Chrome Enterprise Recommended Solution Overview with **ezeep Blue**

Benefit from Cloud Printing Without the Always-On PC

Managed printing from ChromeOS devices across networks is a challenge for many organizations.

With ezeep Blue and the ezeep Hub, you instantly benefit from cloud printing, without any of the costs of PC's or servers. Access to printers is managed via a clean web portal, and users simply print from any device.

ezeep Blue works with any printer, independently of printer drivers for ChromeOS devices. It's intuitive, so users and admins do not require any training. Support calls drop significantly and productivity increases.

ezeep Blue is the easiest way to securely connect entire offices, schools and remote workplaces to a reliable and fast print infrastructure.
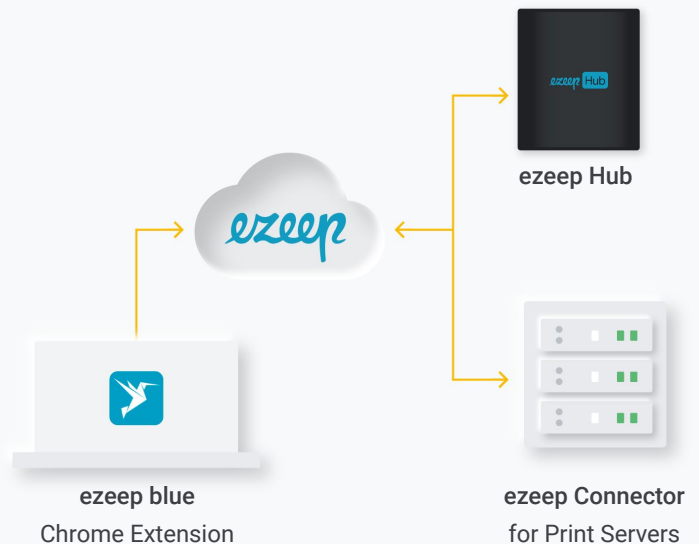

Discover the benefits

ezeep Blue Delivers Server-free, Secure, Enterprise-Ready Cloud Printing for ChromeOS

The ezeep Hub turns any printer into a cloud printer - without local servers or PC's.

Users experience seamless printing via the ezeep Blue chrome extension.

The admin portal allows for central management - whether 10 or 10,000 users.

ezeep Blue is secure. No print jobs are retained, and all communication is encrypted.
