The Department of Economic and Social Affairs of the United Nations Secretariat is a vital interface between global policies in the economic, social and environmental spheres and national action. The Department works in three main interlinked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which States Members of the United Nations draw to review common problems and take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

The Population Division of the Department of Economic and Social Affairs provides the international community with timely and accessible population data and analysis of population trends and development outcomes for all countries and areas of the world. To this end, the Division undertakes regular studies of population size and characteristics and of all three components of population change (fertility, mortality and migration). Founded in 1946, the Population Division provides substantive support on population and development issues to the United Nations General Assembly, the Economic and Social Council and the Commission on Population and Development. It also leads or participates in various interagency coordination mechanisms of the United Nations system. The work of the Division also contributes to strengthening the capacity of Member States to monitor population trends and to address current and emerging population issues.

PREFACE

The *2019 Revision* of the *World Population Prospects* represents the latest global set of demographic estimates and projections prepared by the Population Division of the Department of Economic and Social Affairs of the United Nations Secretariat. It constitutes the twenty-sixth round of global population estimates and projections produced by the Population Division since 1951.

This volume of the *2019 Revision* presents the comprehensive tables of the official United Nations population estimates and projections, displaying key demographic indicators for selected periods or dates from 1950 to 2100, for the world, development groups, income groups, regions, subregions, and countries or areas with more than 90,000 inhabitants in 2019. For countries or areas with fewer than 90,000 inhabitants in 2019, only figures related to population size and growth are provided. In all data tables, figures for 1950-2015 are estimates and those thereafter are projections. The projections are presented for the medium fertility variant, lower and upper 95 per cent prediction intervals, and constant-fertility variant. A companion *World Population Prospects 2019: Highlights* report (ST/ESA/SER.A/423) provides key findings and summarises key population trends described by the estimates and projections presented in *World Population Prospects 2019*.

To depict the uncertainty of future demographic trends, the Population Division has developed probabilistic projections for all countries and areas of the world. It should be stressed that making projections to 2100 is subject to a high degree of uncertainty, especially at the country level. In that regard, users are invited to focus not only on the outcomes of the medium variant, which for each country corresponds to the median of several thousand projected trajectories of specific demographic components, but also to the associated prediction intervals that provide an assessment of the uncertainty inherent in such projections. Detailed information on the 80 per cent and 95 per cent uncertainty bounds for different components at the country level is available on the website of the Population Division, www.unpopulation.org (also see: <https://esa.un.org/unpd/wpp/Graphs/Probabilistic/>), and associated data table (<https://population.un.org/wpp/Download/Probabilistic/>) and country profiles (see *Volume 2: Demographic Profiles*).

The detailed results of the *2019 Revision* are made available through a variety of media. The website of the Population Division provides access to an extended set of data organized in Excel and ASCII files (<https://population.un.org/wpp/Download/>) as well as to an interactive database that enables users to obtain specific information on selected countries or regions (<https://population.un.org/wpp/DataQuery/>).

The results of the *2019 Revision* are presented in two volumes. In addition to this volume, the second volume contains demographic profiles presenting time series and plots of selected indicators, covering the period from 1950 to 2100, for each country or area, as well as for development groups, income groups, regions and subregions. The second volume also provides a brief description of the empirical data used and the methods applied to derive the estimates of population and components of demographic change (fertility, child, adult and overall mortality, international migration) for each country or area for the period 1950-2020. Further details about the respective data sources used for each country or area are available online interactively (<https://population.un.org/wpp/DataSources/>) with a tabular version of this information also available for download (<https://population.un.org/wpp/Download/Metadata>). Further details about the methodology used to prepare the estimates and projections is explained in a companion report (*World Population Prospects 2019: Methodology of the United Nations Population Estimates and Projections*).

In preparing the *2019 Revision*, the Population Division benefitted from the collaboration of the regional commissions, especially the Economic Commission for Latin America and the Caribbean, and of specialized agencies and other relevant bodies of the United Nations system, including UNAIDS, UNICEF, WHO, UNHCR and the World Bank, notably for under-five mortality estimates through the UN Inter-agency Group for Child Mortality Estimation (UN-IGME). The Statistics Division of the Department of Economic and Social Affairs, through its *United Nations Demographic Yearbook* and accompanying databases, provided access to official national population statistics used in the preparation of the *2019 Revision*. The Population Division also acknowledges the assistance and cooperation of the organizations responsible for the Demographic and Health Surveys, the Multiple Indicator Cluster Surveys, the Human Mortality Database and Human Life Table Database (UC Berkeley, MPIDR and INED), the Human Fertility Database and Human Fertility Collection (MPIDR and VID), the Latin American Mortality Database–LAMBdA (University of Wisconsin-Madison), the International Data Base (U.S. Census

Bureau), the Global Burden of Disease project (IHME, University of Washington), the Developing Countries Mortality Database–DCMD (Zhejiang University), IPUMS-International, and of the many national statistical offices that have made available data and reports for recent censuses and surveys to inform the development of the estimates presented in this report. The Population Division is grateful for the contributions made by these entities and accepts responsibility for any errors in the manipulation or interpretation of the information provided.

