition of “substantiated” not later than December 31, 2011.

Additional reports (sec. 1632)

The House bill contained a provision (sec. 1662) that would require the Secretary of Defense, within 90 days of the date of enactment of this Act, to revise materials made available under the sexual assault prevention and response program to include information on the extent to which dependents of members of the armed forces, retired members, Department of Defense civilian employees, and employees of defense contractors are eligible for sexual assault prevention and response services under the sexual assault prevention and response program; and, within 1 year of the date of enactment of this Act, to submit to the congressional defense committees a report on the feasibility of extending all sexual assault prevention and response services to dependents of members of the Armed Forces, retired members, Department of Defense civilian employees, and employees of defense contractors who are victims of a sexual assault.

The House bill also contained a provision (sec. 1617) that would require the Secretary of Defense, within 1 year of the date of enactment of this Act, to submit to the congressional defense committees a report on the application of the sexual assault prevention and response program for the reserve components.

The House bill also contained a provision (sec. 1645) that would amend section 854 of title 10, United States Code (article 54 of the Uniform Code of Military Justice), to require that, in the case of a general or special court-martial involving a sexual assault, a copy of the prepared record of the proceedings of the court-martial would be given to the victim of the offense if the victim testified during the proceedings.

The House bill also contained a provision (sec. 1643) that would entitle a member of the Armed Forces, or a dependent of a member of the Armed Forces, who is the victim of a sexual assault to legal assistance provided by a certified military legal assistance counsel.

The House bill also contained a provision (sec. 1618) that would require the Secretary of Defense to conduct a review of the effectiveness of section 920 of title 10 United States Code (article 120 of the Uniform Code of Military Justice).

The Senate committee-reported bill contained no similar provisions.

The agreement combines the House provisions with an amendment that would require the Secretary of Defense to evaluate: (1)

the feasibility of extending sexual assault prevention and response services to Department of Defense civilian employees and employees of defense contractors who are victims of sexual assault; (2) the application of the sexual assault prevention and response program to members of the reserve components; (3) the feasibility of requiring that a copy of the prepared record of proceedings of a general or special court-martial involving a sexual assault be given to the victim in cases in which the victim testified; (4) the feasibility of authorizing legal assistance for service members and dependents of service members who are victims of a sexual assault; and (5) the feasibility of utilizing trained forensic medical examiners when sexual assaults involving members of the Armed Forces occur in a military environment where civilian resources are limited or unavailable.

DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

Short title (sec. 2001)

The House bill contained a provision (sec. 2001) that would designate division B of this Act as the Military Construction Authorization Act for Fiscal Year 2011.

The Senate committee-reported bill contained a similar provision (sec. 2001).

Expiration of authorizations and amounts required to be specified by law (sec. 2002)

The House bill contained a provision (sec. 2002) that would ensure that the authorizations provided in titles XXI through XXVI and title XXIX shall expire on October 1, 2013, or the date of enactment of an act authorizing funds for military construction for fiscal year 2014, whichever is later.

TITLE XXI—ARMY MILITARY CONSTRUCTION

Authorized Army construction and land acquisition projects (sec. 2101)

The House bill contained a provision (sec. 2101) that would authorize military construction projects for the active component of the Army for fiscal year 2011.

The Senate committee-reported bill contained a similar provision (sec. 2101).

The agreement includes these provisions.

The authorized amounts are listed in this provision on an installation-by-installation basis. A State list of projects contained in the table in section 3001 of this Act provides the binding list of specific construction projects authorized at each location.

The agreement does not include authorizations for construction of three museum support facilities requested by the Department of the Army at Fort Benning, Georgia, Fort Sill, Oklahoma, and Fort Lee, Virginia. The proposed facilities were intended to support the

relocation of military artifacts and collections currently on display and open to the general public at museums at Fort Knox, Kentucky, Fort Bliss, Texas, and Aberdeen Proving Ground, Maryland. The Army requested the authorizations for the new construction to support the realignment of three schools, Armor, Ordnance, and Air Defense Artillery, to new locations as a part of the 2005 round of Base Realignments and Closures (BRAC). The Department of the Army has conveyed its intent to construct facilities that will not be open to the general public, but will serve primarily as a training room for the schools.

We strongly support the Army's objective to properly preserve for public use historic sites, buildings, and objects of national significance as these collections not only inform the general public of the proud legacy and history of the Army, but also inspire younger generations to military service.

As such, we are concerned that the Army's current plan will prohibit the general public from viewing these outstanding collections at their new locations until museums are constructed with privately-raised resources. In addition, if these collections are deemed by the Department of the Army as critical to the relocation and operation of the three schools, the facilities should be funded from accounts established to carry out BRAC construction.

