

Siloed workflows: How disconnection hinders digital innovation

#### Tool sprawl and siloed teams are all too common

A survey of attendees at a Dynatrace cloud innovation event in Europe showed:

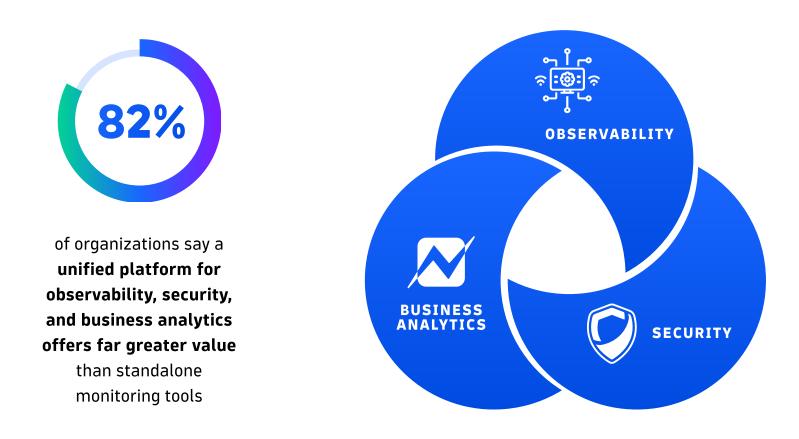

### It's difficult for teams to work together to solve problems quickly

#### Organizations need to consolidate fragmented monitoring tools and create a single source of truth for all teams

and create a single source of truth for all teams

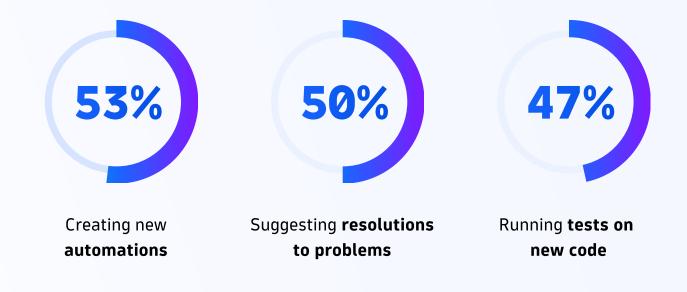

#### Organizations are exploring where AI can make DevOps more effective

### **51%**

of organizations will use generative AI to enhance DevOps in the next 12 months

The most common DevOps workflows organizations plan to enhance with generative AI are:

## But generative AI has limitations that must be overcome before it can drive DevOps value

prompts

Risk of **AI** hallucination 41%

Inability to explain answers, so teams need to manually verify outputs