The *2019 Revision* of the World Population Prospects was prepared by a team led by Patrick Gerland, including Kirill Andreev, Lina Bassarsky, Guiomar Bay, Helena Cruz Castanheira, Victor Gaigbe-Togbe, Danan Gu, Sara Hertog, Nan Li, Igor Ribeiro, Thomas Spoorenberg, Philipp Ueffing, Lubov Zeifman, Marc Wheldon and benefited of the support of Bela Hovy, Kyaw Kyaw Lay, Frank Swiaczny, Guangyu Zhang. The team is grateful to other colleagues in the Population Division for the support they have provided.

EXPLANATORY NOTES

The following symbols have been used in the tables throughout this report:

Two dots (..) indicate that data are not available or are not reported separately.

A hyphen (-) indicates that the item is not applicable.

A minus sign (-) before a figure indicates a decrease.

A full stop (.) is used to indicate decimals.

Years given refer to 1 July.

Use of a hyphen (-) between years, for example, 1995-2000, signifies the full period involved, from 1 July of the first year to 1 July of the second year.

Numbers and percentages in tables do not necessarily add to totals because of rounding.

References to countries, territories and areas:

The designations employed and the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory or area or its authorities, or concerning the delimitation of its frontiers or boundaries.

The term “country” as used in this publication also refers, as appropriate, to territories or areas. The names and composition of geographical areas follow those presented in “Standard country or area codes for statistical use” (ST/ESA/STAT/SER.M/49 as of July 2019), available at <http://unstats.un.org/unsd/methods/m49/>

The designation of “more developed” and “less developed” regions is intended for statistical purposes and does not express a judgment about the stage reached by a particular country or area in the development process. More developed regions comprise all regions of Europe plus Northern America, Australia and New Zealand and Japan. Less developed regions comprise all regions of Africa, Asia (excluding Japan), and Latin America and the Caribbean as well as Oceania (excluding Australia and New Zealand).

The group of least developed countries includes 47 countries located in sub-Saharan Africa (32), Northern Africa and Western Asia (2), Central and Southern Asia (4), Eastern and South-Eastern Asia (4), Latin America and the Caribbean (1), and Oceania (4). Further information is available at <http://unohrlls.org/about-ldcs/>.

The group denominated “other less developed countries” comprises all countries in the less developed regions minus the least developed countries.

The group of Landlocked Developing Countries (LLDCs) includes 32 countries or territories located in sub-Saharan Africa (16), Northern Africa and Western Asia (2), Central and Southern Asia (8), Eastern and South-Eastern Asia (2), Latin America and the Caribbean (2), and Europe and Northern America (2). Further information is available at <http://unohrlls.org/about-lllcs/>.

The group of Small Island Developing States (SIDS) includes 58 countries or territories located in the Caribbean (29), the Pacific (20), and the Atlantic, Indian Ocean, Mediterranean and South China Sea (AIMS) (9). Further information is available at <http://unohrlls.org/about-sids/>.

The classification of countries and areas by income level is based on the gross national income (GNI) per capita as reported by the World Bank (June 2018). These income groups are not available for all countries or areas.

In this publication, data for countries or areas have been aggregated in six continental regions: Africa, Asia, Europe, Latin America and the Caribbean, Northern America, and Oceania. Further information on continental regions is available from <https://unstats.un.org/unsd/methodology/m49/>. Countries and areas are also grouped into geographic regions based on the classification being used to track progress towards the Sustainable Development Goals of the United Nations (see: <https://unstats.un.org/sdgs/indicators/regional-groups/>).