As such, we strongly encourage the Department of the Army to develop a plan that will allow the relocation of these museum artifacts and collections in a way that satisfies the law, meets the training and education needs of the Department of the Army, and continues to afford the general public the opportunity to view these critical representations of American history.

The House bill contained a provision (sec. 2104) that amends the table in section 2101(b) of the Military Construction Authorization Act for Fiscal Year 2009 (division B of Public Law 110–417) by striking “Katterback” and inserting “Grafenwoehr”.

The Senate committee-reported bill contained an identical provision (sec. 2106).

The agreement includes this provision.

Modification of authority to carry out certain fiscal year 2010 project (sec. 2107)

TITLE XXII—NAVY MILITARY CONSTRUCTION

Authorized Navy construction and land acquisition projects (sec. 2201)

The House bill contained a provision (sec. 2201) that would authorize military construction projects for the active component of the Navy and Marine Corps for fiscal year 2011.

The Senate committee-reported bill contained a similar provision (sec. 2201).

The agreement includes these provisions.

The authorized amounts are listed in this provision on an installation-by-installation basis. A State list of projects contained in the table in section 3001 of this Act provides the binding list of specific construction projects authorized at each location.

The agreement includes a reduction in the authorization of appropriations of \$32.5 million that was requested for the construction of two headquarters facilities at Camp Lemonier, Djibouti.

We strongly support the Department of the Navy's intent to construct modern and secure facilities at Camp Lemonier that will protect U.S. military personnel while enabling Combined Joint Task Force-Horn of Africa (CJTF-HOA) and other military forces operating at the Camp to carry out their assigned missions.

We note that this installation has been identified by the Department of Defense as the only location in Africa proposed as an enduring presence and that it will continue to serve United States Africa Command (AFRICOM) as a hub for its full range of humanitarian and military missions on the continent and region.

We also strongly support projects intended to improve the living conditions and quality of life for military forces stationed at this location.

We note that over \$180.0 million has been invested in military construction projects in the last 3 years and another \$200.0 million is planned to be invested over the next 5 years to support the long-term presence of U.S. military forces at Camp Lemonier. We understand that the Department plans the eventual stationing of 3,500 U.S. military personnel at Camp Lemonier with the potential to surge to 5,000 personnel.

Given this sizable force of U.S. personnel, we are concerned that major construction projects are being sited and constructed within an existing, constrained 500 acre compound adjacent to the joint-use host nation civilian runway without a master plan to ensure all facilities meet force protection and anti-terrorism standards adopted by the Department of Defense.

We note that the current future-years defense plan of the Department of the Navy for Camp Lemonier does not include all projects or the costs required to correct critical deficiencies in living and work facilities. We are also concerned that formal agreements are not in place with the host nation to transition from a 5-year lease with one more 5-year option to a more long-term agreement that would ensure long-term access to the facilities.

The committees also note that the Department of the Navy has identified available land for expansion and "the opportunity to plan and build the bases correctly from the beginning."

We therefore direct the Department of the Navy, in collaboration with AFRICOM, to review the planned roles and missions proposed for Camp Lemonier, including the future of CJTF-HOA, and develop a master plan for the installation that will establish a set of facility priorities to focus resources towards compliance with Unified Facility Criteria (UFC) and other force protection measures, particularly in the elimination of temporary facilities and tents. This master plan should be formally agreed upon by all pertinent functions within the Department of Defense before proceeding with further military construction projects.

The master plan should contain, at a minimum, the following elements:

- (1) the results of a Joint Staff Integrated Vulnerability Assessment (JSIVA);
- (2) a review of all current and planned missions proposed to be conducted at Camp Lemonier in order to ascertain the full range of facility requirements;
- (3) a comprehensive facility list and site plan required to support the planned military force that is informed by the JSIVA, UFC, and other force protection guidance;
- (4) a site plan for Camp utility plants, fuel storage, and infrastructure that will ensure maximum practicable force protection, while minimizing negative impacts to the quality of life of base personnel;
- (5) a determination whether more acreage will be required to safely support the planned military population;
- (6) a list of priorities for construction intended to focus resources on the greatest risks to the protection of forces, as well as the elimination of expensive temporary facilities and tents;
- (7) an agreement with the Host Nation for long-term use of the base;
- (8) an investment strategy that will establish annual funding levels for new construction projects to meet the operational needs of incoming forces with minimum reliance on temporary structures and tents;
- (9) a review of the proposed site and design of the two headquarters facilities proposed in the Fiscal Year 2011 budget request to determine whether combining the two requirements in one facility will reduce the overall square footage and save taxpayer funds.

