Subject: *Letter of Attestation – Google Services NIST 800-53 Compliance*

The purpose of this letter is to provide Google Services (Google Cloud Platform (GCP) and Google Workspace) customers assurance that Google Services is operating in compliance with the requirements of NIST SP 800-53 for the 2021 – 2022 reporting period.

The Federal Risk and Authorization Management Program (FedRAMP) is a government-wide program that provides a standardized approach to security assessment, authorization and continuous monitoring for cloud-based services. As an accredited FedRAMP Third Party Assessment Organization (3PAO), Coalfire Systems (Coalfire) performs independent security assessments for cloud service provider offerings such as Google Services. As a 3PAO, Coalfire is required to meet strict accreditation requirements that ensure assessment independence and integrity. FedRAMP is recognized within the industry as one of the most comprehensive risk assessment programs for commercial or government agency cloud environments.

The FedRAMP High baseline is a set of 421 NIST SP 800-53 revision 4 controls and additional requirements (including vulnerability scanning, penetration testing, and continuous monitoring) to be assessed to determine adequacy of security of a High impact system (loss of confidentiality, integrity, and availability would result in serious adverse effects on customer operations, assets, or individuals).

From September 13, 2021 to May 20, 2022, Coalfire performed a FedRAMP High baseline annual assessment of Google Services. The assessment included security control analysis, vulnerability scanning, and penetration testing, the results of which are documented in the Google Services FedRAMP Security Assessment Report (SAR), dated May 20, 2022.

As a result of assessment activities, Coalfire concludes that Google has implemented NIST SP 800-53 Revision 4 security controls in compliance with the FedRAMP High baseline and that all deviations from the baseline are being tracked and remediated in accordance with FedRAMP guidance.

Coalfire is the leading 3PAO of the FedRAMP program, having performed the most assessments to-date. Our reputation has been built on the comprehensiveness of our assessments that we provide to our clients and the overall thoroughness of our reviews on behalf of the US Federal Government. We stand behind all the work we perform and put forth unbiased deliverables outlining the findings from assessment activities. Any recommendations for authorization are based off the results of our review and presented to the US Federal Government for their authorization determination.

Sincerely,

Adam Smith

Director, FedRAMP & Assessment Services
Coalfire Systems
