

Setting up Citrix on an Apple Mac

Citrix is a technology that allows you to use an array of standard applications and an Eversheds desktop remotely as if you were in the office. The following shows you how to set up Citrix to run on your Apple Mac computer...

1 Visit eversheds.com and scroll down to bottom of the home page...

2 Click on **Staff sign-in**

3 Click on **Eversheds @Anywhere**

4 Enter your user ID, password and Signify password* and then

5 Click on **Install**

6 Once the Citrix Receiver app has downloaded to your Mac, open it

7 Click on **Install Citrix Receiver**

* Signify password is normally your PIN + the latest Signify passcode

Turn over

Things to Remember

- ☑ Citrix is now installed on your Mac. The next time you go to the Staff Sign-in option and log in you'll be able open the Citrix desktop.
- ☑ See the QRG "Logging in to Citrix from a Mac" to see that process in more detail.