* The designations employed and the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory or area or its authorities, or concerning the delimitation of its frontiers or boundaries. The names and composition of geographical areas follow those presented in "Standard country or area codes for statistical use" (ST/ESA/STAT/SER.M/49/Rev.3), available at <http://unstats.un.org/unsd/methods/m49/m49.htm>.

a The designation "more developed" and "less developed" regions are intended for statistical purposes and do not express a judgment about the stage reached by a particular country or area in the development process. The term "country" as used in this publication also refers, as appropriate, to territories or areas.

b More developed regions comprise Europe, Northern America, Australia/New Zealand and Japan.

c Less developed regions comprise all regions of Africa, Asia (except Japan), Latin America and the Caribbean plus Melanesia, Micronesia and Polynesia.

d The group of least developed countries includes 47 countries: 32 in Sub-Saharan Africa, 2 in Northern Africa and Western Asia, 4 in Central and Southern Asia, 4 in Eastern and South-Eastern Asia, 1 in Latin America and the Caribbean, 4 in Oceania. Further information is available at <http://unohrrls.org/about-ldcs/>.

e Other less developed countries comprise the less developed regions excluding the least developed countries.

f The group of Landlocked Developing Countries (LLDCs) is composed of 32 countries or territories: 16 in Sub-Saharan Africa, 2 in Northern Africa and Western Asia, 8 in Central and Southern Asia, 2 in Eastern and South-Eastern Asia, 2 in Latin America and the Caribbean, and 2 in Europe and Northern America. Further information is available at <http://unohrrls.org/about-lldc/>.

g The group of Small Island Developing States (SIDS) is composed of 58 countries or territories: 29 in the Caribbean, 20 in the Pacific and 9 in the Atlantic, and Indian Ocean, Mediterranean and South China Sea (AIMS). Further information is available at <http://unohrrls.org/about-sids/>.

h The country classification by income level is based on June 2018 GNI per capita from the World Bank.

i Countries and areas are grouped geographically into six major areas designated as: Africa; Asia; Europe; Latin America and the Caribbean; Northern America, and Oceania.

j Africa refers to Eastern Africa, Middle Africa, Northern Africa, Southern Africa, and Western Africa subregions.

k Asia refers to Eastern Asia, Central Asia, Southern Asia, South-Eastern Asia, and Western Asia subregions.

l Europe, like the SDG region, refers to Eastern Europe, Northern Europe, Southern Europe, and Western Europe subregions.

d The group of least developed countries includes 47 countries: 32 in Sub-Saharan Africa, 2 in Northern Africa and Western Asia, 4 in Central and Southern Asia, 4 in Eastern and South-Eastern Asia, 1 in Latin America and the Caribbean, 4 in Oceania. Further information is available at <http://unohrrls.org/about-ldcs/>.

e Other less developed countries comprise the less developed regions excluding the least developed countries.

f The group of Landlocked Developing Countries (LLDCs) is composed of 32 countries or territories: 16 in Sub-Saharan Africa, 2 in Northern Africa and Western Asia, 8 in Central and Southern Asia, 2 in Eastern and South-Eastern Asia, 2 in Latin America and the Caribbean, and 2 in Europe and Northern America. Further information is available at <http://unohrrls.org/about-lllcs/>.

g The group of Small Island Developing States (SIDS) is composed of 58 countries or territories: 29 in the Caribbean, 20 in the Pacific and 9 in the Atlantic, and Indian Ocean, Mediterranean and South China Sea (AIMS). Further information is available at <http://unohrrls.org/about-sids/>.

h The country classification by income level is based on June 2018 GNI per capita from the World Bank.

* Countries or areas listed individually are only those with 90,000 inhabitants or more in 2019; the rest are included in the aggregates but are not listed separately. The designations employed and the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory or area or its authorities, or concerning the delimitation of its frontiers or boundaries. The names and composition of geographical areas follow those presented in "Standard country or area codes for statistical use" (ST/ESA/STAT/SER.M/49/Rev.3), available at <http://unstats.un.org/unsd/methods/m49/m49.htm>.

a The designation "more developed" and "less developed" regions are intended for statistical purposes and do not express a judgment about the stage reached by a particular country or area in the development process. The term "country" as used in this publication also refers, as appropriate, to territories or areas.

b More developed regions comprise Europe, Northern America, Australia/New Zealand and Japan.

c Less developed regions comprise all regions of Africa, Asia (except Japan), Latin America and the Caribbean plus Melanesia, Micronesia and Polynesia.

d The group of least developed countries includes 47 countries: 32 in Sub-Saharan Africa, 2 in Northern Africa and Western Asia, 4 in Central and Southern Asia, 4 in Eastern and South-Eastern Asia, 1 in Latin America and the Caribbean, 4 in Oceania. Further information is available at <http://unohrlls.org/about-ldcs/>.

e Other less developed countries comprise the less developed regions excluding the least developed countries.

f The group of Landlocked Developing Countries (LLDCs) is composed of 32 countries or territories: 16 in Sub-Saharan Africa, 2 in Northern Africa and Western Asia, 8 in Central and Southern Asia, 2 in Eastern and South-Eastern Asia, 2 in Latin America and the Caribbean, and 2 in Europe and Northern America. Further information is available at <http://unohrlls.org/about-ldcs/>.

