

Join us for the inaugural FPF DC Privacy Forum! This one-day event will center around the theme, “Preparing for AI & Privacy for the Next 5 Years” and will feature distinguished speakers leading breakout sessions on important AI topics and what privacy professionals should be thinking about in the years to come. The FPF DC Privacy Forum precedes the FPF Annual Advisory Board Meeting, so sponsors will have an extra day to connect and network with industry thought leaders who will attend both events.