We direct the Secretary of the Navy and the Commander, AFRICOM to report back to the congressional defense committees, no later than 1 month after completion of the master plan or within 1 year of enactment of this Act, so that there is no further delay to the execution of critical construction projects at Camp Lemonier.

The agreement includes a reduction in the authorization of appropriations of \$320.0 million that was requested for the construction of aircraft parking, site preparation, and utilities on Guam to support relocation of 8,000 Marines and their families from Okinawa to Guam. This realignment is a key element of the transformation of the alliance with Japan and secures the enduring presence of remaining U.S. forces in Japan.

We are aware that the success of this agreement continues to depend on many factors including tangible progress towards comple-

tion of the Futenma Replacement Facility (FRF), the completion of the environmental impact statement for Guam for coral reefs and training operations, as well as final coordination with the Guam State Historical Preservation Office concerning the impact to cultural and historic resources on the Island.

We also note that negotiations still continue in the U.S. government and with the Government of Japan to determine the funding responsibility for over \$1.3 billion estimated by the Environmental Protection Agency to upgrade utilities and civilian infrastructure on the Island.

Regarding the FRF, the “Agreement Between the Government of the United States of America and The Government of Japan Concerning the Implementation of the Relocation of III Marine Expeditionary Force Personnel and their Dependents from Okinawa to Guam” signed on February 17, 2009, specifically cites in Article 3 that “The Relocation shall be dependent on tangible progress made by the Government of Japan toward completion of the Futenma Replacement Facility as stipulated in the roadmap.” We note that “tangible progress” was previously considered by the Department of Defense (DOD) to be a signature by the Governor of Okinawa on a landfill permit required to commence construction of the off-shore runway. This action has yet to be completed.

As for the planned construction on Guam, the Department of the Navy published a Record of Decision (ROD) for an Environmental Impact Statement (EIS) on September 20, 2010. We note that the ROD deferred any recommendation or mitigation proposals for the impact to coral reefs in Apra Harbor and for Marine Corps training ranges on the island pending further studies.

We also note that litigation against the Department of the Navy’s ROD has been filed by the National Trust for Historic Preservation, the Guam Preservation Trust, and a local organization, “We are Guahan.”

We also note that construction for the majority of the military construction projects authorized to date has been delayed pending resolution of these issues and the goal for completion of the move by 2014 has been deferred by a recommendation in the ROD to adopt a pace of construction consistent with the ability of Guam’s resources and infrastructure to support a certain level of effort.

In addition, the congressional committees have requested in numerous Acts the need for the Department of Defense to provide Congress a plan detailing the level of effort and the total cost estimate for each facility and infrastructure item required to complete the relocation of Marines to Guam. As of the date of this Act, the Department of Defense has not submitted this plan.

We are also concerned that required investments in civilian infrastructure, highlighted by the Government Accountability Office (GAO) in numerous reports in 2008 and 2009 are not addressed in the current budget for other federal agencies. In the latest report, “Defense Infrastructure: Guam Needs Timely Information from DOD to Meet Challenges in Planning and Financing Off-Base Projects and Programs to Support a Larger Military Presence” (GAO-10-90R, November 13, 2009), GAO cited the testimony before the Committee on Energy and Natural Resources of the Senate in May 2008, where the Governor of Guam outlined requirements

totaling \$6.1 billion to expand the commercial port, roadways, power, water, and other infrastructure as well as certain public services in support of the buildup. These infrastructure needs and services were proposed to be part of a multiyear funding program to ensure that Guam would be able to support the buildup and secure post-buildup sustainability. Investments by the United States Government in Guam's infrastructure for port upgrades, roads, and utilities are the essential first steps to ensure that significant construction efforts can be supported without detrimental impact to the local community.

We also note that the leaders in the United States Marine Corps have publicly stated that the establishment of live fire training areas on Guam is absolutely essential to the successful relocation of Marines from Okinawa. While the EIS identified two parcels of land on Guam currently under the control of the Government of Guam or private owners, the DOD defers a decision on land required to satisfy training and range requirements identified by the Marine Corps. Even with the successful purchases of the non-DOD lands identified in the EIS, the Marine Corps will not have a dedicated dud producing ordnance impact area, which limits heavy machine gun training. The current plan does not provide for an integrated combined-arms maneuver range, nor does it provide an area for amphibious landing beaches.

In addition, the current plan will provide limited Special Use Airspace, preventing close air support training. One proposed solution would be the use of Tinian Island and the Commonwealth of the Northern Mariana Islands, but to date, DOD has not identified or planned for projects in these areas to support training for a full spectrum of Marine Corps operations.

