# The AI learning journey

Start at: learn.microsoft.com/ai

As AI capabilities continue to advance every day, learning how to use—and get the most from—AI technologies can be a game changer, but skilling up is a personal journey. What's your main learning goal?
Microsoft

Understanding AI

- General AI concepts and how it benefits individuals and organizations
- Responsible AI
- Get to know copilots

Preparing for AI

- Getting the organization ready to later use copilots and build AI apps

Using AI

- Using copilots
- Prompt engineering

Building AI solutions

- Embedding AI in apps withAzure AI Services and low-code development technologies
- Building your own copilots

Get skilling recommendations based on your role or learning goals

Microsoft

Understanding AI	Preparing for AI	Using AI	Building AI solutions
Start with a strong foundation. Learn AI concepts, definitions and key terms.	Gain essential knowledge to get your infrastructure ready to adopt copilots and build AI apps.	Discover skills to use copilots and maximize their benefits.	Learn how to build AI experiences into your own apps and services.

Find curated training resources based on your main professional focus

Business leader
Leads AI strategy and adoption in an organization.

Technical leader
Leads AI strategy and adoption, with a focus on technology adoption.

Business user or functional consultant
Uses AI technologies, like copilots, or helps implement AI technologies.

Developer, AI engineer, or software architect
Builds AI solutions and apps.

Citizen developer
Builds low-code AI apps.

Data scientist or ML engineer
Implements data science and machine learning solutions.

Data engineer or data analyst
Implements end-to-end analytics and data engineering to prepare for AI solutions.

IT professional
Takes care of infrastructure needed to implement, deploy, secure, and manage AI solutions.

Or answer a few simple questions to get tailored training recommendations for your needs
