

Video conferencing with ChromeOS devices

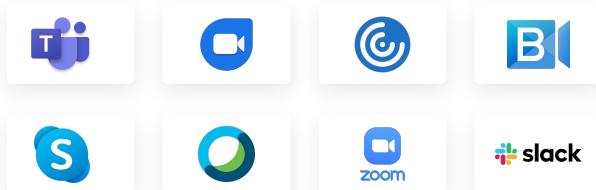

The world of work has changed

Remote work is here to stay. Employees are turning to video conferencing solutions to stay connected and collaborative. With ChromeOS devices, employees have access to industry leading video conferencing solutions, security without interruption, and devices that keep employees connected regardless of use-case.

Supported solutions

ChromeOS devices support Google Meet, Slack, Duo, Zoom, Citrix, Cisco WebEx, Microsoft Teams, Blue Jeans, Skype and many more.

Access full-featured video conferencing applications using Chrome Browser, download the video conferencing apps you're looking for from Google Play, or leverage Chrome Extensions to enhance the experience.

With Chrome Enterprise, IT admins can deploy any video conferencing apps they want their employees to have access to through the Google Admin console. Visit our [help article](#) to learn more.

Security without interruption

- ChromeOS updates run in the background, ensuring devices stay secure without interrupting the user during their meeting.
- Multi-layered security and data encryption to safeguard employees from phishing, virus attacks and other vulnerabilities.
- Applications leverage sandboxing to keep data from applications separate from each other, ensuring other services on your ChromeOS device don't have access to a meeting.

In the UK, Hackney Council is using G Suite, Google Meet and Chrome Enterprise to keep their team of 4,000 staff connected as they work remotely. Our priority is to make sure that essential services can still be delivered for its citizens. Chromebooks are fast to deploy and work seamlessly with G Suite and Google Meet, keeping our employees effective and productive while working remotely."

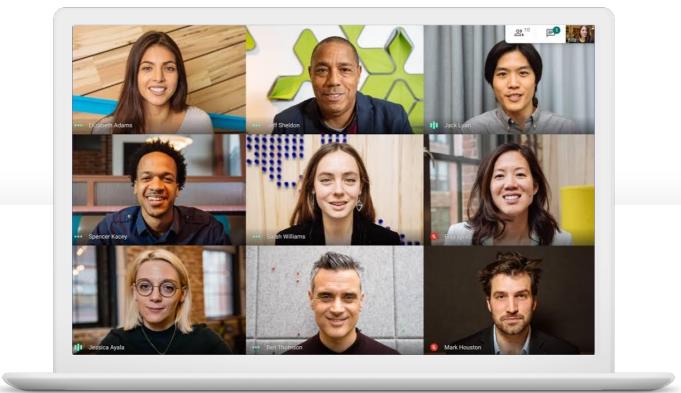

Henry Lewis, Head of Platform, London Borough of Hackney

Devices that keep employees productive, regardless of use-case

ChromeOS devices are built with features and specifications to match each user:

- ChromeOS devices are **available from leading device manufacturers** including: Dell, HP, Acer, ASUS, Lenovo and Samsung.

- ChromeOS devices come ready with front-facing cameras, and are available in **all types of form-factors** to meet each worker's requirements such as laptop, desktop, convertible, tablet and all-in-one.
- ChromeOS devices **optimize for portability**, with features such as LTE support, long-lasting battery life, and rugged chassis available.
- ChromeOS devices come with **security enhancements**, including built in privacy screens, webcam covers and fingerprint readers.

For use with video conferencing, we recommend users select devices that meet the following minimum requirements for collaboration:

- **Processors:** Intel Pentium, i3+, AMD Athlon, AMD Ryzen 3+
- **RAM:** 8 GB+
- **Storage:** 128 GB
- **Screen Size:** 13-15"

Examples of devices that meet the minimum requirements for video conferencing and are ideal for remote workers include:

Acer Chromebook Spin
714

ASUS Chromebook
CX9

Dell Latitude 5430
Chromebook Enterprise

HP Elite Dragonfly
Chromebook Enterprise

Lenovo ThinkPad C14
Chromebook Enterprise
