

OBIE and MAX

Cross out all the letters that appear twice. You'll be left with five letters that spell a word.

G R D S
E T O A
S Y N Y I E
Y D G O
D O

Bee the one!

Bees are vital to about 90% of crops! Imagine that! Bees are in trouble, though. The bee population is declining, and they need help to thrive. You can "bee" one of the kids to help. The simplest way to help is to plant flowers. Get your friends and family involved, and to attract the most bees, choose yellow, white, blue and purple flowers. They're the bees' favourite colours!

Max is using his bee smoker to keep the bees away so he can get to the pot of honey he's made. Help him find his way through the maze!

Balloon Bounce

Get a bunch of your friends together and make two teams. Everyone blows up a balloon in their team's colour (say blue for one team, and red for the other). When the "referee" yells "GO!" everyone hits their balloon up into the air. The goal is not to let a balloon touch the ground. If a balloon does hit the ground, one member of that team steps to the sidelines. The winning team is the one with at least one balloon still in the air. Go team!

Darken the honeycomb cells that contain odd numbers to discover what Max has planted in his garden!

Take it easy! Stay safe!

When you're riding your bike, always cross tracks at a crossing, and obey the signs and signals. Remember that metal rail tracks are slippery, and bike wheels can skid if you pedal hard as you cross, so coast over the tracks.
