

## ~ Supporting Open Science in Japan ~

Japan Link Center Strategies	Actions to implement the strategy
<p>1. Develop a system for registering and utilizing DOIs that corresponds to Japan's academic resources, academic environment, language and more, while supporting international collaboration.</p>	<p>1-1. Develop a DOI registration infrastructure for Japan's academic resources. 1-2. Provide flexible DOI registration support to members.</p>
<p>2. Promote DOI registration for the various resources needed in academia.</p>	<p>2-1. Maintain metadata registration information to support DOI registration for various resources used by researchers. 2-2. Promote DOI registration for various resources relevant to users.</p>
<p>3. Promote open use of DOIs and metadata.</p>	<p>3-1. Cooperate with other ID services to strengthen the linkage with academic infrastructure and information services. 3-2. Enhance the metadata search function in JaLC and provide the status of DOI usage. 3-3. Collect users' opinions, and aim to develop services in line with changes in the research environment.</p>
<p>4. Promote the utilization of research data to advance open science efforts.</p>	<p>4-1. Promote the usage of research data by cooperating with domestic and international organizations on research data DOIs. 4-2. Strengthen our collaboration with the Research Data Utilization Forum (RDUF).</p>
<p>5. Contribute to the revitalization of the academic community that utilizes DOIs.</p>	<p>5-1. Facilitate communication among users and deepen understanding of DOIs through events and other means to promote the utilization of DOIs.</p>
<p>6. Achieve transparent and sustainable organizational management that responds to the needs of the community.</p>	<p>6-1. Examine and expand our role as a Japanese academic infrastructure organization responsible for DOI registration, to ensure the long-term operation of DOIs.</p>
