

Help rewrite your plan's quality story

Verily Onduo is a virtual solution that can offer your members timely and effective support for managing chronic conditions*, such as type 2 diabetes — anytime, anywhere. In doing so, we can help your health plan improve care management access and achieve quality metrics, such as patient experience.

Through delivery of guideline-based¹ care management for supporting better population health with chronic conditions*, **partnering with us could help change your quality narrative.**

Precision care management

Supporting better health outcomes

Fueled by self-reported, device and payor data, our care team and app offers personalized approaches to help members manage their conditions over time. When this holistic data analysis meets human-centric care, people can realize better outcomes.²

Accredited virtual clinic

Extending your specialist network

Our virtual clinic – URAC®-accredited in telemedicine – means members have access to board-certified healthcare professionals (when clinically indicated) in the palm of their hands, enabling the expert, one-on-one consultations needed for managing care in higher acuity patients.

Medication management

Closing gaps and boosting adherence

Care teams identify care gaps or savings possibilities through medication reviews with members (when clinically indicated) and pharmacy integration data. And we help members overcome barriers and stay on track through primary care collaboration, in-app notifications** and pharmacist consults (when clinically indicated).

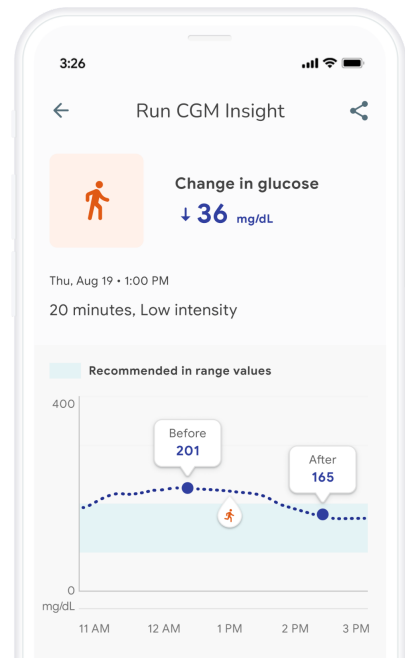

Health technology and data

Enabling timely support and self-care

People living with a chronic condition may lack or avoid care. Verily Onduo can help members easily track medication, meals, glucose readings, etc., with the app and connected devices, which enables timely support and daily self-care for lasting healthy habits and results.

Capturing and utilizing health data

Our expertise in data science helps support better clinical decisions and chronic care management. Plus, we strive for novel evidence generation that may lead to quality care for influencing quality metrics.

Your partner for quality chronic care* management.

Connect with an expert for details tailored to your health plan.

*Verily Onduo is a virtual care management solution for people with type 1 or 2 diabetes and hypertension (comorbid with T2D), as well as pre-diabetes and healthy weight through partnership with [Good Measures](#).

**Not intended for use as a medication reminder system. Members should defer to their prescribing physician's instructions and adjust their in-app medication list per wrong notifications.
