5 EASY TIPS TO PROTECT OUR PROPERTY HIS WINTER

DON'T LEAVE YOUR TENANTS OUT IN THE COLD

Did you know?

Prevent Sprinkler Pipes from Freezing

- Keep heat above 40°F (4°C)
- Inspect, test and maintain fire sprinkler system
- Confirm building envelope integrity, such as no broken windows

Remind "seasonal occupants" about winterization procedures

- Shut off the water
- Maintain heat above 55°F (13°C) in unoccupied units
- Establish notification procedures with tenants

Clean and clear roofs, gutters and drains

- Establish plan for roof snow removal
- Evaluate roof snow load capacity
- Inspect roof for structural or maintenance issues

Sign proper contracts with professional snow removal vendors before winter starts

- Validate appropriate risk transfer - Define contractor responsibilities

Hire a certified, professional chimney sweep to clean and inspect your chimneys annually
