

Accelerate Time-to-Value and Enhance Expertise with ExtraHop Professional Services

ExtraHop Professional Services deliver product and domain expertise in networking and security to reduce time-to-value. By providing services throughout your lifecycle—from the initial deployment through long term utilization—ExtraHop Professional Services reduce time-to-value and ramp-up time. Utilizing Professional Services gives you much needed confidence and peace of mind.

A credit-based system provides you with peace of mind from knowing exactly what you need at the time of purchase. Relax, we have you covered.

ExtraHop's Professional Service bundles come in three sizes, designed to fit all your needs. Buy either a starter, standard, or advanced credit bundle and then draw down from that pool of credits for any services you require—from training, "QuickStarts," and integrations—for up to a year from the purchase.

No need to know which services you want up front, use credits for any service components you need.

 <p>Starter 60 CREDITS</p> <p>The starter credit bundle is intended to provide a base level of credits with which you will rapidly implement, and integrate ExtraHop into their existing environment.</p>	 <p>Standard 100 CREDITS</p> <p>The standard credit bundle is intended to provide you with enough credits to integrate and deploy ExtraHop into the environment, drawing from several predefined use cases, training, and integration options.</p>	 <p>Advanced 150 CREDITS</p> <p>The advanced credit bundle is intended to provide you with ample credits to implement a fully customized solution—optimized to your unique environment and needs.</p>

Implement, Train, and Integrate ExtraHop with Expertise and Efficiency

ExtraHop provides three critical service capabilities to assist you with rapidly implementing desired use cases, training staff to be proficient in the ExtraHop platform, and expertly integrating and optimizing the ExtraHop platform into your existing technology stack.

 <p>QuickStarts</p> <p>QuickStarts enable rapid time-to-value to implement one of ExtraHop's top use cases. A consultative engagement provides you with all the components relevant to getting up and running quickly, efficiently, and with less complexity.</p>	 <p>Training</p> <p>Training capabilities provide you with the most flexible options to get your staff proficient in the ExtraHop platform, and enable rapid adoption across APM, NPM, and security use cases.</p>	 <p>Integrations</p> <p>Integrations maximize your investment in ExtraHop by incorporating the platform across your security and performance tool sets to capitalize on insights, analysis, and investigative capabilities.</p>
