INFOSYS AUSTRALIA ACHIEVES ENHANCED CMMI LEVEL 5 QUALITY STANDARD

Melbourne, Australia: Wednesday, 29 October 2008 – Infosys Australia has become one of the country's first IT services companies to achieve the Software Engineering Institute's CMMI® Level 5 Version 1.2 (with IPPD), the highest standard available, suggesting Infosys Australia is among the very best IT services companies in the world.

CMMI is an enhanced version of the Capability Maturity Model that integrates various other frameworks created by the Software Engineering Institute. It is being adopted worldwide by leading IT organisations as a benchmark quality standard. In Australia, CMMI is rapidly gaining prominence, with many of the country's top 500 companies starting to look for CMMI compliance from their service providers.

CMMI assessor Edward Weller carried out the month-long appraisal in September 2008 covering all 22 process areas. Infosys Australia first achieved CMMI Level 5 in 2005. With version 1.2, SEI has made the assessment process more stringent and requires reappraisal process every three years to maintain a current rating. Infosys is one of the first Australian companies to achieve the new higher standard. Parent company Infosys Technologies first achieved CMM Level 5 in 1999, CMMI Level 5 in 2002 for Chennai, and got the newest Version 1.2 appraisal in 2007.

The assessment included a detailed analysis – comprising 543 review hours and 15,948 separate observations in 22 process areas – of Infosys Australia's operations in Melbourne, Sydney, Brisbane and offshore operations. The assessor highlighted Infosys Australia's corporate values, an open culture, transparency and a work environment that cherishes quality as its most outstanding strength in meeting the high standards of the appraisal process.

Gary Ebeyan, CEO of Infosys Australia, commented: "We are extremely proud to have achieved a standard of CMMI Level 5 Version 1.2. It demonstrates Infosys Australia operates at world's best practice and that both the onshore and offshore components of our Global Delivery Model perform at the highest levels."

The benefits to Infosys Australia's clients of working with a company whose processes have been CMMI Level 5 rated include service excellence, predictability in delivery, increased productivity and better quality. Increasingly Tier 1 companies are also required to show that their entire supply chain is CMMI Level 5 rated in order to compete for government contracts.

Edward Weller, President of Integrated Productivity Solutions, LLC, added: "Once again Infosys Australia has demonstrated what Level 5 is about – continuous improvement." Mr. Weller, an SEI^{SM} Certified SCAMPI^{SM} High Maturity Lead Appraiser, recently led an appraisal of Infosys Technologies Australia Pty Ltd that resulted in a CMMI® Level 5 rating.

"I have been the Lead Assessor / Appraiser for Infosys Technologies since 2001 and Infosys Technologies has shown improvements in every appraisal in terms of process

definition, tools, and measurable performance. The Infosys Australia organisation has a clear appreciation of customer needs that is reflected in customer satisfaction as a critical goal and measurement of critical parameters that contribute to this satisfaction."

CMMI and Capability Maturity Model Integration are registered in the U.S. Patent and Trademark Office by Carnegie Mellon University.
