

great American city, but hadn't in Newark for quite some time—attending a major league sporting event; in this case, a rousing hockey game where the New Jersey Devils skated past the Toronto Maple Leafs by a score of 3-2.

It was just a few days after the Prudential Center opened in downtown Newark and it was the city's first test of how it would move multiples of thousands of people through downtown streets. Newark passed with flying colors. And it was the first of many electrifying nights with multiple venues alit and Newark abuzz with activity.

Just recently, Newark Symphony Hall played host to a daylong conference on reimagining its future. What became clear through the day is the unmistakable rebirth of Newark at night. There can no longer be any doubt. Newark is alive and kicking up its heels at night and on the weekends.

For quite some time, the Newark Museum and Symphony Hall were in a lonely vanguard. There was little life in the downtown core and Newark's lingering reputation from years past did not help. Too many office workers raced out of the city at night, almost never touching city sidewalks because of the hermetically sealed tubes between the towers, the parking decks and Penn Station.

Happily, though, much has changed in the last decade. Like Cleveland and Pittsburgh, two similar cities formerly down on their luck, we have seen real change in Newark and it is exciting to be a part of it.

Since opening night, NJPAC has attracted some 6 million visitors, the vast majority in the evening and on weekends. As we like to say, "That's 6 million people coming to the building that wasn't going to be built in the city that no one was going to come to."

Similarly, since opening less than two years ago, Prudential Center has drawn nearly 3 million visitors to Newark, virtually all at night or on the weekend. As we like to say, "That's 3 million people coming to the Rock that couldn't be built in a city that no one would dare come to."

In fact, even in the worst economy in three generations, Devils attendance is up almost 15 percent from their best year in the Meadowlands. Perhaps more important is how long their fans are staying—on average over an hour longer than they did at the Meadowlands. That means they are dining at Newark restaurants and spending more time—and money—in the city.

Newark Symphony Hall is poised to experience a resurgence. The recent conference was a promising start. Its vibrancy is essential to enlivening the south Broad Street end of Newark and creating stability for not only the visitors, but for the people who reside in the neighborhood as well.

This bodes well for the housing and commercial development that is picking up steam and for continued economic investment in this part of the city. If Newark is to sustain its momentum, the entire length of Broad Street must become the centerpiece of significant redevelopment to elevate Newark to the next level of visitor interest.

Combined, last year nearly 2 million visitors came to spend an evening in Newark attending events at the three venues. But there is more we must achieve.

In Cleveland, for example there are now six successful theaters in Playhouse Square and the Quicken Arena brought LeBron James and the Cavaliers from the suburbs to the city. The Rock and Roll Hall of Fame has enticed tourism from far beyond Cleveland. What was once a desolate downtown is now delightful. Hotels, office development and retail followed.

That's what we are aiming for in Newark. We have world-class facilities. We have fine restaurants—many of them brand new and

participating in Newark's second annual restaurant week this month—and entertainment venues that dot the area around NJPAC and the Prudential Center, but we are not finished.

Cities are meant to be filled with all kinds of people coming together to celebrate, relax, revel and enjoy one another. That's now happening big time in Newark today. And that's very good news for all of us in New Jersey.

TRIBUTE TO THE LIFE AND LEGACY OF DR. A.D. PINKNEY, FORMER PRESIDENT OF THE INDIANAPOLIS NAACP

HON. ANDRÉ CARSON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CARSON of Indiana. Madam Speaker, I rise today to pay tribute to the life and legacy of Dr. A.D. Pinkney, former president of the Indianapolis National Association for the Advancement of Colored People. He passed away this month, at the age of 85.

Dr. Pinkney was an iconic civil rights leader who brought visionary changes that forever altered the racial landscape of Indianapolis, Indiana. Under his leadership, the NAACP brought two landmark cases before federal courts, which were instrumental in forcing the city to desegregate. The first ruling forced black students from the Indianapolis Public Schools area to be bused to township system schools. The second ruling by federal courts forced suburban townships to expand public housing options for people of color.

Through great courage and dedication, Dr. Pinkney opened the doors for our generation to come forward and serve our community as proud and honorable citizens. He was instrumental in breaking down ethnic and racial barriers, so that people of color may live a prosperous life of liberty and equality.

His passing is a great loss to the Indianapolis area community. I ask my colleagues to join me in honoring Dr. A.D. Pinkney for his service.

PERSONAL EXPLANATION

HON. JOHN H. ADLER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. ADLER of New Jersey. Madam Speaker, due to a meeting at the White House on Friday, July 30, 2009, I missed two votes. I would have voted as follows: Motion to recommit on H.R. 2479—"no"; final Passage of H.R. 2479, the Food Safety Enhancement Act of 2009—"yes."

EARMARK DECLARATION

HON. MARY FALLIN

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. FALLIN. Madam Speaker, pursuant to the Republican Leadership standards on ear-

marks, I am submitting the following information regarding earmarks I received as part of H.R. 3133, the Energy and Water Development and Related Agencies Appropriations Act. I requested \$2,300,000.00 and received \$250,000.00 for the Statewide Comprehensive Water Plan at the Oklahoma Water Resources Board located at 3800 North Classen Boulevard, Oklahoma City, Oklahoma 73118, which is a multi-year study to provide technical assistance to the state of Oklahoma in updating the Oklahoma Comprehensive Water Plan. The OWRB envisions that, combined with federal cost-shared funds, the OWRB could work with local water suppliers in evaluating their system conditions, long-term needs, and develop a strategy to meet their needs over a 50-year time horizon. The plan would also address the long-term needs of other water use sectors.

HONORING DR. MODESTO "MITCH" MAIDIQUE

HON. MARIO DIAZ-BALART

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. MARIO DIAZ-BALART of Florida. Madam Speaker, I rise today to honor a true leader, activist, champion of education and a dear friend, Dr. Modesto "Mitch" Maidique, President of Florida International University in Miami, Florida.

Dr. Maidique is the longest serving university president in the State of Florida and the second longest serving research university president in the country. For more than two decades, he has dedicated his life to FIU, its students, faculty and staff, and has transformed it into one of our nation's leading institutions of higher education. As he prepares to retire next week, it is a privilege to pay tribute to this visionary and extraordinary leader.

He began his service to FIU in the College of Business Administration as a professor of management and in 1986 was named FIU's fourth President. Under his leadership, enrollment at FIU has more than doubled, growing to more than 38,000 students and today ranks among the 20 largest universities in the United States. The university added 22 doctoral programs and 18 undergraduate programs during Dr. Maidique's presidency. It serves not only Floridians, but students from across the nation and world and has cultivated successful alumni and leaders in our community.

His tenacity and perseverance led to the establishment of the College of Law, College of Engineering and the School of Architecture and most recently, the historic opening of the new FIU College of Medicine, one of only three medical schools established in the last 25 years. The university also added a Division I-A football team in 2002. FIU's sponsored research funding has also grown from \$6 million to nearly \$110 million and the institution's endowment experienced exponential growth from less than \$3 million to more than \$105 million.

Prior to his tenure at FIU, Dr. Maidique co-founded Analog Devices Inc., Semiconductor Division. He also served as CEO of Collaborative Research, now Genome Therapeutics, and as senior partner in Hambrecht & Quist Venture Partners. He was also the past chairman of The Beacon Council, Miami's economic development authority and has testified
