CELEBRATING PATHWAYS EARLY  
EDUCATION CENTER OF  
IMMOKALEE'S 55TH ANNIVER-  
SARY

**HON. MARIO DIAZ-BALART**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Monday, November 18, 2019*

Mr. DIAZ-BALART. Madam Speaker, in recognition of American Education Week, I rise today to congratulate Pathways Early Education Center of Immokalee on celebrating their 55th anniversary and to commend them for their dedication and exemplary service to Southern Florida.

Originally named Immokalee Child Care Center of Immokalee, Pathways Early Education Center of Immokalee was founded in 1962 by members of the Church Women United, who recognized a need for childcare facilities in their community. At the time, working parents, specifically migrant workers, were left with few options for childcare. This led to parents having to make a difficult decision—leave their children unattended or take them to the fields during the workday. Both options posed significant dangers for these children. Knowing that this practice cannot continue, dedicated members and community groups worked together to raise funds and open a facility, which immediately served twenty-five children.

Since its founding, Pathways Early Education Center of Immokalee has not strayed from its mission of providing quality education and developmental services for the children of Southern Florida. Presently, Pathways Early Education Center of Immokalee serves 125 students from diverse backgrounds and continues to grow. Their curriculum centers on developing critical social, emotional, linguistic and academic skills for their students to ensure that each child has the ability to meet age-appropriate milestones. However, understanding that children need more than just in-classroom teaching to be successful, Pathways plays an active role in supporting children and their families after the school day ends. They identify students who need additional assistance and partner with agencies who provide them with access to mental health services, food and shelter needs, and healthcare options.

Having had the privilege of working with Pathways Early Education Center of Immokalee for a number of years, I continue to be impressed by their steadfast commitment to each and every child they teach. It cannot be stated enough how important early childhood education centers, like Pathways, are for empowering students to reach their full potential. I am proud that Florida's 25th Congressional district is home to such a dedicated childcare center.

Madam Speaker, I am honored to recognize Pathways Early Education Center of Immokalee for their fifty-five years of service to Southern Florida and the Immokalee community and I ask my colleagues to join me in recognizing this remarkable organization.

HONORING THE ISLAMIC CENTER  
OF CULPEPER

**HON. RASHIDA TLAI**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Monday, November 18, 2019*

Ms. TLAI. Madam Speaker, I rise today in tribute to the Islamic Center of Culpeper on the occasion of the ground breaking of their new mosque.

Culpeper, Virginia is home to a growing, close-knit Muslim community known as the Islamic Center of Culpeper, (ICC). For many years the ICC community has been worshipping in a very small space lacking proper heating in the brutal winters and air conditioning in the scorching summers. The facility even lacked an adequate washing facility to perform ablution before prayers. The ICC searched for nearly five years before finding and purchasing a parcel of land in January of 2016. Immediately, they made plans to begin constructing a brand-new mosque to serve as a place of worship and a place for community.

The ICC had no idea of the challenges they would face.

Since 1995, every pump and hall permit application submitted to the Culpeper County Government by a house of worship had been approved, but in April of 2016, the County denied ICC's permit application.

The County also ordered a moratorium on any new pump and haul applications, which barred ICC from any attempts to re-apply, and in advance of one of the local zoning hearings, protesters hung a banner stating, "NO ISLAMIC CENTER!" in big black letters.

The ICC fought back.

Muslim Advocates and Arnold & Porter Kaye Scholer filed a lawsuit against the County on behalf of ICC, following a lawsuit by the Department of Justice and one month later, the ICC and the County reached a settlement. The ICC could move forward with their plans to build a mosque, and the County issued a statement welcoming the ICC and compensated the community for their expenses.

Please join me in honoring the ICC and their resilience as they celebrate this milestone project.

IN HONOR OF NATIONAL  
APPRENTICESHIP WEEK

**HON. RUSS FULCHER**

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

*Monday, November 18, 2019*

Mr. FULCHER. Madam Speaker, I rise today in honor of National Apprenticeship Week.

In my home state of Idaho, more than 1,500 students participate in registered apprenticeships. This is a jump of fifty percent in just the last two years. More than 280 Idaho companies participate in apprenticeship programs. They include companies like Micron Technology, that enroll about 350 people every year in their apprenticeship program. But success in apprenticeship programs is about more than numbers. Take the story of Bryan Brandel, who comes from my hometown of Meridian. Bryan grew up watching his father and grandfather work as linemen for the phone company. Bryan seemed to be following in their footsteps when he enrolled in a Vocational Technology program at Meridian High School. He learned practical skills, including how to weld. As Bryan was completing high school, his father and grandfather encouraged him to pursue a traditional four-year degree. He finished his degree; but wasn't sure what to do next. He went on to graduate school, still not sure what he was going to do. Months before completing his dissertation, Bryan realized that he did not want to pursue Ecology or Biology. He thought about his passion. That took him back to his high school Vocational Technology program. He made the bold step of becoming a lineman in the electric utility industry. After finishing school at Northwest Lineman College, he started working for Idaho Power, completing their lineman apprenticeship program. He obtained a journeyman position on a line crew, and today is a line crew foreman. Bryan's story is typical of the many young adults in our communities who follow traditional education paths that might not be right for them. Because of his experience, Bryan actively promotes apprenticeships for Idaho Power. He speaks to high school students about the wonderful opportunities they bring. His story is truly inspirational. Apprenticeship programs create good-paying jobs, allow students to complete programs debt-free, and provide a sense of accomplishment. They give Idahoans like Bryan, and all Americans, opportunity and purpose in our market economy.

IN RECOGNITION OF NATIONAL CY-  
BERSECURITY CAREER AWARE-  
NESS WEEK

**HON. BILL POSEY**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Monday, November 18, 2019*

Mr. POSEY. Madam Speaker, November 11th marks the start of National Cybersecurity Career Awareness Week. This week-long campaign focuses on local, regional and national interest to engage the community on not only the importance of cybersecurity but career opportunities in the field.

Cybersecurity IT workers play a vital role in upkeeping the integrity of our systems, networks, and programs as well as pioneering new ways to promote system strength against unforeseen threats. In a highly interconnected and increasingly globalized world, there has never been a more important time than now to raise awareness.

Unfortunately, America is facing a critical shortage of people trained in cybersecurity. There are currently over 300,000 jobs nationally that need to be filled in the cybersecurity workforce and globally, an expected shortfall of 1.8 million cybersecurity professionals by 2022. This deficit can easily be filled by American talent and continued commitment to making educational resources available early.

In my own district, we are playing our part by educating the public about what role cybersecurity plays in their everyday lives and how impactful a career in cybersecurity can be. To raise awareness of the importance of cybersecurity, several of our local colleges along with CareerSource Brevard, Brevard School District, Economic Development Commission of Florida's Space Coast and Florida High Tech Corridor to name a few, will come together to discuss the role of cybersecurity in our economy, in enhancing public safety and national security.

I ask my colleagues to join me in recognizing National Cybersecurity Career Awareness Week.
