iPOSpays
Payment Gateway Services

iPOSpays for Restaurants
Your all-in-one payment solution.

Comprehensive Payment Solutions
From website payment buttons to CloudPOS for MO/TO orders to countertop and hand-held devices for in-store payments and tap-to-pay for deliveries.

Easy Multi-Location Reporting
Perfect for merchants with multiple locations, our portal offers a comprehensive view of sales across all locations and devices.

Simple Tip Management
Restaurant owners can adjust tips even after they settle the batch. They can also tag server IDs or table numbers to transactions to quickly generate tip reports. Servers can also track their tips directly from the POS, enhancing efficiency and accuracy.

Convenient Website Integration
Integrate our payment page into your website for table reservations and advance payments for catering orders.

Effortless Accounting with QuickBooks
Say goodbye to manual entry and errors. Experience real-time posting with our seamless QuickBooks integration.

Increase Customer Reviews
Organic online reviews can boost traffic to your restaurant. We make it easy for you to collect those social media reviews with an integrated feedback screen on your POS, allowing your customers to input their feedback and post it to the portal upon checkout.

SIMPLIFY YOUR RESTAURANT'S OPERATIONS.

Send payment links from virtual terminals and POS devices, tap-to-pay for delivery; tip adjust after batch is settled, easily split payments, allow multiple payments for the same tab, charge no-shows with card tokenization during booking, and view sales across multiple locations in one centralized platform. iPOSpays has all your restaurant needs covered!

Have questions or need help?
A dedicated team member will guide you every step of the way.
