

Doing data differently

Helping the global financial community make informed decisions through the provision of comprehensive, accurate, timely and affordable securities and economic data services.

With more than 30 years' experience, we offer comprehensive and accurate securities reference, corporate actions and pricing data for derivatives, equities, fixed income, and investment funds around the globe. We also cover economic data extensively.

We understand how crucial financial and economic data is and take a different approach as to how we proceed:

- We do not rent data, we sell it
- We do not have onerous redistribution rules
- We customize our services to meet your needs
- We cover all countries – no matter how large or small
- Finally, we offer competitive prices

As a result of our on-going commitment to providing cost-effective and innovative data solutions, while ensuring the highest standards, EDI has achieved the internationally recognized quality and security certifications ISO 9001 and ISO 27001.

Headquartered in the United Kingdom, we have operations in Australia, Canada, Germany, India, Morocco, South Africa, and in the United States.

Our Support Team is available on +44 (0) 207 324 0020, 24 hours a day, Monday to Friday and are closed on Christmas and New Year's Day.

Introduction to Worldwide Corporate Actions (WCA)

The Worldwide Corporate Actions service (WCA) is a cost-effective solution that helps customers manage corporate action information. Since its launch in April 2002, EDI has constantly developed this service to meet clients' ever-changing needs. In the first half of 2008, Exchange Data International concentrated on strengthening its corporate actions service by widening their security coverage to structured products and covered warrants. In addition, EDI has also added bonds that trade as equities. This means that if a security is a bond but treated and settled as an equity it will be included in our equity offering.

This service covers 114 countries. Announcements are directly sourced from exchanges and other sources globally, making a total of 400 sources on a daily basis. Our database is updated four times a day to ensure that customers receive timely information in respect of each geographic region. Asia/Pacific, Europe/Middle East and Americas are uploaded according to the different time zones.

The Worldwide Equity Corporate Actions service is programmed in the ISO 15022 message standard. And as a result, announcements are available in MT564 and 568 formats, and firms can easily populate main-frame systems and in-house security portfolios. EDI is ISO 15022 2015 compliant.

This Service is available either via a web-interface, SFTP connection and API. Subscribers of the web service also receive daily emails of new announcements for stocks in their portfolio and their selection of events.

The web-based application offers:

- Key search facilities
- Key data calendar
- Event announcements
- Portfolio import facility
- Download capabilities

EDI currently provide Securities Reference Files and Equity Corporate Actions Files four times a day at the times* below:

0 Increment – Between 04.00 and 06.30

1 Increment – Between 08.00 and 10.30

2 Increment – Between 14.00 and 16.30

3 Increment – Between 18.00 and 22.30

*All times are in UTC.

Awarded for Excellence

Different Types of Corporate Action Feeds

NOW AVAILABLE VIA API

All these corporate actions files include the same corporate actions announcements, and the only difference is the inclusion of certain identifiers.

E2020 WCA feed

Equity - Global End of Day e2020 Feed

E2020_LST_EVT -- Fully customizable events specific Equity Corporate Actions with limited Reference Data

E2020_LST_REF -- Fully customizable extended Global Reference Data which includes ISIN, Sedol, FIGI Codes and other Reference fields.

E2020_NTS – Notes files which provide the actual announcement details. E2020_LUP

-- Lookups and Possible Values files

US Style E2020 Feed

In US the companies will normally announce split and spin off information. For the rest of the world those events are classified as sub- division or consolidations. In order to have EDI's feed using the same naming conversion as that of the US exchanges EDI has created a new US style E2020 feed. EDI have added 3 additional events named FSPLT (Forward Split), RSPLT (Reverse Splits) and Spoff (Spin Off). The following event types from WCA are taken into consideration while creating this event. Bonus, Stock Dividend, Sub- division, consolidation and Demerger events.

Clients taking this feed will see the event type as FSPLT or RSPLT or Spoff instead of underlying WCA event codes.

The ratios are also adjusted so the clients will see the ratio as announced by the company.

Event Coverage: Security Level

The current WCA feeds comprehensively covers all corporate actions events affecting global securities but can easily be customized to client's requirements in terms of geographical coverage or event types.

For each event covered by the WCA service we provide the following fields enabling an easy identification of the security affected by the event and the type of the event:

- Event type
- Creation Date
- Change Date
- Issuer Name
- Country of Incorporation
- Instrument Type
- Security Description
- Par Value
- Currency
- ISIN, US Code, Local Code
- Primary Exchange
- Exchange & Country
- Country of Registration
- Listing Status
- Listing Date

As mentioned before the WCA services provided detailed information on crucial corporate actions events affecting securities worldwide. EDI has recently incorporated Financial Instrument Global Identifiers (FIGI) into the WCA service, so users can now request to add these identifiers to their feed and easily cross-check both data sets.

