

# Microsoft Edge for Business is a secure enterprise browser

Fits a Zero Trust architecture

Configuration settings with Microsoft Edge management service

DLP features to block actions on data

Unmanaged device support with Microsoft Intune Mobile Application Management

Phishing protection with Microsoft Defender SmartScreen

Secure AI chat experience with Copilot in Edge

## Mitigating browser cyber risk is imperative

Users spend over 55% of their time in the browser accessing trusted or untrusted content

38%\* increase in global cyber-attacks on corporate networks
