Utility & Design Patents

Much of Bang & Olufsen's innovation is embodied in its Intellectual Property. We have a long history of devoting extensive resources to both research and development as well collaborating with some of the world's most famous designers to challenge us with what is possible. Recently, we have begun to bring much of our development and design work back in-house, hiring key teams to develop our technology and design footprint. Our IP portfolio, including both utility and design Patents, reflects this investment in innovation and showcases our drive toward becoming global leaders in timeless luxury technology.

In accordance with 35 USC 287(a), notice is given by Bang & Olufsen of the patent protection associated with each of our products listed below. This is a non-exhaustive list of our patent and design registrations.
