

Did you know that you can also develop AMI Web Services on an Avaloq OpenShift platform?

You read that right! And it's been made possible by an **Avaloq microservice** coupled with an application server that is **powerful, modular** and **lightweight**. This new version of the **Red Hat JBoss Application Server** exposes AMI Web Services endpoints and returns responses to the API client.

Learn about this process in the next **Avaloq Web APIs** course.
