Stuart Kerry  
Phillips  
IEEE 802.11 Chair  
1109 McKay Drive, M/S 48 SJ  
San Jose, CA 95131-1706

**Re: IEEE 802.11 WG Chair on Wireless Local Area Networks**

Dear Mr. Kerry:

Per your request, this letter informs IEEE 802.11 Task Force of IBM's patent licensing policy as related to your standardization activities in the area of Information Processing Standards for Wireless Local Area Networking (WLAN) Security.

IBM has an open licensing policy for those companies that respect IBM's intellectual property rights. In the event an adopted standard cannot be practiced without the use of an IBM patent, IBM agrees upon written request to grant a nonexclusive license under reasonable and nondiscriminatory terms and conditions including IBM's then current royalty rates. Licensees must be willing to grant IBM reciprocal rights.

Per your request, IBM confirms that the IBM patent application (entitled "Encryption schemes with almost free integrity awareness" by Charanjit Jutla) you identified is available for licensing under the policy stated above.

Any requests for license information may be directed to:

**Director of Licensing  
International Business Machines Corporation  
North Castle Drive  
Armonk, NY 10504**

Sincerely,

Frank P. Squillante  
Director, Intellectual Property & Licensing
