Office of the Chief Technology Officer FY2017

Agency Office of the Chief Technology Officer Agency Code TO0 Fiscal Year 2017

Mission Direct the strategy, deployment, and management of D.C. Government technology with an unwavering commitment to I.T. excellence, efficiency, and value for government, residents, businesses and visitors.

2017 Strategic Objectives

Objective Number	Strategic Objective
1	Enhance the quality, availability, and delivery of information and services to residents, employees, businesses, and government - Better enable agency customers, stakeholders and the public to scrutinize and engage on key IT decisions and performance.
2	Enable and improve the availability and integration of information - Provide integrated information services across the district and promote the adoption of data, process, and vocabulary standards.
3	Provide a secure and trusted IT environment - Secure critical data and infrastructure using methods consistent with best practices of leading and public and private organizations. Enhance confidentiality, integrity, and availability of IT resources through: Protecting IT assets and resources from unauthorized access or misuse. Enhancing security awareness district-wide. Ensuring that IT security is incorporated into the lifecycle of every IT investment.
4	Implement an enterprise approach to information technology infrastructure and common administrative systems that will foster innovation and collaboration. Establish a basis for consolidated infrastructure to achieve interoperability and communication among operating divisions. Improve the performance of district Information Technology personnel and enable the unification and simplification of similar IT business processes and services within and across operating divisions and maximize the value of technology investments through enterprise-wide procurement and licensing.
5	Achieve excellence in IT management practices - Strengthen districtwide enterprise-wide processes for collaborative IT strategic planning, capital planning, and investment control. Develop an IT human capital plan to guide the recruitment, retention, and skill development of staff. Establish and maintain IT policies and SOPs to ensure compliance with federal regulations and district legislation. Guide citywide IT investments to yield the maximum benefits at the lowest possible costs.

Enhance confidentiality, integrity, and availability of IT resource nauthorized access or misuse. Enhancing security awareness district-vecycle of every IT investment. (6 Activities)	es
OC NET	DC-NET	Supplies a fiber-optic telecommunications platform serving as the core foundation an dprimary backbone conduit of all technology and telecommunications services used by District employees and manages secure voice, video and data services.	Daily Service
NFORMATION SECURITY	Information Security	Manages and maintains an information security architecture that mitigrates security vulnerabilities with the DC Government's technology infrastructure; provides a secure applicaiton and network environment for all District government agency systems.	Daily Servic
OC Network Operations Center	DC Network Operations Center	Provides around-the-clock monitoring of critical data, wireless and voice network components, along with server and web applications; also provide after-hours and weekend call center services that support multiple agencies.	Daily Servic
NTEGRATED PLATFORM SERVICES	Mainframe Operations	Provides reliable, secure and efficient computing environments with sufficient resource capacity to meet the inforamtion processing requirements of the mainframe applications in OCTO's data centers.	Daily Servic
DATA CENTER FACILITIES	Data Center Facilities	Maintains the premises for OCTO's data center sites, including facilities operations and upgrade, resource allocation and access control, power management and site security.	Daily Servic
DENTITY MANAGEMENT SYSTEMS	Identify Management Systems	Manages the District's identity and access management systems used in support employees and District residents, provides PIV-1 (Personal Verification Interoperatability) solutions for DC government agencies seeking to isue and use highly security PIV-1 credentials, and operates the DC One Card (DC1C) cernters that provide identify cards for citizens.	Daily Servic
foster innovation and collaborat among operating divisions. Imp simplification of similar IT busin	ion. Establish a basis rove the performand less processes and s	n technology infrastructure and common administrative systems that s for consolidated infrastructure to achieve interoperability and commuse of district Information Technology personnel and enable the unifica ervices within and across operating divisions and maximize the value ocurement and licensing. (6 Activities)	unicati tion an
AGENCY MISSION FOCUSED APPLICATION SOLUTIONS	Applications Solutions - DMV	Provides systems development, maintenance and new functioal enhancement for Department of Motor Vehicles' (DMV) business application.	Daily Servic
NTERPRISE HUMAN RESOURCE PPLICATION SERVICES	Human Resource Application Services	Operates the Human Capital Management technology used by all District employeement and DCHR.	Daily Service
ENTERPRISE PROCUREMENT APPLICATION SERVICES	Procurement Application Services	Supports the Office of Contracting and Procurement by maintaining and enhancing the Procurement Automated Support System (PASS) which enables purchasing, receiving of goods, and contract compliance for all District agencies; delivers a centralized workflow for the procurement function of the District government.	Daily Servic
APPLICATION SERVICES & OPERATIONS	Web Maintenance	Establishes, maintains, and implements standards, guidelines, policies and procedures for maintaining DC.GOV web portal, which has over 100 District agency websits and is visited over 25 million times a year by District residents, businesses and visitors.	Daily Service
CITYWIDE MESSAGING	Email (citywide messaging)	Provides collaborative email services engineering, operations management and modernization for entirety of the District government; manages mobile messaging systems engineering and operations.	Daily Service
T SERVUS	OCTO Helps	Provides around-the-clock support of desktop products and services for District agencies with certified technicians who apply industry best practices with industry-level software tools, combined with service-level agreements	Daily Service

