

DOWNLOAD VIA ETHERNET OR WI-FI CONNECTION

Follow the steps below for a terminal software download via ETHERNET (IP) or via your Wi-Fi Network.

1.	From the idle prompt press the Green OK key to access the Core Menu.
2.	Press #4 for UTILITY <i>* If prompted input password, default is 1234</i>
3.	Press #2 for SOFTWARE DOWNLOAD
4.	Press #1 for CONNECT
5.	Select your communication method, ETHERNET or Wi-Fi. (For Non Touch Screen Devices once your selection is highlighted press the Green OK button.)
6.	Press 2 for Partial
7.	The terminal will display TPN: and show a 10-12 digit number. ** DO NOT CHANGE THIS NUMBER ** - Press OK. <i>* If there is no number showing after TPN: please call Technical Support 1 (877) 358-6797</i>
8.	Terminal will display Apply Updates? Select YES (F2 for Non Touch Screen Devices)
9.	You have completed the software download. Your terminal will install the software and reboot, you will know it is completed when it comes back to the idle prompt.
