

Migrating your Outlook Email Signature

You are able to migrate your Outlook email signature from the current Citrix environment to the new upgraded Citrix environment. Make sure Outlook is not running and...

The script will open and run in a new window...

```
Legacy Citrix Signature and Desktop Items
#####
## MIGRATION OF LEGACY CITRIX MAIL SIGNATURES & DESKTOP ITEMS ##
#####
Legacy Citrix Mail Signature Found
Copying Legacy Mail Signature to New Outlook Profile
Please review C:\Users\grayt\AppData\Local\Temp\Signature.log for information
Legacy Citrix User
No Desktop Items with File Extension .bmp found to be Migrated
No Desktop Items with File Extension .csv found to be Migrated
No Desktop Items with File Extension .dic found to be Migrated
No Desktop Items with File Extension .doc found to be Migrated
No Desktop Items with File Extension .docm found to be Migrated
```

...and automatically close when it is complete.

When the script has completed you can re-launch Outlook

Things to Remember...

- ☑ You cannot migrate your network/desktop Outlook email signature to Citrix as there has been a request to keep signatures separate across the two platforms
- ☑ The script will also migrate any files you had saved to your current Citrix desktop. Any items will be saved to a folder on your new Citrix desktop...