5 - Achieve excellence in IT management practices - Strengthen districtwide enterprise-wide processes for collaborative IT strategic planning, capital planning, and investment control. Develop an IT human capital plan to guide the recruitment, retention, and skill development of staff. Establish and maintain IT policies and SOPs to ensure compliance with federal regulations and district legislation. Guide citywide IT investments to yield the maximum benefits at the lowest possible costs. (5 Activities)

STRATEGIC INVESTMENT SERVICES	Strategic Investment Services	Provides program budget cooridnation and identifies and monitors the agency's ongoing priorities and critical new capital investments.	Daily Service
AGENCY TECHNOLOGY OVERSIGHT & SUPPORT	Program Management Office	Provides management, business consulting services and business application support to agencies to effectively develop and maintain new technology applications and improve service delivery through effective integration of technology solutions.	Daily Service
DIGITAL INCLUSION INITIATIVE (DII)	Digital Inclusion Initiative	Leads OCTO efforts to foster technology inclusion throughou outreach and coordination by developing specialized services, public events, and engagement campaigns to empower District residents and small businesses to embrace an expanding digital landscape.	Key Project
GOVERNMENT CLOUD SERVICES	Enterprise Cloud and Infrastructure Services	Delivers a cost-effective, highly available and scalable cloud computing platform capable of meeting the District's current and future demands.	Daily Service
TELECOMMUNICATIONS GOVERNANCE	Telecommunications Governance	Manages a portfolio of approved vendors and contract vehicles to purchase telecommunications products and services, complying with procurement guidelines and works with all District agencies to monitor and certify telecommunications inventories.	Daily Service

Develop CIO Council for Agency CIOs and IT Managers Establish a Startup Accelerator Program to provide free hosting services for qualified by a service for qualified by a servi	Launch Common Internet of Things (IoT) Enabled Smart	technology communities of interest, business, and the public to address city challenges through smart city efforts across the key focus areas of transportation, energy and environment, public safety, healthcare, urban planning, infrastructure and economic development. Under OCTO's leadership, Smarter DC has begun to: • Define the use of enterprise connectivity services and the approach of leveraging shared resources across city agencies and public utilities. • Provide a citywide guidance framework and standards for application deployment that will maximize interoperability and capability sharing across the enterprise environment. • More efficiently prioritize, coordinate, design, and deliver smart city initiatives that are achievable, cost effective, sustainable, and aligned with public needs. • Demonstrate a model for showing metric-based results of project deployments and capability performance. • Define a data architecture that provides transparency of how smart city data will be stored, protected, and used, and maximizes its accessibility, usability, and impact. Through Smarter DC, the next generation IT investments are already being planned in a coordinated way that leverages OCTO's technical expertise and the Agencies' functional expertise.	09-30-2017

