

# Global experts on renewable energy and carbon reduction

At 3Degrees, we make it possible for businesses and their customers to take urgent action on climate change. We develop custom renewable energy and climate solutions to meet our clients at every step of their sustainability journey.

## CASE STUDIES

### VERISK

Verisk approached 3Degrees to help it develop and execute a plan to address its global greenhouse gas emissions. After assessing the best options in each market that balanced cost with quality, we were able to propose and transact on a diversified portfolio approach of EACs and carbon offsets. By achieving its goal of supporting renewable energy in the areas around the world where it conducts business and where the vast majority of its employees live and work, Verisk demonstrated its commitment to climate action to its stakeholders.

### MASTERCARD

Mastercard has a long-standing commitment to environmental responsibility, including a target of 100% renewable energy for its global portfolio. The company has 133 offices in 77 countries around the world; however, because it owns just four of these offices, Mastercard has to find creative ways to address its energy footprint for the vast majority of its locations. Every year, 3Degrees works with Mastercard to help it achieve its 100% renewable energy goal by investing in the highest-quality, country-specific products available at that given time.

### CONSUMER TECHNOLOGY LEADER - CONFIDENTIAL CLIENT

This global leader in consumer technology is committed to ambitious renewable energy goals and wanted a strategy to address its Scope 3 emissions by helping its global supplier network adopt renewable energy. 3Degrees created a scenario-planning tool to reflect a hierarchy of renewable energy procurement options to determine viability and impact across four countries. In addition, we drafted the client's first country-specific guides to renewable purchasing and translated the guides into three languages.

## GLOBAL CAPABILITIES

*3Degrees supplies EACs, RECs, Guarantees of Origin (GOs), TIGRs and I-RECs — as well as international carbon offsets -- to leading global organizations to help them meet their sustainability goals and reduce their carbon footprint.*

## A Call to Action

When 3Degrees was founded, 3° was often cited as a possible tipping point for climate change. Now we know we need to limit the increase in global temperature to 1.5°. While the specific target might change, our name is a strong reminder of the importance of our mission.

“The team from 3Degrees has been instrumental in helping us set goals, develop a strategy and implement projects. With their help we have been able to find new ways to invest in renewable energy that meet our business objectives.”

**DR. NICOLA PEILL-MOELTER**  
Senior Director of Environmental Sustainability, Akamai

“We have set a 100% renewable energy goal and we continue to hit it every year. We work with 3Degrees to find the best country specific methods we can - and every year it's a little bit different and gets better and better.”

**SIA XEROS**  
Environmental Sustainability Manager, Mastercard

## Why 3Degrees

- + **Proven leadership:** For more than 15 years, 3Degrees has focused on building a healthy market for renewable energy worldwide — working with developers to get new projects built, while playing a lead role in a number of industry associations.
- + **Comprehensive, customized solutions:** We've done business in over 65 countries, and are well equipped to help our clients source high-quality, global renewable energy products, including RECs, GOs, GECs, I-RECs, LGCs, and TIGRs. Our team of dedicated portfolio managers develop tailored renewable energy solutions that balance cost, technology, and geography preferences. We also offer renewable energy and climate consulting services, as well as a suite of solutions to address Scope 1 and Scope 3 emissions.
- + **Unique products:** When clients are interested in making a specific type of impact, we work together to design a renewable energy strategy that incorporates products that offer additional co-benefits.
- + **Reliability and integrity:** We provide every client with full transparency on the RECs, GOs, GECs, I-RECs, LGCs, and TIGRs they purchase — including technology, project site, and vintage. All of our North American RECs are third-party certified and meet or exceed Green-e® requirements.
- + **SDG specialist:** We work with companies of all sizes looking to meet SDGs 7 and 13 by addressing some or all of their global Scope 1, 2, and 3 greenhouse gas (GHG) emissions.

## 3DEGREES BY THE NUMBERS:

Founded 2007

1,200+ clients

67 countries  
where we buy,  
sell or consult  
on clean energy

300+ million  
GOs and RECs  
delivered to clients

15+ million  
verified carbon  
credits delivered

## Global Clients Include:

17 UN Sustainable Development Goals (SDGs), finalized in 2015, provide a framework for thinking about - and tackling - the world's most pressing sustainability challenges. At 3Degrees, we are focused on helping our clients address SDG 7 (affordable and clean energy) and SDG 13 (climate action) in their own businesses and throughout their supply chain.
