

## FAQs

---

This section includes frequently asked questions (FAQs) (and their respective answers) about the Priva product family. Use these FAQs to answer common questions about Microsoft Priva or further educate yourself on the offering.

### 1. What does the suite of products cover?

The suite covers a wide range of privacy-related functionalities, including automated privacy assessments, tracker compliance capabilities, privacy risk mitigation, consent management, and data subject rights requests.

### 2. Are the products customizable to suit our specific privacy needs?

Yes, the products are customizable to align with your organization's unique privacy requirements and regulatory environment. You can configure settings and policies, as well as deploy branded consent models and subjects rights request forms to tailor the solution to your exact needs.

### 3. How do the products ensure compliance with relevant regulations such as General Data Protection Regulation (GDPR) or the California Consumer Privacy Act (CCPA)?

The products are designed to adhere to regulatory standards and provide the flexibility needed to comply with regulations such as GDPR and CCPA.

### 4. What kind of support and training options are available for implementing and using the privacy suite?

We provide comprehensive support and training options to ensure successful implementation and utilization of the privacy suite. This includes training sessions, documentation, and ongoing technical support to address any questions or issues that may arise.

### 5. How scalable are the privacy products as our data volumes and privacy needs grow?

The privacy products are designed to be highly scalable, capable of accommodating growing data volumes and evolving privacy needs using the power and reach of Microsoft Azure. Whether you're a small startup or a large enterprise, the products can scale horizontally and vertically to meet the demands of your expanding data ecosystem.

### 6. What's the difference between Microsoft Priva and Microsoft Purview?

Purview is a data governance platform that helps you manage and understand where your data resides. Priva is a suite of solutions that address top-of-mind needs within data privacy compliance operations.