Platform	Internet Portal Upgrade to	The current administration inherited DC.Gov design from previous administration. The Drupal Content Management System (CMS) requires upgrading to V 8.0 in order to avoid end-of-support issues Failure to upgrade will result in obsolete and unsupported functionality and security Risk. The upgrade will allow enhanced functionalities: - Continue to support unified web portal - Optimum, contemporary online experience with DC.gov - More easily build web applications & web forms - Improved presentation of communications during emergencies	09-30-2017
CITYWIDE MESSAGING (1 Strategic Initiative-Operation Link)	Enhancements to the eMOU	the provisioning of access for their agency users. OCTO will roll out this capability and begin to train and on board	09-30-2017
	CITYWIDE MES	SAGING (1 Strategic Initiative-Operation Link)	

Deploy Cloud Based Communications and Collaboration	Email is a mission-critical infrastructure component in business environments throughout the government. Because e-mail servers are aggregation points for data and are critical to the day-to-day operations of most government agencies, security is of the utmost interest in the Department. E-mail has become the most common vehicle for virus infections, and was the means of entry in the majority of virus incidents this past year. In FY2017 OCTO will execute an enterprise agreement with Microsoft to migrate all district employees over to Office 365 • District will migrate to Office 365. OCTO will work closely with the CIO Council to transition agencies over to Office 365 and provide user training • Two Factor Authentication for email will be enabled for all district employees to increase security • Active Directory Consolidation will be done in coordination with Email migration to ensure all email accounts are under one domain. A shared AD infrastructure enables user mobility, common user provisioning processes, consolidated reporting, unified management of machines, etc. • Deploy Microsoft Lync as a Chat/Collaboration tool across the district Cloud based data storage • Offer One Drive as part of the Office 365 license for document storage online and SharePoint Online for team collaboration • Offer Box as a cloud based shared folder solution for Agency Operations as needed	09-30-201
DATA CENTER F	ACILITIES (1 Strategic Initiative-Operation Link)	
Geographically Diverse Data Center Availability	Create third Data Center as Disaster Recovery (DR) location in the cloud will provide complete high availability of all mission critical applications in the event of a disaster: - Evaluate options to migrate DR functions to the cloud through a cloud provider - Create a DR location outside of the 50 mile radius blast zone - Industry standard for critical applications is to have 3-2-1 rule	09-30-201
DATA TRANSPA	RENCY&ACCOUNTABILITY-CDW (2 Strategic initiative-operation links)	
Improved data quality and increased speed of data delivery	Reorganize data team from traditional structure to be more aligned to deliver analytics. OCTO's Chief Data Officer (CDO) will oversee a DC Data Team comprised of data analysts at any/all agencies to ensure a common architecture/framework and a standard tool set is leveraged.	09-30-201
to agencies and public	This will help drive down long term costs for the district, allow for better terms on enterprise contracts and will reduce risk by allowing multiple folks to be cross trained across the district.	
	The CDO will work in coordination with the DC Data team to answer:	
	 How can we do more with the data we have? How can we augment that data, by supplementing and complementing it with data from partnerships or other external sources? How can we derive viable insights from that data? • How can we take advantage of those insights in the existing business model? 	
	 How can we leverage those insights across existing and new business partnerships? How can those insights open new opportunities and business models for the district? 	
Build Enterprise Data Analytics Platform for DC Government	Build and provide easy to use tools for agencies to access analytics and performance dashboards easily. The district will centralize investments in data analytics tools and data platforms.	09-30-2017
Agencies	Data protection is a key focus area. The CDO will work closely with the CISO (Chief Information Security Officer) to ensure that our data is available in a well-governed environment.	
DC GEOGRAPHI	C INFORMATION SYSTEM-GIS (1 Strategic Initiative-Operation Link)	
Master Address Repository 2.0	Implement Master Address Repository (MAR) 2.0 to modernize address-matching services. Administered by OCTO since 2002, the Master Address Repository (MAR) is a database, gazetteer and collection of enterprise data web services servicing 311, and other critical applications. It has been the backbone of geospatial operations enabling data access to the District's street network, addresses, city blocks and common place names for over a decade. This FY 2017 effort will modernize existing geocoding ("address matching") services, provide a holistic review of our online web services, and explore implementation of 3D and historical address records.	09-30-201
DC NET (2 Stra	stegic initiative-operation links)	
Increase options for broadband service and expand gigabit Wifi across the district	Continue multi-year effort to enhance and deploy wireless technology across DC: - Upgrade all existing Wireless Access Points in public areas to provide Gigabit speeds, - Promote DC Wi-FI and make it the most 5G friendly city, - Engage with business and local community to brand all free wireless with the DC WiFi SSID to ensure ubiquitous coverage, - Evaluate and Roll out High Speed Wifi along with Smart Lighting, - Upgrade core infrastructure to support very high speed access, - Replace aging infrastructure at critical government buildings	09-30-201
DCPS IT Modernization	Enhance Technology Infrastructure at Public Schools. During FY 2016, DCPS identified 39 priority sites that were upgraded by OCTO. In FY17 OCTO will continue to provide a high performance and highly available network that supports the ever-increasing demands for voice, data, video and wireless at District Public Schools. OCTO in coordination with DCPS plans to grade the IT infrastructure for data, wireless, and Internet access at approximately 35 public schools.	09-30-201

