

PROFESSIONAL SERVICES

Migration Accelerator Service

Engagement Objectives

Confluent's Migration Accelerator Service is a six-week engagement designed to help you quickly assess, scope and prepare for migration execution. Confluent will work with your team to create a migration design, assess and harden the platform, while removing any technical roadblocks, ensuring enterprise readiness for a successful migration. By having Confluent Professional Services experts work with your team, following established best practices, you can accelerate the desired migration and time to value.

For the engagement to be most beneficial, we encourage key members of the team to complete some training beforehand to ensure familiarity with relevant concepts. Visit www.confluent.io/training to learn the fundamentals of data streaming and Apache Kafka®.

Benefits of the Engagement

Accelerate Time to Value

Accelerate Confluent adoption to ensure you maximize the value you realize from Confluent

Quality Assurance & Risk Mitigation

Reduce risk of rework through expert guidance on best practices and recommendations for a successful migration

Who Should Attend?

- Project Owner
- Executive Sponsor
- Product Owner
