Subject: RDAP Timelines

Hi Russ,

While the RDAP working group is finalizing its work, we're beginning to turn our eyes towards implementation. Contracted parties are concerned about the amount of concurrent work that will be coming out of the EPDP, and that it's also possible that the RDAP profile developed in accordance with the temp spec will need to be amended or replaced.

As such, we'd like to request either of the following options for an implementation timeline. Either instead of 135 days, we extend that out to 180 days; or that we link the 135 days to when the EPDP final report is accepted by the board. The goal is to allow us all to plan what may be overlapping work appropriately.

Thanks,

Graeme Bunton
& Donna Austin