In consideration of these facts, we recommend that authorizations for the construction of future projects requested to support the movement of Marines to Guam be deferred until the DOD provides Congress with:

- (1) certification that tangible progress has been made to implement a final decision concerning the FRF considered acceptable to DOD and meeting the operational requirements for the United States Marines on Okinawa;

- (2) a certification that section 106 of the National Historic Preservation Act of 1966 (Public Law 89-665) consultation has concluded and a description of the proposed mitigation to support the culmination of negotiations;

- (3) a determination of requirements and estimate of the amounts for the upgrade of civilian infrastructure, facilities, and utilities that will be the funding responsibility of the Department of Defense;

- (4) a plan to address all civilian requirements for the support of the 8,000 Marines, their families, and the temporary construction workers on Guam;

- (5) tangible progress towards the acquisition of lands on Guam required to support Marines Corps training ranges; and

- (6) an updated master plan for the construction of facilities, infrastructure, and costs required to complete the relocation of Marines to Guam.

The agreement includes the House provision with an amendment deleting a restriction on architectural and engineering services and design funds. While the agreement imposes no restrictions on architectural and engineering services and construction design funds, such restrictions may be warranted in the future. The lack of restriction in this agreement for such funds to establish a homeport for a nuclear-powered aircraft carrier at Naval Station Mayport, Florida, should not imply a position either for or against homeporting. Such a position will be determined should military construction projects be included in future budget submissions. We will review carefully any such projects that may be included in future budget requests, while closely examining evolving military construction cost estimates needed to achieve this capability.

Technical amendment to reflect multi-increment fiscal year 2010 project (sec. 2205)

We note that the Statement of Administration Policy of May 27, 2010 indicates that “the Administration is committed to addressing the needs on Guam (both on base and off) to allow for the realign-

ment of Marines and their families from Japan. That effort requires a comprehensive government-wide approach". We share the concern that the Government of Guam does not have the capabilities to fully address the community infrastructure needs to support the relocated forces without adversely impacting Guam. We expect a Federal Government-wide approach to address community support deficiencies concurrent with support from the Government of Japan. We expect this Federal Government-wide approach to be evident in the President's fiscal year 2012 budget submission.

DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

Subtitle A—National Security Programs Authorizations

Overview

Title XXXI authorizes appropriations for atomic energy defense activities of the Department of Energy for fiscal year 2011, including: the purchase, construction, and acquisition of plant and capital equipment; research and development; nuclear weapons activities; nuclear nonproliferation activities; naval nuclear propulsion; environmental cleanup; operating expenses; and other expenses necessary to carry out the purposes of the Department of Energy Organization Act (Public Law 95–91). Subtitle B—Program Authorizations, Restrictions, and Limitations

Aircraft procurement (sec. 3111)

The House bill contained a provision (sec. 3114) that would authorize the Secretary of Energy to use fiscal year 2011 funds available for weapons activities to procure two aircraft.

The Senate committee-reported bill contained a similar provision (sec. 3115).

The agreement includes the House provision with a clarifying amendment that would allow the Secretary to use weapons activities funds for any fiscal year prior to fiscal year 2012 to purchase two aircraft.

The Secure Transportation Asset (STA) program is responsible for moving nuclear weapons, weapons components and special nuclear material for the National Nuclear Security Administration (NNSA). This mission is accomplished through the use of both ground and air transport. The STA program office is in the process

of replacing its aging aircraft fleet of DC-9s and C-9s with 737 aircraft. For the past 40 years various contractors have managed, operated, and maintained the aircraft to transport the weapons components, Department of Energy (DOE) and DOE contractor personnel, and other government employees as well as military and other representatives of foreign governments.

The previous contractor operators were certified by the Federal Aviation Administration (FAA) under part 119 of the FAA regulations, (14 CFR 119) as the aircraft were operating in both a public and civil aircraft status and were required to comply with the rules of both Part 121 or Part 135 of the FAA regulations. The FAA reviewed the operations of the STA in 2003 and determined that the aircraft must be operated under Part 119 and comply with Part 121 or Part 135 of FAA regulations. The FAA determined that this would be the case whether the aircraft were operated by a contractor or by pilots directly employed by the DOE or NNSA.

