

REGISTERED **commons**

YOU COPIED IT **RIGHT**

**The Value of Registration**

Presentation at the Creative Commons Technology Summit

Hosted by: Google  
Mountain View, CA. 18 June 2008

## Registered Commons Features

- Register digital works of any type
- Preferring CC licensed works
- Time-Stamp Service (provided by A-Cert) trusted 3rd party
- Timestamp allows proof of publication date & time
- Unique certificate as an enhanced Commons Deed
- Author may define Moral Rights
- Verification of authors identity - email and Ca-cert trust levels
- Compatibility to CC licensing scheme
- Rich Metadata Set - RDF

A registration service offers added value to the open content community. Both creators and users may benefit, if reliable licensing is required.

It's a fantastic opportunity to share work and promote collaboration, whilst safeguarding the rights of and incomes for creatives.

## SELECT A LICENSE

**From this point on, you will have to accept cookies for the process to work.**

The following describes each of the six main licenses offered when you choose to publish your work with a Creative Commons license. We have listed them starting with the most restrictive license type you can choose and ending with the most accommodating license type you can choose. It's also helpful to know there are [a set of baseline rights](#) all six licenses offer to others and we've prepared [a list of things to think about](#) before choosing a license.

### Attribution Non-commercial No Derivatives (by-nc-nd)

This license is the most restrictive of our six main licenses, allowing redistribution. This license is often called the "free advertising" license because it allows others to download your works and share them with others as long as they mention you and link back to you, but they can't change them in any way or use them commercially.

[Read the Commons Deed](#) | [View Legal Code](#)

[Choose by-nc-nd license](#)

### Attribution Non-commercial Share Alike (by-nc-sa)

This license lets others remix, tweak, and build upon your work non-commercially, as long as they credit you and license their new creations under the identical terms. Others can download and redistribute your work just like the by-nc-nd license, but they can also translate, make remixes, and produce new stories based on your work. All new work based on yours will carry the same license, so any derivatives will also be non-commercial in nature.

Creation Date [y-m-d] *	2006   September   12	✓

**Persons involved**

Creator *	Lawrence Lessig	✓
Publisher	Open Source Press	
Contributors	Hartmut Pilch Annegret Claushues	

# Challenges

- Establishing policies for registries
- Determining best use practices
- Registry Authority
- New business models

As new registries emerge, clear standards for trust and security should emerge.

## Moving Forward

- Limited free and paid registrations
- New Business Models - vouchers for universities and chambers of commerce
- Branded versions of RC - CreativDepot
- CC+ and 3rd party content clearing service

Registered Commons is emerging from a research project to a player in the market.
