

Release Statement

Interim: Unconstrained and constrained estimates of 2021-2022 total number of people per grid square, adjusted to match the corresponding UNPD 2022 estimates and broken down by gender and age groups (1km resolution), version 1.0

12 November 2022

These interim datasets were produced by [WorldPop](#) at the University of Southampton. These data include gridded estimates of population at approximately 1km for 2021 and 2022. These datasets results were produced based on using the spatial distribution of [unconstrained](#) and [constrained](#) population datasets for individual countries for 2020 datasets with country totals were adjusted to match the corresponding official United Nations population estimates, that have been prepared by the Population Division of the Department of Economic and Social Affairs of the United Nations Secretariat ([World Population Prospects 2022](#)) for the relevant years, and broken down by gender and age groups. The work and geospatial data processing was led by Bondarenko M., Tejedor-Garavito N., Priyatikanto R., Sorichetta A.. Oversight was provided by Tatem A.J.

These data may be distributed using a [Creative Commons Attribution 4.0 International \(CC BY 4.0\) License](#), specified in legal code. Contact release@worldpop.org for more information.

The authors followed rigorous procedures designed to ensure that the used data, the applied method and thus the results are appropriate and of reasonable quality. If users encounter apparent errors or misstatements, they should contact WorldPop at release@worldpop.org.

WorldPop, University of Southampton, and their sponsors offer these data on a "where is, as is" basis; do not offer an express or implied warranty of any kind; do not guarantee the quality, applicability, accuracy, reliability or completeness of any data provided; and shall not be liable for incidental, consequential, or special damages arising out of the use of any data that they offer.

CITATION