Below is the list of the events currently covered and their specific fields:

General Events

- Announcement: Notification Date; Related Event; Related Event ID; Notes
- Arrangement: Record Date; Ex Date; Pay Date; Record Date ID & Notes; Registration Date; Priority; Notes
- Call: Record Date; Call Number; Currency; Due Date; Amount apportioned to Face Value; Amount Apportioned to Share Premium Account; Record Date ID & Notes; Registration Date; Priority; Notes
- Company Meeting: AGM Date; AGM Time; Meeting Type; Financial Year End Date; Address
- Lawsuits/Class Actions: Effective Date; Notes
- Listing Status Change: Notification Date; Effective Date; Related Event; Related Event ID; Reason Static Data Change Events
- Financial Year Change: Previous & New Financial Year Start Date; Previous & New Financial Year End Date
- Incorporation Change: Effective Incorporation Change Date; Previous & New Country Code; Related Event; Related Event ID

- International Code Change: Effective Date; Previous & New Code (ISIN, US...); Related Event; Related Event ID
- Issuer Name Change: Effective Name Change Date; Previous & New Name; Related Event; Related Event ID; Legal Name; Notes

- Liquidation: Option ID; Serial ID; Type of Payment; Liquidation Date; Currency; Liquidation Price; Record Date; Liquidator; Address; Telephone; Fax; Email; Liquidation Terms
- Meeting: AGM Date; AGM Time; Meeting Type; Financial Year End Date; Address, City, Country Code
- Registered Office Change: Old Head Office Address, New Head Office Address, Old Regional Office Address, New Regional Office Address, Date of Change

NEW - Readable Corporate Action Notices (RCAN)

The Readable Corporate Action Notice (RCAN) product offers 'readable' documents that combine all the data elements that would be contained within a typical corporate actions data feed (e.g., a Microsoft Excel, CSV, or XML file), but instead, presents these elements in a human-readable form, similar to a news feed.

RCAN enables clients to read corporate actions notices the same way as they read the news. Unlike in typical corporate actions feed records, where the parts are separated out and need to be re-linked within a client-side database, the RCAN is a complete message, where all the disparate parts are pulled together.

RCAN goes even further than this, supplying various change management features, links to related notices and even additional data points that are not found in the database from which it is derived.

RCAN covers 45 corporate events, including dividends, mergers and acquisitions, new listings (IPOs), and stock splits, as well as aggregating corporate actions from over 150 exchanges globally.

The intraday RCANs are provided throughout the day as PDF or XML file formats and can be delivered by email, FTP, API, RSS, or via a search platform. Additionally, start-of-day and end-of-day summary reports are available to clients that wish to receive a consolidated list of this information.

Benefits of RCAN include:

- Intraday notices are provided at four set times throughout the day — the same frequency as the corporate actions data feeds. This gives buy-side firms all the information necessary to make informed market decisions in one simple, readable format.
- Front- and middle-office workers can remain informed of data values, making operations more efficient and decreasing the chance of corporate actions going unnoticed.
- Amalgamation of disparate data sections into one simple, comprehensive document, eliminating the need for data aggregation within a client-side database.
- Inclusion of relevant information from internal and external sources, including added data values, deletions, change management features, links to related notices, and reference and events data.

Readable Corporate Action Notices Sample Data

The Readable Corporate Action Notice (RCAN) is a pdf document that combines all the data elements that would be contained in a comprehensive EDI Corporate Action comprehensive feed and presents them in a human-readable form, please see below for samples.

Company Meeting Notice showing Additional Active Securities and counts by Asset class for the Issuer.

NEW - Corporate Actions Alert Files

EDI understands the challenges for the financial services community, and we provide alert files for upcoming effective and ex dates, customized to your requirements.

Key Features:

- Requests - Ex-Date, Record Date, Pay Date, Effective Date. All fields from EDI's Corporate Actions feed are available.
- Date Range - Alerts can be taken up to 30 days before the required dates.
- Reminders - You can receive as many dates before they become effective.

Exchange Coverage

Customization

EDI is proud to offer the most effective and efficient solutions tailored to meet each individual customer's needs. We offer a range of customization options including:

- Delivery-based solutions to complement existing client infrastructure.
- Content delivered at the geographical or portfolio holding level.
- Feeds delivered in various formats, field content and integrated client level data items.

EDI uses its extensive data research expertise to source, scrub and integrate new client specified data items with existing products and services. For instance, a request from a multinational investment bank to source the DR universe and map it against its underlying share portfolio ultimately led to the development of EDI's successful Depository Receipt Database.

In addition, EDI was the first vendor to successfully launch an ISO 15022 Corporate Action Messaging feed. This enables customers to reduce costs and increase efficiency by removing the need for multiple feed handlers.

Support

Customer Support

Monday - Friday
Open 24 hours

Saturday
Support Coverage ends 8am
(GMT)

Sunday
Support Coverage resumes at
11pm (GMT)

**Support Coverage is not
available**
Saturday 8am to Sunday 11pm

Call +44 207 324 0020

Email: support@exchange-data.com

Customer support is closed on Christmas and New Year's Day.

We aim to acknowledge all queries within an hour of receipt and answer queries within 24 hours where possible.

We will send a progress report if a query is not resolved within that timeframe. We resolve around 95% of customer queries within 24 hours.

All queries sent to our Support department are filtered and dispatched to the relevant department. An IT staff member is engaged in the communication process to resolve complicated technical issues.