For future operations with the 737 aircraft, the NNSA has determined that it will no longer use a contractor to operate the new aircraft, but will utilize pilots employed by the NNSA and the contractor will manage and maintain but not operate the aircraft. In addition, NNSA has determined that it will self-regulate aircraft operations pursuant to DOE 440.2B, with oversight from the DOE Office of Aviation Management. This DOE order provides for self-regulation but requires that self-regulated aircraft operations operate in a fashion equivalent to FAA regulations. In this instance the DOE Office of Aviation Management would perform the oversight and inspection function currently provided by the FAA under the current and former contracts for operations, maintenance, and management. NNSA, however, has taken the position that because the 737 aircraft will be operated by pilots directly employed by the NNSA, the aircraft will be operated as public aircraft and the NNSA does not have to meet the equivalency requirements of Part 119 and Part 121 or 135. This appears to be contrary to the 2003 FAA determination and could result in a lower level of flight safety.

The Secretary of Energy and the Administrator of the NNSA are directed to consult with the FAA to determine whether the operations of the STA aircraft are public or civil operations, or a combination, and the appropriate equivalency standard under which the STA aircraft should be operated, maintained, and managed. In addition, the Secretary and the Administrator are directed to submit a report to the congressional defense committees that sets forth the FAA determination, the ability of the NNSA to meet the requirements of the DOE orders if NNSA will operate as a self-regulated entity, and whether the DOE Office of Aviation is capable of conducting FAA-like oversight and inspections. This report should be completed before 737 operations begin.

Biennial plan on modernization and refurbishment of the nuclear security complex (sec. 3112)

The Senate committee-reported bill contained a provision (sec. 3112) that would add a new section to the Atomic Energy Defense Act (division D of Public Law 107-314 as amended) to change the requirement for the biennial plan on modernization and refurbish-

ment of the nuclear security complex to require the plan in even-numbered years from the current requirement for the plan in odd-numbered years. In addition, the provision would require the plan to be submitted with the plan for maintaining the nuclear weapons stockpile.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would direct the Nuclear Weapons Council to conduct an assessment and analysis of the biennial plan and submit a report setting forth the results of that review to the congressional defense committees. The report would be due 180 days after the date on which the biennial plan is submitted. In addition, the amendment includes a series of technical changes.

Comptroller General assessment of adequacy of budget requests with respect to the modernization and refurbishment of the nuclear weapons stockpile (sec. 3113)

The House bill contained a provision (sec. 3121) that would require the Comptroller General to review the adequacy of funding contained in the budget request to achieve the goals contained in each Biennial Plan and Budget Assessment on the Modernization and Refurbishments of the Nuclear Security Complex required by section 3116 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84). The Comptroller would be required to submit a review to Congress 90 days after the submission of the budget request to Congress during even numbered years, consistent with the timing of the submission of the Biennial Plan and Budget Assessment.

The Senate committee-reported bill contained a provision (sec. 3111) that would require the Administrator of the National Nuclear Security Administration (NNSA) to include with the budget materials for the NNSA budget request an assessment of the adequacy of the budget request. The Administrator would be required to assess whether the budget requested for that year and the future-years nuclear security program for the weapons activities at the NNSA meets the programmatic requirements set out in the NNSA program plan documents. These documents include the annual stockpile stewardship plan known as the green book. The Administrator would be required to make this assessment in coordination with the Secretary of Defense and the Commander of the United States Strategic Command.

The Senate committee-reported bill contained a provision (sec. 3114) that would direct the Administrator of the National Nuclear Security Administration (NNSA) to establish a cost and schedule baseline for each nuclear weapon stockpile life extension program. The provision would also direct the Secretary of Energy to establish

a cost and schedule baseline for each defense funded construction project and for each defense environmental management project managed under the Department of Energy project management protocols with a value in excess of \$100.0 million. Each required cost and schedule baseline would be submitted to the congressional defense committees no later than 30 days after it is developed. If the cost of any project exceeds 125 percent of the cost baseline or if the time to complete the project will exceed 125 percent of the schedule baseline, the Administrator or the Secretary as the case may be shall notify the congressional defense committees within 30 days after any such determination is made.

Within 90 days of a cost or schedule breach, the Administrator or the Secretary as applicable shall notify the congressional defense committees if the project will be terminated or continued. If the project is continued the Administrator or the Secretary as applicable shall certify that a revised cost and schedule baseline is in place, that there is no alternative available other than to continue the project and still meet mission needs, and that a management structure is in place adequate to manage and control the cost and schedule of the project in the future.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would reduce the threshold for cost breaches for construction line items and covered Environmental Management (EM) projects to \$50.0 million. The amendment would eliminate the requirement to report schedule only breaches, and increase the threshold for the breach of the per unit cost of a life extension project to 200 percent. The life extension programs would thus be required to submit a notification if the total project cost exceeds 125 percent of the initial cost baseline or if the per unit cost exceeds 200 percent of the initial per unit cost baseline.
