

Chrome Enterprise Recommended Solution Webex PWA on Chromebooks

Use Webex and ChromeOS to enable engaging, inclusive and supportive collaboration in the hybrid world of work

In the hybrid world of work, 98% of meetings are expected to have at least one remote participant.

To remain competitive, enterprises will need to provide a real-time collaboration platform that delivers interactive and engaging experiences, breaks down barriers across locations and languages, and empowers everyone to do their best work, regardless of where they work from.

Webex on ChromeOS can help your organization succeed in the hybrid world of work, with a solution that leverages the unique strengths of each in providing an engaging, inclusive and supportive collaboration platform with the security, reliability and quality you expect from both Webex and ChromeOS.

Discover the benefits

Boost collaboration and productivity
with Webex on ChromeOS

Webex allows users to join meetings and message team members in a single unified application directly from their ChromeOS device.

Whether joining a meeting or messaging from the office, home or on the go, Webex on ChromeOS delivers industry-leading collaboration from the modern enterprise

Leverage advanced AI capabilities like background noise removal, real-time translations, and messaging features like file sharing, whiteboarding, personalize space, emoji reactions, and much more