Upgrading Legacy/ End of Life Infrastructure	The district will focus on upgrading critical buildings first to ensure end of life network equipment is replaced and that the infrastructure is better equipped to meet the agency and resident needs. The technology team is being strategic such that while this investment will address a huge security risk the district faces, it will also set up our environment to meet the growing needs for connectivity and NextGen IT: - Replace End Of Life (EOL) equipment for One Judiciary Square and Reeves Building - Replace all IT infrastructures in up to 500 district buildings to help improve security, reduce outages and improve reliability	09-30-201
DIGITAL INCLU	USION INITIATIVE (DII) (4 Strategic initiative-operation links)	
More training opportunities & initiatives to bridge the digital divide and homework gap	Partner with DCPL to build training and innovation centers at Libraries	09-30-201
More training opportunities & initiatives to bridge the digital divide and homework gap	The Digital Inclusion program is an award winning program that has been instrumental in bridging the digital divide. The Program has won National League of Cities award for innovation. OCTO plans to continue focusing on providing additional citizen-focused training on digital literacy and build a portfolio of non-profit training organizations and expand scope of services to proactively encourage citizens to get connected.	09-30-201
More training opportunities & technology initiatives to bridge the digital divide	Partner with DC-gov agencies and nonprofits to increase technology training opportunities for low-income residents	09-30-201
Reach District residents through direct outreach and public awareness campaigns	Execute outreach and public education campaign to inform residents about tech-related services and programs	09-30-201
ENTERPRISE H	UMAN RESOURCE APPLICATION SERVICES (1 Strategic Initiative-Operation Link)	
PeopleSoft 9.2 Upgrade	In FY2017, OCTO will continue to work with stakeholders across the District to complete the HCM 9.2 upgrade which includes the following three features: an enhanced User Interface / search functionality with the anticipated result of minimizing the navigation/clicks required to take action; introduction of the Portal / Work center concept to assist users in identifying tasks, exceptions, and alerts requiring their attention; and the capability to deploy maintenance packages tailored to the District's requirements resulting in a reduction in Total Cost of Ownership. PeopleSoft HCM 9.2 Upgrade User Acceptance Testing (UAT) Phase has a dependency on completion and deployment of Compensation and Classification Reform project which has to be deployed by the end of Calendar Year 2016. Due the above mentioned dependency and estimated duration of the PeopleSoft HCM 9.2 Upgrade UAT phase for 3 – 4 month, the expected go-live of PeopleSoft HCM 9.2 Upgrade is set to April – May of 2017.	09-30-201
ENTERPRISE PI	ROCUREMENT APPLICATION SERVICES (2 Strategic initiative-operation links)	
Deploy Procurement Management and Analytics Dashboards	Implement Procurement Dashboards for the District Procurement staff and agencies to track the procurement progress and workload for resource management. Currently, over 90 agencies and sub-agencies are using the District Procurement System; PASS with 18,000 purchase orders per year. In FY 2016, OCTO developed and implemented PASS procurement management and analytics dashboards to all agencies to provide insights of the agencies' procurement activity progress and status as well as workload of each District Procurement staff for transparency and accountability. This tool will also allow OCP to manage their procurement staff more efficiently and effectively with the relevant transparent data. Additionally, the FY2016 efforts enabled the Procurement Accountability Review Board (PARB) to make real time data driven decisions during their quarterly meetings through use of the automated management dashboard that will track the status of contracts and contracting requirements. In FY2017 OCTO will continue to enhance these features and increase adoption among the agencies. The dashboard will be designed for an executive level view and will be accessible to the Mayor's office, the Office of the City Administrator, Agency Directors (for their agency-specific data only), and OCP leadership.	09-30-201

