

AMERICAN RESCUE PLAN ACT

CYBERSECURITY FUNDING

The American Rescue Plan Act (ARPA) was passed in March 2021 to accelerate the country's recovery from the COVID-19 emergency and its negative economic impacts. As part of this legislation, states, local governments, tribal governments, schools, colleges, and hospitals received stimulus funding to rebound from the pandemic.

Several programs included in ARPA are technology-friendly and may be used for cybersecurity projects. Examples include:

- Coronavirus State and Local Fiscal Recovery Funds
- Elementary & Secondary School Emergency Relief Fund
- Higher Education Emergency Relief Fund
- HHS Provider Relief Fund

The Kyndryl Services Grants Support Program provides public sector agencies, educational institutions, and hospitals with grants information, customized funder research, and consultation that will help develop project ideas, get technology-rich projects funded, and even expand initiatives that are already in the works.

Grants Development Consultants with the Kyndryl Grants Support Program will work with you to evaluate your needs and determine the level of support that will maximize the funding you can obtain and optimize the technology you are able to purchase with the grant funds you receive.

For more information about Kyndryl capabilities in the public sector, visit: [Kyndryl Public Sector Grants Program](#)

Contact your Kyndryl representative or [Kyndryl Grants Support Program staff](#) to learn more about how you can access grant experts ready to assist with ARPA funding requests!
