# MAGNET A X I O M CYBER™

A COMPLETE DIGITAL FORENSICS PLATFORM FOR HEALTHCARE

Healthcare organizations face many different challenges. While adapting to new and existing regulatory standards, shifting technology landscapes, and the new realities introduced by COVID-19, healthcare is also faced with the challenge of managing the potentially devastating effects of cybersecurity attacks.
Over 93%

of healthcare organizations have experienced a data breach since Q3 2016

Source: Black Book Market Research

Bad actors are relentlessly evolving their attack techniques to acquire sensitive data such as electronic personal health information (ePHI) and non-medical, personally identifiable information (PII). From managing phishing attacks to performing root cause analysis of malware attacks, IT, Cybersecurity and Forensics teams are constantly thwarting threats and investigating how security incidents occurred.

Healthcare organizations need a forensics solution that will help them easily identify how cyberattacks occurred so they can quickly meet regulatory compliance and remediate the effects of security incidents as comprehensively as possible.

MAGNET AXIOM CYBER ENABLES COMPREHENSIVE AND SIMPLIFIED FORENSICS INVESTIGATIONS

AXIOM Cyber is a complete digital forensics platform capable of performing remote collections of target endpoints as well as analyzing evidence from all your data sources including computer, mobile, and cloud-based services.

Meet Regulatory Compliance

Regulations from HIPAA or GDPR dictate that once a data breach is known it must be reported to authorities and the nature of the breach be documented, among other things. AXIOM Cyber's artifacts-first approach makes it easy to get a quick and comprehensive view of all the data to quickly and fully report on security incidents according to regulatory requirements.

Analyze All Data Sources

Healthcare data environments are complex including legacy and siloed data systems, mobile devices, and connected medical devices, each a potential point of vulnerability rich with data. To ensure nothing gets missed, AXIOM Cyber takes data from all evidence sources—including computers (Mac and Windows), mobile devices & tablets, and cloud services and apps—and presents it in a single case file.

Empower Your IT and Forensics Teams

New tools must be easy-to-use so even the most junior analysts can quickly learn how to use them proficiently without requiring extensive training or expert knowledge. AXIOM Cyber is intuitive yet powerful so Cybersecurity and Forensic teams can do their jobs quickly and efficiently.

Reduce Time to Evidence

Identifying the initial point of compromise of an attack (e.g. phishing) and how malicious activity further infiltrated the infrastructure is imperative. AXIOM Cyber dramatically reduces the time taken to discover insight and evidence with Analytics and AI-based tools like Timeline, Connections, and Magnet.AI.

SEE AXIOM CYBER IN ACTION FOR YOURSELF

If you'd like to learn more about Magnet AXIOM Cyber and how it can help you simplify your remote forensic investigations, visit magnetaxiomcyber.com. While you're there, you can learn more about the product, request an in-depth personal demo from an AXIOM Cyber expert, and request a free trial version.