Roll out Citywide out E-Invoicing Pilot

In FY2017 Roll out E-Invoicing Pilot for OCTO and in Phase II roll out to the pilot agencies in the clusters.

The district currently does not have an automated E-invoicing process. All invoices are still processed manually. Due to the arcane process in place the district is plagued with payments delays which are leading to increased vendor management issues. Due to delayed payments to vendors, the District Agencies are also in potential risk of not meeting the requirements of the Quick Payment Act (QPA) leading to paying 1%+ penalty interest to the vendors.

Lack of end to end Invoice tracking mechanism and manual processes leading to delayed payments.

OCTO is proposing to roll out E-Invoicing module in PASS. E-Invoicing module will be customized and implemented in PASS. The e-Invoicing is a feature to exchange electronic invoice between the vendor and the buyer.

It helps in efficiently monitoring the 30-day payment cycles and results in substantial savings to the District. This will reduce the manual processes and eliminates paper submissions of the invoices. It provides the efficient tracking, monitoring and reporting mechanisms for all the invoices.

- · Receiving procedures will be standardized.
- Process improvement team will create and maintain a scorecard measuring the progress of agencies as they improve their receiving processes. After the scorecard is completed, the agency can be informally certified as ready for e-Invoicing.

GOVERNMENT CLOUD SERVICES (1 Strategic Initiative-Operation Link)

Recovery and Continuity of Operations OCTO will build a DR/COOP team that will work with all Agencies to ensure fully implemented disaster recovery and confirm continuity of operations in case of any major eventuality. If core government services were unavailable for an extended length of time the effects would immediately impact district's businesses, economy and citizens directly.

09-30-2017

02-28-2017

A disaster recovery plan (DRP) must be created in conjunction with a business continuity plan (BCP). Priorities and recovery time objectives for information technology must and should be discussed during the network assessment and analysis. Technology recovery strategies can be developed to restore hardware, applications and data in time to meet the needs of the business recovery in the event of a catastrophic loss. Regular DR/COOP Failover tests must be conducted and a critical personnel list needs to be established.

- All enterprise applications (with the focus first on public safety) need to be fully redundant at both data centers
- A tertiary cloud based data center needs to be funded and stood up for disaster that could impact a 50-mile radius
- District dedicated DR/COOP IT Recovery Team needs to be stood up to focus on identifying all critical assets, developing procedures and building recovery scripts.

IDENTITY MANAGEMENT SYSTEMS (1 Strategic Initiative-Operation Link)

Upgrade End of Life Identity & Access Management Platform Current IDMS System is End Of Life and (EOL) End Of Warranty (EOW). The program needs to migrate to a licensed and supported platform (Oracle Identity & Access Management Suite). The current Oracle Waveset platform was deployed in 2009 as an open source (free) solution. However, this product was acquired by Oracle after their merger with Sun, and we must migrate to secure the 255,000+ employee and citizen identities OCTO maintains.

09-30-2017

In FY2017 the the migration needs to be completed to avoid continuing operating on an unsupported platform with increased security risks to PII data.

Phase I High level scope – Deliver baseline capabilities to install the core OIAM application stack; integrate with PeopleSoft to support enterprise onboarding, off-boarding and AD provisioning for OCTO employees and contractors; and implement access management / single sign-on into PASS, PeopleSoft, Google Docs, Office 365, and/or other priority applications. All basic DC1C capabilities must be migrated in this phase. Functions supporting PIV-I and DCPS SNA (for example) will be migrated in Phase II. The old Oracle Waveset and new Oracle OIAM platform must co-exist and be supported until the entire platform can be migrated in 12-18 months.

