SSIS INTEGRATION TOOLKIT FOR
DIRECTORY SERVICES

Use the **SSIS Integration Toolkit for Directory Services** to effectively manage your LDAP, Active Directory, Azure Active Directory, and Google Directory data. This toolkit offers a cost-effective, user-friendly, and high-performance solution for integrating data using Microsoft SQL Server Integration Services (SSIS) capabilities.

DATA INTEGRATION MADE EASY

The SSIS Integration Toolkit for Directory components to facilitate integration with Directory services applications. By utilizing Microsoft SQL Server Integration Services (SSIS) as your data integration platform, you can take advantage of the flexibility and power of the SSIS ETL engine. Use the toolkit to synchronize user account information with virtually any external data source that SSIS can read/write to.

KEY FEATURES

- Easily manage massive number of Users.
- Maintain User's Group memberships effortlessly.
- Read various Directory attributes from Users and Groups.
- Disable or enable massive number of User accounts instantly.
- Sophisticated custom field support for reading/writing to Active Directory, Google Directory, and LDAP.
- Advanced field filtering capabilities in the source and destination components.

## MAIN COMPONENTS

ACTIVE DIRECTORY COMPONENTS

- Establish connections with Microsoft Active Directory and Microsoft Azure Active Directory.
- Read user, group, computer record data with support of custom fields.
- Support of using Search Criteria to filter data in LDAP filtering format.

GOOGLE DIRECTORY COMPONENTS

- Establish connections with Google Directory.
- Read user, group, computer record data with support of custom fields.
- Support of using Search Criteria to filter data in Google filtering format.

LDAP DIRECTORY COMPONENTS

- Establish connections with LDAP Directory.
- Read user, group, computer record data with support of custom fields.
- Support of using Search Criteria to filter data in LDAP filtering format.

BENEFITS

- The toolkit helps you manage all the intricate details involved in working with Directory Services data.

- Easy learning curving, consistent application interface, familiar development experience within SQL Server Business Intelligence development environment (Visual Studio).

- A codeless data integration approach.

- Free developer license is available for interactive use without anylimitations.

SYSTEM REQUIREMENTS

Microsoft Active Directory

- Microsoft Active Directory (On-Premise)
- Microsoft Azure Active Directory

SQL Server Integration Services

- Azure SQL
- Microsoft SQL Server 2022
- Microsoft SQL Server 2019
- Microsoft SQL Server 2017
- Microsoft SQL Server 2016
- Microsoft SQL Server 2014
- Microsoft SQL Server 2012

ABOUT KINGSWAYSOFT

KingswaySoft is a leading provider of data integration solutions for enterprise software. Organizations from more than 90 countries rely on our solutions to drive their business data efficiency.

Our primary mission is to help our customers to be successful in their business by providing them with quality software products and innovative integration solutions at a competitive price.
