

Dear Registry Operator,

As ICANN previously [notified](#), the [global amendment](#) to the [base gTLD Registry Agreement](#) was approved and will become **effective on 7 August 2023**.

Please note that the [Registration Reporting Interfaces \(RRI\)](#) system already accepts the new format of the Registry Functions Activity report as updated in Specification 3, Section 2 of the base gTLD Registry Agreement.

Registry operators may continue to submit the Registry Functions Activity report without the new field 'rdap-queries' up until the report for the month of **December 2023**, but are encouraged to start using the updated report format as soon as possible.

Enforcement of the updated report structure in the RRI system begins with the submission of the report for the month covering the period of **January 2024**.

For any questions, please contact [ICANN Global Support](#).

Best regards,

Technical Services Team