Phase II High level scope – A thorough review of the current "As Is" state is required, along with a gap analysis which is reflected in the 3 months Design effort. Migrate citizen facing and remaining enterprise DC1C capabilities from existing Oracle Waveset platform, which contains many workflows and significant functional and UI customizations, to the new OIAM platform. Platforms will be run in parallel until the Waveset platform can be fully sunset.

INFORMATION SECURITY (2 Strategic initiative-operation links)

Build a cyber security framework to manage IoT Define baseline security and resiliency reference models that will guide future smart city solutions for security controls, authentication methods, and appropriate measures needed to ensure a holistic security framework.

09-30-2017

09-30-2017 Develop an In this changing world of new threats, instilling a culture of increased awareness and mindsets toward preventive overarching IT action is necessary. IT security must be integrated into every Agency's vision, mission, and business lines. It is critical that we incorporate security into the daily activities of district employees at all levels. With this, all IT Security Program (Secure personnel in any agency must support the notion of IT security as a way of life and take direction from the OCTO DC) whose Chief Information Security Officer (CISO) to secure their environments. mission is to foster an These reasons have prompted the DC Chief Technology Officer (CTO) and the OCTO CISO to begin development of enterprise-wide an overarching IT Security Program (Secure DC). Understanding that Agencies face unique business requirements, the challenge has been to develop an IT Security Program that allowed for both compliance and flexibility. The CISO secure and has been working closely with the Agency CIOs through the CIO Council to update Security Policies and drive trusted IT environment compliance. The Secure DC mission is to foster an enterprise-wide secure and trusted IT environment. To meet the aggressive demands of an enterprise-wide DC IT Security Program, strong governance with clearly defined roles, responsibilities, and security expertise is required. By establishing the program at the headquarters level, the district will achieve a consistent IT security baseline across the Agencies by supporting universal security requirements. The Secure DC program will then be driven by close coordination and collaboration with each ACIO to ensure that their needs and expectations are identified and addressed. • OCTO will staff the Security Operations Center to support 24X7 • OCTO will work with Agencies to conduct proactive penetration testing and vulnerability assessments • Increase end point security and end user training The number of cyber security incidents and the severity of incidents is rising astronomically. The district needs to make investments on par with other major cities and organizations and confirm its commitment to safeguard the data and assets on behalf of the district residents. IT SERVUS (1 Strategic Initiative-Operation Link) In FY17 OC TO will extend the Proof-of-Concept pilot for the Enterprise IT Asset Management. In FY2016, OCTO 09-30-2017 Lauch Cloudbased worked on piloting an Enterprise Asset Management System to track the agency's IT inventory throughout its Enterprise Asset complete life cycle. IT Assets will be tracked using automated workflows from receiving to deployment. This will & Inventory allow OCTO to centrally manage all the assets, maintenance agreements and ownership / users of equipment until Management the assets are retired or recycled. System In FY2017 OCTO will retool the application and enhance its functionality on a Salesforce Customer Relations Management solution. STRATEGIC INVESTMENT SERVICES (1 Strategic Initiative-Operation Link) 09-30-2017 Establish Establish Enterprise Information Technology (IT) Contracts & Licensing Program to effectively manage and Enterprise streamline the disparate IT license procurement across the District with a single organization-wide agreements. Information Technology (IT) The program will allow setting up enterprise contracts for: Get the best pricing, discounts, and added benefits Contracts & designed to support server and cloud technologies. Licensing Program Benefits will include: - Get 24x7 technical support, planning services, end-user and technical training, as well as unique technologies with Software Assurance. - Minimize up-front costs and budget more effectively by locking in pricing and spreading payments over multiple outer years.

Created on Dec. 15, 2015 at 4:14 PM (EST). Last updated by Fowler-Finn, MeghanMarie (OSSE) on March 18, 2016 3:55 PM at 3:55 PM (EDT). Owned by Fowler-Finn, MeghanMarie (OSSE).

- Simplify purchasing with fixed payments through a single agreements.
