

Delta 2021 H2 topic reveal: RM Workplace

You might be wondering what the next Delta topic will be. It's a tool that operates on the **OpenShift microservice platform** and is built using the **Angular framework: RM Workplace**. And what's more, **it's the successor to Front Workplace**. With a **shiny, new, web-based user interface**, it's a product made for **client relationship managers, EAMs and other client-centric employees**.

As is customary for Delta courses, there are three parts:

RM Workplace

New customization

Coding guidelines, patterns and tips

Best practices

De-releases, Avalog or Academy news

Good to know

The course will include a collection of **self-study videos** and a **virtual class day**, where students will be guided through how to customize the application with personalized themes, menus, reports, forms, dashboards and much more. So stay tuned, it's sure to be an exciting course!

Academy on OpenShift 4.10 and Kafka 3.0.0

Our courses that use **OpenShift** are **migrating** from **version 4.6 to 4.10**. We're also **upgrading our courses** that use **Kafka** from **version 2.7.0 to 3.0.0**.

The **first course** will be **delivered next month**, so stay tuned!

Are you an early planner? Book your place on one of our **2023 ACCP** courses now!
