Emerging Technologies

World Wide Web Consortium's **Emerging Technologies**

<http://www.w3.org/2007/Talks/1128-sb-W3CemergingTech/Bratt-W3CemergingTechp.pdf>

Presented by

Steve Bratt (steve@w3.org)

Chief Executive Officer

World Wide Web Consortium (<http://www.w3.org>)

28 November 2007

IT Challenges for Most Organizations

- Customer (+employee) relationship management
- Security
- Legacy systems and data
- Interfacing and interoperability
- Transaction speed and reliability
- Mergers and acquisitions
- Risk management
- Corporate governance
- Competition and efficiency
- Globalization
- Leveraging IT -- a challenge in itself!
 - XML, SOA, WS, mobile, and more ...

So ...

How Can Your Organization Leverage Emerging Web Technologies?

W3C Can Help You to ...

Make it (your content, data, services)

- *Standard*
- *Accessible*
- *Secure*
- *Heard*
- *Mobile*
- *Web 2.0*
- *Web 3.0*
- *Useful*

Make ... *Standard*

Why?

Saying in China*: *"Third-class companies make products; second-class companies develop technology; first-class companies set standards."*

- Broad industry agreement (if done right)
- Interoperability ... cross -app, -org, -data
- Avoids vendor lock-in ... for providers and users
- Open access = no black boxes
- Mandated ... by customers, government
- Royalty-free standards = good business sense

The Leading Web Standards Organization

- Engineering the Web's foundation
 - 1000+ technologists in 60 groups, working on (x)HTML, XML, CSS, Web Services, and tens of emerging standards

- 430 Members

- 40+ Liaisons

- 21 Offices

- Newest: India, China, S. Africa, Brazil

<http://www.w3.org/>

Make it ... Accessible

Access for people with disabilities and an aging population ...

- Web usage continues to expand
- Barriers for millions with disabilities
- Aging population = more disabled with age
- Often required
- Huge carry-over benefits

Developing a Web Accessibility Business Case

- Web Accessibility Initiative @ W3C

- New Web Content Accessibility Guidelines 2.0 soon

Figure 10. Proportion of population aged 60 or over: world and development regions, 1950-2050

More developed regions have relatively high proportions of older persons

Make it ... *Secure*

- Web Security Context Working Group
 - Practical standards to address most pressing problems (e.g., phishing)
 - Participants: Browser, security, financial companies
 - Usable, mutual authentication
 - ... e.g., "secure letterhead", "petname", padlock use, certificates.
 - Web Security Experience, Indicators and Trusts

(workshop)

Make it ... *Heard*

- VoiceXML @ W3C: Why?
 - You provide interactive voice response
 - You use Web XML to manage data
 - Similarities between voice- and screen-browsing
- What is W3C doing?
 - Standards for vocal interaction with Web applications
 - Convergence with other Web technologies
- How important is this?
 - One of the largest W3C Working Groups
 - VoiceXML lead is expanding in voice markup market
 - Also Speech synthesis and recognition, call control

Make it ... *Mobile*

- 2 billion people own mobile phones with Web browsers
 - *300-400 million are actively used*
- 2-3 million new mobile phones sold / day
 - *Most new phones will continue to include simple Web browsers*
- *Potential for bringing the Web to more people is huge*

Mobile Web Initiative

- Mobile Web Best Practices 1.0 (Summary)
 - Authoring content for **good user experience**
 - Effective delivery to and display on all mobile devices
 - Leveraging existing Web standards
 - Checker: <http://www.w3.org/Mobile/check>
- Related Working Groups
 - Device Description
 - Ubiquitous Web Applications
 - Developing Countries

Make it ... *Web 2.0*

- Web 2.0
 - Users are authors
 - Dynamic interaction
- Web 2.0 @ W3C = Rich Web Clients Activity
- Starting with existing W3C standards & javascript
 - New HTML WG bringing most important spec up to date
 - DOM, CSS, SVG, are critical elements
- Plus new standardization of work in the field
 - AJAX (XMLHttpRequest object) and other JS features
 - Widget packaging and delivery format, etc.
 - Considering security, especially re: javascript use

Make it ... *Web 3.0*

- Web 1.0 = Linked Documents
- Semantic Web = Linked Data (Web 3.0*)

Where Subjects, Properties, Values can each have their own URLs, and thus are universally unique and linkable across the Web

- Web becomes a global, relational database
- Semantic Web Activity @ W3C
 - Query, Rules, Content Labeling, Case Studies and Use Cases

*New York Times, InternetNews

Make it ... *Useful*

- **Increasing focus on end users**
 - Supports application of standards to real, important problem
 - Improves standards: Use cases, requirements, implementation, testing
- **Health Care and Life Sciences**
 - "use of Semantic Web technologies ... to improve collaboration, research and development, and innovation adoption"
 - Agfa, AstraZeneca, Cleveland Clinic, Eli Lilly, HL7, Merck, Partners, Pfizer (60+ participants)
- **Interest in a Financial Services Group?**
 - Citigroup, Dow Jones joined W3C in 2006 (others considering)

. W3C Membership:

<http://www.w3.org/Consortium/membership>

Why Participate in W3C?

Saying in China*: ***"Third-class companies make products; second-class companies develop technology; first-class companies set standards."***

- **Leadership**
 - Introduce ideas through submissions, workshops, Incubator Groups
 - Influence standards through Working Groups, review, implementation
- **Early insight into market trends**
 - Access world's foremost Web technologists from Member & Team
 - Plan for emerging technologies & markets through Member access
- **Promoting image as innovator**
 - Participate in int'l media activities, press releases, testimonials
 - Display logo on W3C site (300K visits/day) and W3C logo on your site
