

THE COMPANY

Founded in 2003 by Kenneth McElrath, Jr., MAC Installations and Consulting LLC (MAC) was the brainchild of McElrath, a 17 year U. S. Airforce Veteran. Armed with a personal loan and the product knowledge that he acquired as Sergeant E 4 Journeyman in Communications, MAC was born. The rest is history.

Almost two decades since its inception, MAC has grown into a premier telecommunications enterprise that services public and private sector clients in NE Ohio. MAC Installations and Consulting LLC specializes in the design and installation of structured cabling including Telecommunications, Data Networks, Audio / Video and CCTV systems.

Our workforce provides impeccable customer service. In addition, MAC strongly believes in not only providing quality service, but in building partnerships with our clients. The craftsmanship of our work is a testament to the expert and unparalleled technical services that we provide to our clients.

Computer Server Room: Photographs one, two and three show the before, during, and final processes of a Computer Closet Refresh.

MAC Installations and Consulting LLC has a dynamic and highly capable management and technical staff that provide direct service and hands on involvement with our clients. We provide our product and services on time and within budget.
