

A quality Geoscape offering

Custom Data Solutions

Spend time using spatial data, not creating it

Location data is an essential tool for businesses and government – a key ingredient in planning services, decision making, and meeting the needs of the modern economy.

Geoscape Custom Data Solutions gives you flexibility to access specific, reliable and valuable location data tailored to your use. You can access whatever slice of spatial data you need, when you need it.

Powerful and scalable

Supported by the governments of Australia and underpinned by more than 20 years of experience in sourcing and maintaining critical national data sets, the Geoscape team can help you harness the power of location data.

Geoscape delivers a comprehensive representation of Australia's built environment. It describes the addresses, land, buildings and transport networks across Australia's 7.6 million square kilometres.

Spend less time wrangling data and allow our team to deliver fit-for-purpose data solutions tailored to your business, enabling you to focus on responding to ever-changing business and market needs.

Our highly scalable, cloud-based platform means we can harvest, validate, transform, standardise and deliver spatial data to meet your needs.

Geoscape's Custom data Solutions offers:

- trusted spatial data expertise
- access to any part of Australia
- sovereign data
- reliable data from a single source
- a connected data ecosystem
- packaged data that is ready to use
- delivery via data downloads or APIs

We offer a clear picture of our country's complex cities, regional centres, and rural communities. Get the data foundations for Australia you need, when you need it.

Quality and reliability

1 Focus on your business, while we take care of the data

Overcome the challenges of sourcing location data and combining data sources that are often fragmented by region and type. Get full access to comprehensive, standardised vector features and rich attribution, aggregated from more than 100 authoritative datasets from private and public sources. Spend time using the data, not creating it.

2 Make geospatial insights accessible

We are a team of geospatial experts. We'll remove the complexity of dealing with geospatial data. Our data is available in a variety of industry-standard formats, making it easier for you to use our location data and gain valuable insights.

3 Save time and increase productivity

Geoscape covers the entire Australian continent. For your area of interest, Geoscape has it covered – no matter how big or small. Our reliable data comes with a suite of integration options. We deliver the precise slice of customised data you need, so you can save time and effort.

4 Simple, single licence

Whatever your need, big or small, one dataset or multiple datasets, everything is available under a single, easy to understand licence.

5 Choose from any of the existing Geoscape datasets

Our data is unique. It represents the buildings, land, address, transport, surface cover, land parcel, administration and postcode boundaries across Australia. It's standardised and verified. Enhance your location analysis capabilities for better business decision making.

How it works

Work with our geospatial experts to get the custom data solution that fits your unique business objectives or project needs. We'll match the best data to your requirements.

Custom Data Solutions come with:

- a single licence
- choose from a full dataset or just focus on changes
- reports and product guides

Looking for a bespoke data solution or a way to integrate our high-quality datasets into your tech environment? Ask us about our [Managed Data Services](#).

Geoscape delivers the power of location to business and governments. Geoscape Australia is an independent and self-funded company owned by the governments of Australia.
