

Chrome Enterprise Recommended Solution Overview with Dialpad

Dialpad & ChromeOS: One Beautiful Workspace so you can work from anywhere

Built on the Google Cloud Platform for unmatched security and reliability, Dialpad is the leading cloud communications platform for AI-powered calling, messaging, video, and contact centers.

With crystal clear call quality, internal/external SMS/MMS, team messaging, and call transcriptions all powered on your ChromeOS devices, staying in the loop at or away from your desk has never been easier.

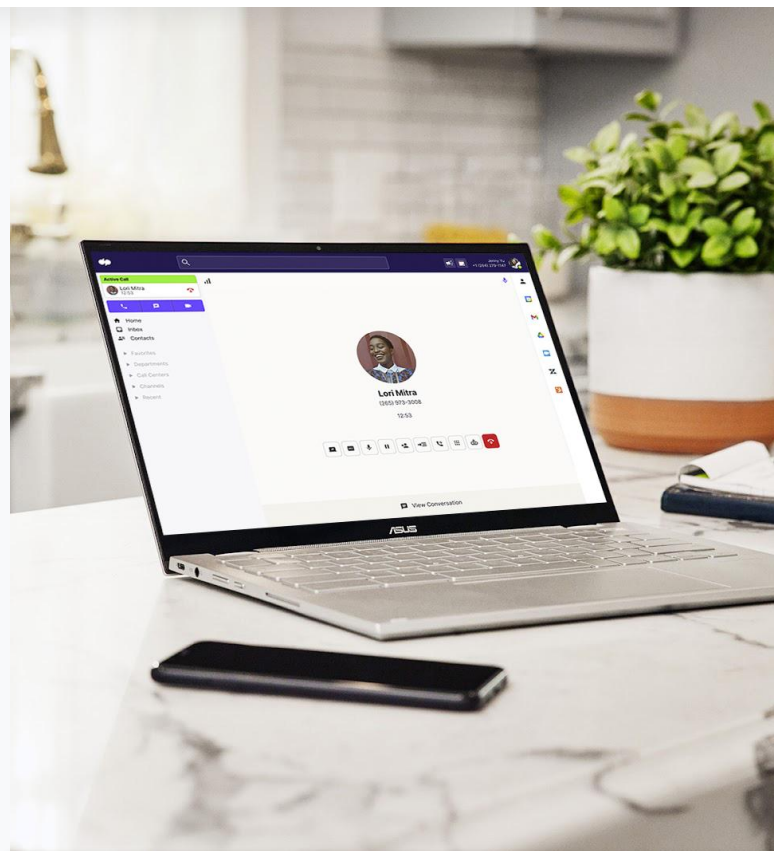

Built for the Modern Workforce - Dialpad gives remote employees the business phone features and tools they need to succeed directly from any Chrome OS device so they can work from anywhere.

Real-Time Insights, Real-Time Benefits - Running on ChromeOS devices, Dialpad's proprietary AI helps companies unlock conversation insights, improve productivity, and drive better performance - all in real time.

Discover the benefits

Dialpad + ChromeOS enables you to manage calls, texts, voicemail, chat and meetings from any ChromeOS device

- **Effortless experiences:** End-to-end calling, messaging and video on a single, easy-to-use app connects every part of your business.
- **Intelligent productivity:** Dialpad is built on a powerful AI engine that automatically captures action items, takes notes, and more in real-time.
- **High reliability and uptime:** Carrier-grade infrastructure paired with a software platform built on Google Cloud Platform make for instant, weekly app updates with no downtime and crystal clear HD call and video quality across the world.
