Subject: Message for ICANN Board re. Preliminary Issue Report on the next-generation gTLD RDS to replace Whois

=====

Dear Board Members,

We would like to inform you that Staff will need additional time to complete the Preliminary Issue Report on the next-generation gTLD Registration Directory Services (RDS) to replace Whois as requested on 26 April. The original due date for publication per the GNSO Policy Development Process Manual is June 10th, but due to the current workload, the need to circulate the draft to the GNSO/Board collaboration group for comment, as well as the complexity of the issue, some additional time is needed. We anticipate that we will be able to publish the report for public comment shortly after the ICANN Meeting in Buenos Aires. We apologize for this delay.

Best regards,

Marika

Sr. Policy Director and Team Leader for the GNSO
