Address Your Evolving EUC Needs with Nutanix

Nutanix Hybrid Multicloud Solutions Simplify Management, Enhance Security, Accelerate Deployments, and Improve User Experience

KEY BENEFITS

- Seamlessly extend on-premises to hybrid multicloud.
- Provide consistent access to apps and data and support more end users without adding complexity.
- Burst 2,000 desktops to the cloud in under two hours.
- Strengthen defense against ransomware and malware while adhering to regulatory and compliance requirements.
- Start small and scale as needed with an excellent return on investment (ROI).
- Flexible per-user subscription pricing.

Solutions

- End User Computing (EUC)
- VDI

Ready to get Hands-On?

Take a Test Drive

The ability to react quickly to changing end-user needs and shifting work locations while ensuring maximum security has never been more important. Today, the most successful end-user computing (EUC) deployments are often hybrid or multicloud, but many installations are not architected to adapt to the cloud.

As a leading provider of hybrid multicloud infrastructure, Nutanix is uniquely positioned to help organizations navigate the changing EUC landscape and achieve greater user satisfaction with less effort.

"

We were able to easily transition to a 100% work-from-home environment in just one day since we were already running our virtual desktops on Nutanix.

Dan Morrison

Director of Infrastructure and Operations,
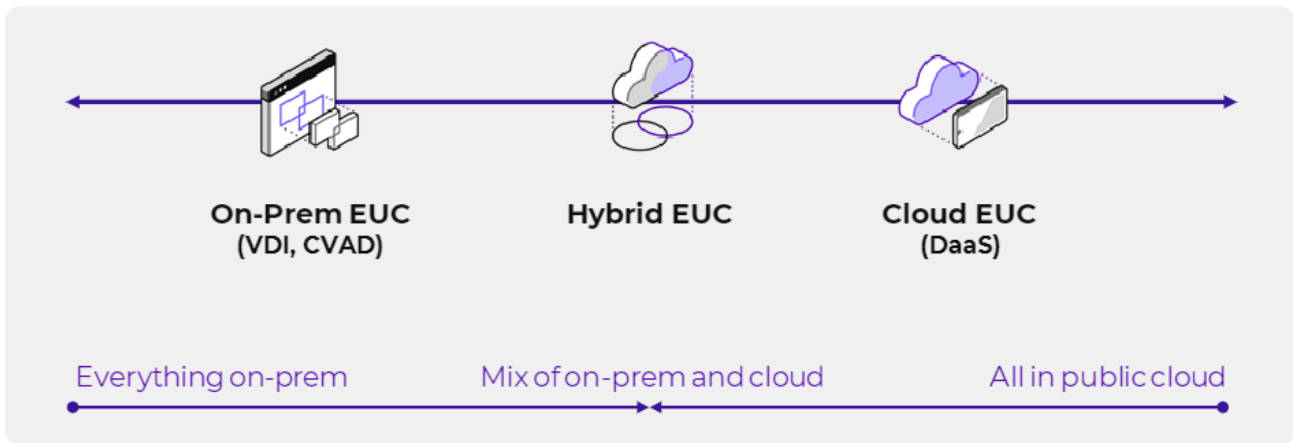

Penn National Insurance

SIMPLIFIED DEPLOYMENTS

With users working from anywhere, the rapid adoption of EUC has created a sprawl of locations, infrastructure and endpoints that stretch IT resources to the limit. Whether you're operating in a private, public or hybrid cloud, Nutanix lets you centralize management to support more end users with less operational complexity. That's one of the reasons Nutanix is among the industry's best for return on investment, delivering 123% ROI with payback in less than eight months.

HYBRID MULTICLOUD SOLUTIONS

With dynamic market conditions requiring rapid scaling and hybrid work becoming a norm, many organizations are turning to hybrid cloud deployments for end-user computing infrastructure. Today, 45% of EUC solutions are using hybrid and/or multicloud environments, yet many teams remain unsure about how to get started on this path.

On-Prem EUC (VDI, CVAD) — Hybrid EUC — Cloud EUC (DaaS)

Everything on-prem — Mix of on-prem and cloud — All in public cloud

Nutanix enables you to deploy EUC environments on your terms and at your pace. We enable you to locate services in different geographies, with elasticity to scale as needed, resulting in consistent end-user outcomes in every location

In addition, Nutanix makes it simple to leverage elastic cloud capacity on demand. Nutanix also makes it simple to protect the availability of your EUC environment with disaster recovery as a service (DRaaS). Add protection for end-user environments in minutes with easy recovery in the cloud.

ENHANCE END-USER SECURITY

A recent survey found that 59% of organizations consider security and IT efficiency the top purchase criteria for EUC, but satisfying compliance, regulatory and data privacy requirements for remote workers is a challenge. Nutanix helps prevent the spread of malware and ransomware – along with data loss and theft – by regulating local device access with comprehensive access controls and data encryption in transit and at rest.

FASTER DEPLOYMENTS

Most organizations today face mounting uncertainty regarding workforce staffing, which requires maximum flexibility and fast adaptation. Some users will adopt a hybrid workstyle, going to the office full- or part-time, while others completely embrace remote work. In a recent survey, 62% of

organizations agreed that standardized EUC environments accelerate deployment time.

With Nutanix, standardized, secure environments with centralized management scale quickly and deliver greater flexibility regardless of location while offering a consistent, predictable experience that greatly improves user satisfaction. You can transition to a completely remote workforce in hours vs. days. A recent demonstration showed how to burst thousands of cloud desktops in less than two hours.

GETTING STARTED

Nutanix experts have the skill and expertise to help you make the right decisions for your organization, enabling you to deploy and operate efficient and cost-effective EUC solutions with confidence. Contact Nutanix or an authorized representative to choose the path forward that's right for you.
