BACK TO WORK SAFELY

COVID-19 has changed our world and our organization. As we begin returning to the workplace, it's up to each of us to protect ourselves and each other.

- Stay up-to-date on current COVID-19 information and recommendations.
- Follow our organization's policies on returning to work.
- Continue to wash your hands and practice social distancing.
- If you're at greater risk for illness, talk to your manager about other work arrangements.
- If you have symptoms of COVID-19, stay home and seek proper treatment.
- If you've been exposed to the virus, take precautions and get tested.

We have faced the pandemic challenge together, and together we'll get through it. If you have concerns about health or safety in our workplace, speak up to your manager or an internal resource.
