

BE SAFE,

BE READY

No workplace is immune from potential violence. But if you're prepared, you won't be helpless in a violent situation. To protect yourself and everyone around you:

- Follow our security policies and procedures without exception.
- Watch for and report suspicious activity or warning signs of violence.
- If your workplace has on-site alarms, know how to activate them.
- Know the exits and evacuation plans for your location.
- Identify multiple areas where you could go to be secure or concealed.

Maintaining a safe workplace requires action from each of us. It's all about being aware, prepared to take action and willing to speak up about potential violence. Reach out to an appropriate internal resource.
