ACM Transactions on Internet Technology

Publishing the leading research in Internet-based distributed systems

Information For Contributors

ACM Transactions on Internet Technology (TOIT) is a scholarly, scientific journal that publishes original research papers that develop innovative technologies for the design, use, analysis, engineering, services, and governance of Internet. Established in the Summer of 2001, the journal has emerged as one of the premier venues in Internet computing, networking, systems, applications, security, and public policy research.

TOIT brings together many computing disciplines that contribute to Internet systems and technologies, including computer software engineering, computer programming languages, computer middleware and systems, computer networking and communications, database management, distributed systems, knowledge discovery and data mining, machine learning and AI as a service, security, privacy, performance and scalability, etc. Specifically, TOIT welcomes the innovative research results from both the individual disciplines and the interactions among them. Example topics include but are not limited to:

- **Principles and techniques.** Topics include artificial intelligent systems and services, business process management, norms and compliance, block chain technologies, systems and applications, crowd computing, data analytics and data mining, distributed systems, edge computing and cloud computing, multiagent systems, knowledge graphs and linked data, learning representation and algorithms, personalization, provenance, peer to peer computing, service-oriented systems, visualization.
- Applications. Topics include cyber-physical systems, e-government, entertainment, electronic commerce, healthcare, Internet of things, service ecosystems, search, social media, social networks, collaboration, and ubiquitous and mobile computing.
- Cross-cutting considerations. Topics include security, trust, and privacy, data science, network science, and Web science.
- Social milieu. Topics include Internet crime, law and regulations, governance, and participatory design.

ACM Transactions on Internet Technology

Editor-in-Chief

Ling Liu College of Computing, Georgia Institute of Technology, USA

Associate Editors

Tarek Abdelzaher Department of Computer Science, University of Illinois at Urbana-Champaign, USA

Karl Aberer School for Computer and Communication Science, Ecole Polytechnique

Federale de Lausanne, Switzerland

Sibel Adali Department of Computer Science, Rensselaer Polytechnic Institute, USA

Abraham BernsteinDepartment of Informatics, University of Zurich, SwitzerlandElisa BertinoDepartment of Computer Science, Purdue University, USAPaolo BoldiComputer Science Department, University of Milano, ItalyAthman BouguettayaSchool of Computer Science, University of Sydney, Australia

Keke Chen Department of Computer Science and Engineering, Wright State University, USA

Songqing Chen Department of Computer Science, George Mason University, USA

Kimberly C. Claffy Center for Applied Internet Data Analysis (CAIDA), USA

Schahram DustdarDistributed Systems Group, Vienna University of Technology, AustriaWilliam EnckDepartment of Computer Science, North Carolina State University, USA

Bugra Gedik Department of Computer Engineering, Bilkent University, Turkey

Aditya K. Ghose School of Computing and Information Technology, University of Wollongong, Australia

Manfred Hauswirth Technical University of Berlin, Germany

Kristina Lerman Information Sciences Institute, University of Southern California, USA

Ninghui Li Department of Computer Science, Purdue University, USA

Patrick Loiseau INRIA Grenoble Rhone-Alpes, France

Daniel A. Menasce Computer Science Department, George Mason University, USA

Bamshad Mobasher School of Computing, DePaul University, USA

Javed Mostafa School of Information and Library Science, University of North Carolina, USA

Max Muhlhauser Informatics Department, Technische Universitat Darmstadt, Germany

Surya Nepal The Commonwealth Scientific and Industrial Research Organisation (CSIRO), Australia

Tamer Ozsu School of Computer Science, University of Waterloo, Canada

Julian Padget Department of Computer Science, University of Bath, United Kingdom

Calton Pu College of Computing, Georgia Institute of Technology, USA

Vijay V. Raghavan

Center for Advanced Computer Studies, University of Louisiana at Lafayette, USA

School of Computer Science and Informatics, Cardiff University, United Kingdom

Eve M. Schooler Intel, USA

Anna C. Squicciarini College of Information Sciences and Technology, Pennsylvania State University, USA Department of Computer Science, University of Illinois at Urbana-Champaign, USA

Pinar Yolum Universiteit Utrecht, Netherlands

Albert Y. Zomaya School of Computer Science, University of Sydney, Australia

Information Director

M. Emre Gursoy College of Computing, Georgia Institute of Technology, USA

The ACM Digital Library (DL) is the most comprehensive collection of full-text articles and bibliographic records in existence today covering the fields of computing and information technology. The full-text database includes the complete collection of ACM's publications, including journals, conference proceedings, magazines, newsletters, and multimedia titles.