g The group of Small Island Developing States (SIDS) is composed of 58 countries or territories: 29 in the Caribbean, 20 in the Pacific and 9 in the Atlantic, and Indian Ocean, Mediterranean and South China Sea (AIMS). Further information is available at <http://unohrlls.org/about-sids/>.

h The country classification by income level is based on June 2018 GNI per capita from the World Bank.

i Countries and areas are grouped geographically into six major areas designated as: Africa; Asia; Europe; Latin America and the Caribbean; Northern America, and Oceania.

j Africa refers to Eastern Africa, Middle Africa, Northern Africa, Southern Africa, and Western Africa subregions.

k Asia refers to Eastern Asia, Central Asia, Southern Asia, South-Eastern Asia, and Western Asia subregions.

l Europe, like the SDG region, refers to Eastern Europe, Northern Europe, Southern Europe, and Western Europe subregions.

i The total dependency ratio is the ratio of the population aged 0-24 and that aged 65 or over to the population aged 25-64. They are presented as number of dependants per 100 persons of working age (25-64).

ii The child dependency ratio is the ratio of the population aged 0-24 to the population aged 25-64. They are presented as number of dependants per 100 persons of working age (25-64).

iii The old-age dependency ratio is the ratio of the population aged 65 or over to the population aged 25-64. They are presented as number of dependants per 100 persons of working age (25-64).

* Countries or areas listed individually are only those with 90,000 inhabitants or more in 2019; the rest are included in the aggregates but are not listed separately. The designations employed and the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory or area or its authorities, or concerning the delimitation of its frontiers or boundaries. The names and composition of geographical areas follow those presented in "Standard country or area codes for statistical use" (ST/ESA/STAT/SER.M/49/Rev.3), available at <http://unstats.un.org/unsd/methods/m49/m49.htm>.

a The designation "more developed" and "less developed" regions are intended for statistical purposes and do not express a judgment about the stage reached by a particular country or area in the development process. The term "country" as used in this publication also refers, as appropriate, to territories or areas.

b More developed regions comprise Europe, Northern America, Australia/New Zealand and Japan.

c Less developed regions comprise all regions of Africa, Asia (except Japan), Latin America and the Caribbean plus Melanesia, Micronesia and Polynesia.

d The group of least developed countries includes 47 countries: 32 in Sub-Saharan Africa, 2 in Northern Africa and Western Asia, 4 in Central and Southern Asia, 4 in Eastern and South-Eastern Asia, 1 in Latin America and the Caribbean, 4 in Oceania. Further information is available at <http://unohrrls.org/about-ldcs/>.

e Other less developed countries comprise the less developed regions excluding the least developed countries.

f The group of Landlocked Developing Countries (LLDCs) is composed of 32 countries or territories: 16 in Sub-Saharan Africa, 2 in Northern Africa and Western Asia, 8 in Central and Southern Asia, 2 in Eastern and South-Eastern Asia, 2 in Latin America and the Caribbean, and 2 in Europe and Northern America. Further information is available at <http://unohrrls.org/about-lllcs/>.

g The group of Small Island Developing States (SIDS) is composed of 58 countries or territories: 29 in the Caribbean, 20 in the Pacific and 9 in the Atlantic, and Indian Ocean, Mediterranean and South China Sea (AIMS). Further information is available at <http://unohrrls.org/about-sids/>.

h The country classification by income level is based on June 2018 GNI per capita from the World Bank.

i Countries and areas are grouped geographically into six major areas designated as: Africa; Asia; Europe; Latin America and the Caribbean; Northern America, and Oceania.

j Africa refers to Eastern Africa, Middle Africa, Northern Africa, Southern Africa, and Western Africa subregions.

k Asia refers to Eastern Asia, Central Asia, Southern Asia, South-Eastern Asia, and Western Asia subregions.

l Europe, like the SDG region, refers to Eastern Europe, Northern Europe, Southern Europe, and Western Europe subregions.

m Latin America and the Caribbean, like the SDG region, refers to Caribbean, Central America and South America subregions.

n Northern America, like the SDG region, refers to Bermuda, Canada, Greenland, Saint Pierre and Miquelon, United States of America.

o Oceania refers to Australia/New Zealand, Melanesia, Micronesia, and Polynesia subregions.

p Countries and areas are grouped into eight Sustainable Development Goal (SDG) regions as defined by the United Nations Statistics Division and used for The Sustainable Development Goals Report (<https://unstats.un.org/sdgs/indicators/regional-groups/>). These regions are further divided into 21 geographic subregions.

1 Including Agalega, Rodrigues and Saint Brandon.

2 For statistical purposes, the data for France do not include this area.

3 Including Zanzibar.

4 Including Nagorno-Karabakh.

5 Refers to the whole country.
